BUSINESS LOCALS.

Men's Overcoats are being sold at less than cost, at Asa Jones's.

Blanks for overseer's reports and their appointments for sale at this office.

She had the measles.
Lent next Wednesday.

Grand preparations are being made in Washington for the inaugural festivities.

To-morrow is Valentine's Day. Many designs are displayed from the show windows of our stationers.

The Superior court was engaged yesterday in trying the case of C. T. Justice vs. J. M. Cabo et al., of Pamlico.

The schooners *Annie E. Hall*, Capt. Queen, and *W. H. Ruten*, Capt. Pinkham, are loading lumber at Stinson's mill for Philadelphia.

The whereabouts of Gen. Charles G. Gordon, the hero of the Sudan, has at last been ascertained. He was murdered by Arabs at Khartoum.

A heavy snow storm has been prevailing out west. Railroads are blocked, and in some instances the trains have been entirely snowed under and abandoned.

As evidence of the severity of the cold snap that has been upon us for the last few days, yesterday Neuse river was, for about half the distance across on the north side, frozen over.

Rob. H. Kennedy, of Duplin, assistant door-keeper of the House, died at Raleigh yesterday morning. His family were en route for Raleigh to see him when the news reached Kinston of his death.

Congress was engaged on Wednesday in counting the vote for President and Vice-President. Grover Cleveland was declared to have 219 votes for President, James G. Blaine 183. Thomas A. Hendricks 219 for Vice-President, John A. Logan, 182.

Mr. W. C. Moore, a prominent business man of Kinston, and a very estimable gentleman, died at his residence in Kinston yesterday morning at 10 o'clock. Mr. Arden Wiggins, a prominent farmer of Contentment Neck, also died in Kinston yesterday.

We saw yesterday a beautiful specimen of the taxidermic art from the shop of Clarke & Morgan in a peacock, sent to them from Raleigh for mounting. It stands two feet four inches from feet to top of chest, and five feet two inches from tip of bill to end of tail, which is full and perfectly arranged. In the absence of Mr. Clarke, who is in New Orleans with the exhibit of the firm, Mr. Herbert H. Brimley, of the firm of Brimley Brothers, Raleigh, is assisting Clarke & Morgan in the beautiful work they are now putting into market. Mr. Brimley is a good shot and provides the material for Mrs. Morgan's fans, the only part of the firm's work which is distinctively her own. We were glad to hear she received an order the other day from Washington and another from New Orleans for two of her prettiest fans. The peacock left on yesterday morning's train, consigned to Mr. Iredell Johnson, who is the agent of Clarke & Morgan in Raleigh. We understand it belongs to Master F. H. Fowle, son of Judge Fowle.

Fraudulent.

Near a month ago we did some advertising for the "Nunda Publishing Co." of Nunda, N. Y. The advertisements were headed "Books Given Away," "Boys and Girls," and "Free to Farmers." Since then we have run another advertisement, a "\$20.00 Biblical Reward," for "Butledge Publishing Co." of Eleton, Pa. We have good reason for believing both these companies to be frauds of the first water, and warn our readers to that effect.

Stockholders' Meeting.

The stockholders of the Neuse and Trent River Steamboat Company held their annual meeting yesterday at the Board of Trade rooms.

We are glad to learn that notwithstanding the adverse season of both a short crop and low water the company makes a good showing, and one much better than might have been expected.

The general manager and subordinate officers worked with a will to keep up their connections, and by that means the disadvantages were combated with more than ordinary success.

The following gentlemen were elected a Board of Directors for the ensuing year: L. B. Ostler, C. E. Fey, D. M. Roberts, S. G. Roberts, Thos. Daniels, D. N. Kilburn, W. F. Stanley, B. M.

Gates and Lewis Bynum. Dr. Jas. F. Long was re-elected President, T. A. Green Vice-President. Finance committee—B. M. Gates, Geo. Allen and C. H. Blank. The Board of Directors will elect the General Manager to-day.

Personal.

Phil. Holland, jr., returned to Raleigh yesterday.

W. T. Cabo, Esq., of Stonewall, is in the city attending court.

C. R. Thomas, Jr., Esq., of Beaufort, is attending court this week.

Col. Seneca Allen and lady, of western New York, arrived yesterday evening. Col. Allen came to New Berne in December 1883 and was Lieutenant-Colonel of the 85th New York regiment. This is his first trip South since the war, and he finds much pleasure in visiting the old battle fields. Like many other Northern soldiers he wants to bury all sectional strife and have a Union in fact as well as in name. He is from the Grover Cleveland section of New York, is personally acquainted with him, and did all in his power to elect him. May he and his lady have a pleasant time while in the city.

Miss Irene Radcliff is in Kinston visiting friends and relatives.

Physical Training for Girls.

This is the title of an excellent article in the February number of the *Popular Science Monthly*, by Dr. Lucy M. Hall; one which not only every mother, but also every teacher of girls ought to read and ponder. The physical training of boys and young men has for some time occupied public attention, but the needs of the girls are, if possible, more pressing than those of the other sex. Boys will get a certain amount of physical training, for they give it to themselves, but every effort seems to be made to prevent girls from developing into healthy women. Quoting from an eminent French writer, Dr. Hall says: "When you educate a boy you perhaps educate a man, but when you educate a girl you are laying the foundation for the education of a family," and adds, that to this end the physical training is of equal importance with the mental. If he had said of more importance instead of equal, it would have been nearer the truth.

Some one has said that, in order to improve the health of the present generation, it would be necessary to correct the hygiene of our grandmothers. It is to be regretted that we cannot do this, but we can improve the grandmothers of another generation if we begin with the girls of this. Dr. Hall says: "Regulated gymnastic exercise is only one means of physical culture; modes of dress, out-of-door exercise, bathing, sleeping, the plays of young children, all are of equal importance."

"If the little girl is to be reared with a view to perfect physical development, she should be dressed in as substantial clothing as her brother, and all trimmings and accessories necessitating extra care and stimulating a tendency to self-consciousness and the impression of sex should be avoided." If the boy has a bicycle the girl should have a tricycle, and be allowed to make as much noise as a boy; she should not be checked and repressed while he is sent out-of-doors to have his frolic out.

"Above all, should the following of that routine custom in the education of girls, piano practice, be avoided. The piano is the family vampire, which has sucked the vitality of thousands of young girls by keeping them from the healthful recreation and exercise which they so much need. It should be a rule of every educator that no girl should be allowed to take a course of music-lessons while she is pursuing the regular routine of her school work."

This last sentence ought to be written in letters of gold over every school room door. Music, which should be the recreation and delight of the performer, is too often but a moth which frets the health and consumes the time without giving one single good thing in return. Unless there is decided talent for it or it is followed as a means of gaining a livelihood, music, as a general thing, is given up as soon as the girl becomes a woman, and the time spent on it is worse than wasted, for it has sapped just so much of the vitality and nerve-force of the coming woman.

All the advantages of the co-education of boys and girls, as it is at present managed, is in favor of the boys and against the girls; and it is time that the mothers of the land should rise in their might and claim their right to have a word to say in the appointment of the teachers of our graded schools. Every school in which girls and boys are taught together should have a lady principal as well as a gentleman, and her *ipse dixit* should be final in all matters pertaining exclusively to the health and deportment of the girls of the school and of the lady teachers employed in it. Of course the board will say they cannot afford to employ two heads and it won't work well, but it does in a family, and the division of duties would prevent clashing. Let them select a lady principal from the lady teachers, say the one who has had the longest experience as a teacher, and leave off some of the branches she teaches so as to give her time for a general supervision of the health and deportment of the girls in school and out, while on the grounds. No one would more cordially sustain such a move than the lady teachers themselves who often feel a delicacy in reporting to a gentleman matters, which should only be discussed among themselves, which are of vital importance to the health of the girls in their grade.

M. B. C.

STATE NEWS.

Gleaned from our Exchanges.

Wilmington Review: The residents of the eastern section of the city were treated last night to another fusillade of firearms. Its frequency has made the noise monotonous, but not a bit less annoying.

Raleigh Farmer and Mechanic: Measles and scarlet fever have been uncommonly fatal in this region of late. Mr. Frank H. Hodge, son of the late Henderson Hodge, representative from Wake county, and brother of Dr. W. T. Hodge, died of measles last week in Eagle Rock township. Mrs. Dennis Jones also.

Asheville Advance: About the fourth tap of the fire bell Sunday night pulled it out of its sockets and let the bell down on the floor, it is also stated that the bell rope had been cut. We had hoped, and had begun to believe that the Western North Carolina Railroad would have no slides this winter, but yesterday the eastern mail was delayed six or eight hours in getting to this city on account of a slide just above Round Knob.

Raleigh Visitor: A meeting of the ladies of Person Street Methodist Church met at the parsonage yesterday afternoon and organized a Church Aid Society. Twenty-one members were enrolled and the following officers were elected: President, Mrs. W. L. Cunningham; Vice-President, Mrs. M. Griffin; Treasurer, Miss Mollie Bunch; Secretary, Mrs. W. H. Bobbit. The object of the Society are to visit the sick and to build up the interests of the church generally.

Our Work.

The Spring Term of Trinity College opened on Jan. 7th under favorable auspices. There are eighty-seven students enrolled now, excluding the Indian class, and new boys still continue to come. The old people of this place say that it is the best opening Trinity has had in ten years. The new administration gives entire satisfaction to all. Every thing around Trinity seems to have a new appearance, and the vigorous spirit of the new Faculty inspires every one with hope. New furniture has just been received for the preparatory department and recitation rooms, and that department will now be as good as any in the State. Improvements about the college are being made every day.

Prof. Heitman is a good manager. He has a place for every thing, and every thing in its place. Every member of the Faculty is good in his department, and well understands what he is teaching. Trinity will now move on to accomplish the work that was intended for her to do by her illustrious founder. She will succeed now. Parents, you need not hesitate any longer; send on your boys. —J. D. JENKINS in N. C. Educational Journal.

Trinity in the General Assembly.

There is nothing that tells better for an institution of learning than for its graduates to take the lead in the different departments of life. Trinity College has always had her share of the honors, as the positions which her men hold in the General Assembly at Raleigh clearly prove.

E. T. Boykin, Pres. pro tem. of the Senate. R. C. Beckwith, Engrossing Clerk of the Senate. Phil. Holland, Reading Clerk of the Senate. J. M. Brown, Enrolling Clerk of the General Assembly. W. G. Burkhead, Reading Clerk of the House. H. B. Adams, J. A. Barringer, Geo. Bulla, J. R. Henderson, H. E. Norris, L. S. Overman, J. A. Turner, Members of the House.—Etc.

The people of Washington evidently understand that an inauguration only occurs once in four years. A glance at the advertising columns of the daily newspapers indicates that almost everybody who has a room or window on the line of march from the Capitol to the White House is willing to rent it. Out of a score of advertisements the lowest price for single windows is \$10, or two for \$15. The highest prices asked are \$50 per window. The average is from \$20 to \$30. One person near ninth street and the avenue offers to rent 40 seats at \$5 each. The most exorbitant rentals are at the intersection of Fifteenth street and the avenue. Thirty dollars is the very lowest asked for a fourth-story window, the prices increasing from that to \$50, according to location.—N. S. and Tobacco Reporter, N. Y.

SAN FRANCISCO, Feb. 9.—About one hundred Chinamen arrived here to-day from Eureka, Cal. They were driven from that town by the citizens, who became in dignant over the killing of an American by a stray bullet during a riot among the Chinese.

DOVER, N. H., Feb. 9.—George H. Ricker, of Rochester, shipped to-day an old-fashioned arm-chair, manufactured in 1775, to President-elect Cleveland. It proved quite an attraction as it lay on the platform here awaiting the arrival of a train. Mr. Ricker is an old Jacksonian Democrat.

PITTSBURGH, Feb. 9.—The publication of the designs and objects of the Anarchists has occasioned much talk among members of the International Working-men's Association, and they have called a "people's meeting" at Jefferson Hall in Allegheny City to-night, for the purpose, according to the printed circular, of giving the opponents of socialism and anarchism an opportunity of controverting their position.

CLIPPINGS.

Neal Dow is now convinced that the enemy to prohibition comes from the moderate drinkers. Hard drinkers are all anxious for the closing of the grog shop as a relief from temptation.

The canal across the Isthmus of Corinth, which baffled several of the Roman Emperors, and was a favorite scheme of Julius Caesar's, is approaching within a measurable distance of completion.

It is stated that small candles, remarkable for the purity and brilliancy of the light they give, are imported into Europe from China, where they are made from wax supplied by minute insects bred for that purpose, by the poorer class of Chinese.

Every Saturday evening, when a barber shop in Troy is crowded by young mechanics getting their hair cut for Sunday, a priest who is a zealous temperance advocate arrives to get signatures to a pledge of total abstinence. He thinks that he thus saves many a fellow from spending his week's wages in a spree.

Lotteries are sanctioned by the Church and the Government in Mexico. A lottery office is on nearly every block, and there are at every corner men, women and children peddling tickets like newspapers. Many of the hospitals and other charitable institutions are sustained by this sort of gambling, and the only railroad in Mexico that is owned at home was constructed upon the profits of a lottery. The principal institution in the city of Mexico is "The Lottery of Divine Providence," and the dead walls were lately covered with placards announcing that on the anniversary of the appearance of the Holy Virgin to the shepherd at Guadalupe would be celebrated by great religious ceremonies, with cock fights, bull fights, games of chance, and other attractions.

If the transatlantic steamers will slow their trips we shall get no cholera. That is the belief of Dr. Pettenkofer, as set forth in a new German book. The disease cannot make a sea voyage of twenty days. If we could not cross the ocean from Europe in less time cholera would never reach us. There are unfavorable land routes. Cholera never gets over deserts which require more than twenty days for caravans to cross. South America enjoyed exemption from cholera until 1854, when fast-sailing vessels carried it from Philadelphia to Rio Janeiro, and a terrible epidemic was the result. Cholera makes the most remarkable jumps. The soil and its moisture, Dr. Pettenkofer thinks, play a principal part in starting epidemics. Clay soils in relatively dry conditions are most likely to assist outbreaks of cholera. His argument is that the rain-soaked earth has not had air enough for the animal germs to breathe. In heavy clay soils water drives the air completely out.

The Latest News.

SPRINGFIELD, Ill., Feb. 11.—After some roll calls, including a call of the house, on which the Republicans did not vote and fifty-six Democrats did, Mr. Hamilton moved to proceed to elect a United States Senator. Speaker Haines refused to entertain a point of order that no quorum was present, and ordered the clerk to proceed with the roll call, which resulted as follows: Morrison 45, Haines 1, Richard Bishop 1. Mr. Morgan voted for Haines, on the ground that he could not vote for a free-trader. Mr. Haines voted for Bishop. During the roll-call the Republicans left the house. The Democrats voted to invite the senate to a joint session at noon and then took a recess. The senate met with seven Republicans and three Democrats absent. The Republicans broke the quorum, when senator Merrill moved to adjourn till 11:30, which was carried. When the senate re-convened the Democrats tried to have the clerk of the house recognized, but the president ruled that he could recognize no one without a quorum. A few minutes before noon the Democrats arose in a body and marched over to the house. The remaining senators carried a motion to adjourn. When the senators and representatives had assembled, Mr. Haines said as he understood the law it made no difference whether a quorum was present or not. The law was imperative that the vote should be taken. The roll-call was reported, in the senate Morrison 23, in the house Morrison 52 and Haines 1. Haines voted for Morrison. The Democrats applauded when Haines' vote was announced. Haines announced "no quorum and no election," and said that the balloting would be resumed at noon to-morrow. The senators then left.

LONDON, Feb. 11.—General Lord Wolseley telegraphs to the government that the scouts who were sent to Khartoum have returned. They confirm the report of the killing of General Gordon and atrocities committed in Khartoum by the Mahdi's men.

Scrofula.

I have had hereditary scrofula broken out on me for eight years. My mother and one sister died with it, and I, supposing that I would go as other members of the family had, had despaired of life. The treatment of mercury and potash seemed to aggravate instead of curing the disease. In this condition I was pressed to use Swift's Specific. After taking six bottles the fearful ulcers on my neck and arms disappeared and the scars only remain to remind me of my sufferings. Had I taken S. S. S. at first, I would have been a well man long ago.

FRANK GILCHER, Danyille, Ky.
Oct. 18, 1884.

Eczema.

I was affected for nearly four years with eczema. The doctors called it at first eczema. I was treated by physicians. I was cured by Swift's Specific. I used about thirty bottles and have had no trouble with it since. I refused to take it, even after it was recommended to me by others, for some time—such

was my prejudice to the name of it; but having tried it myself, I now believe it is the best blood purifier in all my knowledge. It did another thing for me. I had suffered from piles for many years. Since taking this medicine I have been relieved, and believe it cured me.
R. H. JONES.
Cartersville, Ga., Aug. 25, 1884.

My daughter, seven years old, has been afflicted with eczema for two years, and after trying other remedies in vain I gave her Swift's Specific (S. S. S.), and one and a half bottles cured her sound and well. It is the best blood remedy in the country.

Mrs. M. S. JUDKINS.
