Relict of the Past Rescued.

During the low tide on Saturday last, little boy while walking on the bed of Neuse river near the old still yard of the late Benjamin Ellis, on East Front street, found a valuable relict of the past. It is a clay pipe made with a handsome face as the front and in plain letters on one side, of the portion entered by the stem, "President" on the other side, "Frank Pierce," and was no doubt a campaign pipe in the contest between ing from Lake Landing, has not put in President Pierce and the distinguished soldier, General Winfield Scott.

From these circumstances it is plain that for over a third of a century this silent witness to the zeal of that day come down stern foremost on account has lain silently on the bottom of the river and is at this late day brought to light by a mere accident.

When the pipe was made and probably when lost, the father of the finder was not a voter and remembers the campaign only by the enthusiasm which always animated the boys of that day.

Saturday night was colder still and the thermometer recorded 21 oolder degrees at the Signal Office and 15 in exposed places. Last night was also very cold and the thermometer this morning fell to 22 at the Signal Office and 18 where exposed. High winds have been blowing almost constantly during three days, which greatly aggra-vated the effect of the cold. But little news has been received from the interior. The temperature fell to 15 at Fernandina Sunday, 20 at St. Augustine, and is reported to have fallen to 16 as far south as Tampa on the Gulf coast. The damage done is less than would be expected from such a freeze, oranges remaining on the trees are frozen and lemon trees in Northern Florida are probably killed to the surface of the ground, but beyond losing their leaves it is not believed that orange trees are injured even in the northern part of the State. Cold weather in De cember has prevented the sap raising consequently the damage is less than it would have been. There are no signs yet of the weather moderating.
