Misn's Arnica Salve. Salve in the world i outhern Bivouac.

We have received the November num ber of the Southern Bivouac. Among is many interesting articles is one giving an exceedingly graphic account of the movements of Lee's army from the time it crossed the Potomac, to the night before the battle of Gettysburg. The writer, Wm. H. Swallow, was formerly Assistant Adjutant General of the army of Northern Virginia. He presents some new facts concerning the orders under which General Stewart was marching, and contends that Lee's original plan was to march directly to Harrisburg, where the army was to be concentrated, and it was with this understanding that Stewart separated from his main army, and moved through Hanover towards Carlisle.

EDITOR JOURNAL:-As you have found a law to partially justify the county treasurer in not being here to attend to school matters, how is he to keep his oath of office and neglect his other duties, as the law requires of the county tressurer?

Our correspondent is mistaken about our finding law to justify the absence of the treasurer. We merely citied what we thought a reasonable excuse. And there are excuses for men's not complying strictly with the letter of their oaths or we are a nation of perjured wretches. How many men in the country have a lawful fence? And yet the grand jury of every Superior Court are solemnly sworn to present every violation of law without fear, favor or affection, without reward or the hope of reward. How many men swear to the truth in listing their taxes? Doesn't "Jog"strain a point sometimes in listing taxes and still have a clear conscience?

Notwithstanding the public feeling expressed at many of the recent State Conventions against Mormonism, the Mormons are still fighting for the privident's Cannon and Taylor, the heads of Carolina railroad enterprises resulted disastronally to himself and it seems that misfortune still follows him. The history of the regular drama in China has been divided into three periods, corresponding respectively with the pieces composed under the Tang dynasty (A. D. 720–995), the Song dy-nasty (960–1199), and the dynasty of the Kin and Youhen (1123-1841). The pieces composed under the last are known by the name of "Youen-Pen" and "Tsa-Ki," and it is from a dramatic anthology, called the Youen-Hu-Pe tchoug, or hundred plays, composed un-der the Youen that the plays at present translated into European languages have been mainly selected. The large number of dramatic authors and plays in China may be estimated from the fact that the Chinese list of dramatic authors under the Youen dynasty contains 81 male dramatists, to whom 448 plays are attributed, in addition to 105 anonymous plays and 11 attributed to courtegans.
