A Boxing Match Turned into Wrest-Hug-Ban, Kelly and Ben, Brinson Have Three Rounds.

Before any excitement could be raised or any crowd collected, Dan. Kelly and Ben. Brinson, after completing their day's work at Cuthbert's machine shop, on Craven street, vesterday, agreed to box a match of three rounds without gloves and without rules. They did not even take the precaution to procure seconds, or to appoint an umpire, but walked out on the street and began the parring.

Kelly is a man lof small build, round shouldered, tough and stringy looking, 5 feet 4 inches high, and weighs about one hundred and twenty nounds. Brinson is of stouter build, strong, erect, 5 feet 10 inches in height, and weighs about one hundred and fifty pounds.

Public School Notice. I desire to give notice to public school eachers that the annual examination of applicants will begin on the first Mon-lay in August, and will continue until day in August, and will continue until the opening of the next school term. Teachers should always arrange with the Superintendent in advance the days which will best suit their convenience. School committees will please take notice of the new law, requiring them to submit to the Superintendent the names of teachers nominated with a view to their confirmation by him, and also a statement of the contracts made with said teachers. The purpose of the law is, to obtain the combined experience of both Superintendent and committees in the selection of teachers. It would be best for the school committee of each district to make up their list, and consult with the Superintendent at the latest by the 20th of November, by which method the best teachers may be obtained. Very Respectfully,

The Army of the Absent.

WASHINGTON, July 19.-Judged by sound business principles, or by the practices of large commercial houses, of corporations, or of other institutions, the number of persons employed in the public service is largely in excess of its needs, allowing a most liberal estimate to every department thereof.

This evil has been constantly growing since the close of the civil war. When

the Democrats had possession of the House of Representatives they curbed this excess to a certain extent, but the Republican Senate always stood in the men in its basket through the river Serway of reform, and only accepted such pentine, whacked them against trees, legislation as they were positively and was finally captured by an excited afraid to resist.

Many reductions have been made in the clerical ferce of the departments since the present Administration came into power. Others' are to follow when pending investigations shall be com pleted. One of the glaring abuses has been in the extent of absentecism, not only by the chief officials, who set a pernicious example, but by the subordinates who were allowed excessive priv

Major S. M. Finger.

This gentleman returned yesterday from Saratoga Springs, where he attended the national teachers' convention. It was a fine affair and valuable to the cause of education. The Blair educational bill was favored. One North Carolina Congressman said he was personally opposed to the measure, but that he should vote for it, as it was his belief that the people of the State wanted it. He added that he believed it would pass. The convention adopted a resolution esting forth the need, desirability and propriety of national aid for squeation. Major Finger says he has visited the normal schools in the castern part of this State and in a day or two will visit those in the west. He has to make a quick trip and see all the schools in a fortinght. He is greatly pleased with the success of the normals and in fact with educational progress is the State in general. He says he sees with pleasure that numbers of counties are lovying special taxes for public schools. Public chools ought to be kept open at least four months in the year, or they will fall short of the proper measure of good. Longer terms will now be the rule.—

Boware of Mercury and Potash.

Moreury is more destructive to human health and life than war, pestilence and famine combined. So said a distinguished writer many years ago, and it is as true today as then. The poor vic-tim of Blood Disease is drugged with Mercury to cure the malady, and then dosed with Iodides to cure him of the Mercurial Poisoning; but instead of any relief, the first breaks down his genera health and makes him a cripple, and the other ruins his digestive organs. Mercury and Potash are dangerous even when administered by directions and under the eye of a good physician, and when put up in nostrums, often by incompetent persons, are apt to produce evil consequences.
