A lot of Royster's Fine French Candies JUST RECEIVED at Mrs. STANLEY'S Book Store. 112 St.

FOR SALE.—A large lot of good Hay at railroad depot at \$14.00 per ton. Apply to GEO. ALLEN & Co., where sample bale can be seen, or to
12 St. W. S. WOOLFE.

FOR RENT.—Two comfortable rooms on Pollock street between Middle and Hancock streets. Address P. O. box 468. 10 lw.

A TRAIT.—Fine Country Hams, put up by Onslow and Jones county's best farmers for sale at Humphrey & Howard's. Remember, these gentlemen have an art for selecting the best hams. 12 St.

Chattel mortgages and Lien Bonds for sale at this office.

TRY DALL'S fine Bouquet Butter and Pig Hams. 12 St.

The beautiful weather this week is enabling the truckers to push their work.

The steamer *Trent* arrived from Trenton yesterday with a cargo of cotton and cotton seed.

The steamer *Carolina* arrived from Snow Hill yesterday evening with a good cargo of cotton.

The steamer *Kinston* arrived yesterday evening from Kinston with a good cargo of cotton and quite a number of passengers.

Only two deaths among the whites of New Berne during the months of January, ages 66 and 57. There were eleven deaths among our colored people.

Cotton seems to be on the downward tendency. Some of the holders hereabouts console themselves with the fact that it can't possibly go more than seven or eight cents lower.

Master John Davis, on his bicycle, came near running into, or rather running under, Mr. Redmond's beer wagon at the junction of Craven and South Front streets yesterday.

We are glad to hear that the Englishman, Mr. R. G. Arnold, who arrived some time since, has secured permanent employment with Mr. J. A. Bryan as gardener and hostler.

The Senate has passed a bill appropriating \$200,000 for a public building at Wilmington, while New Berne cannot even so much as get a package of seed. Alas, alas, for the black district.

E. R. Dudley declares in a communication published in another column that he is not a candidate for office. He is an industrious, well-to-do farmer, and sets an example worthy to be followed by others. But few colored men of his intelligence resort to farming for a living; they generally go into politics, preaching or teaching.

Mayor's Court.
Four cases were before the Mayor yesterday; two for disorderly conduct were fined \$1 each and cost. One for allowing horse to run at large was fined \$1 and cost, and one for shooting within city limits, was fined \$1 and cost.

The Superior Court.
Court convened at 9 o'clock yesterday morning.
The jury in the case of Johnson vs. Pate, which was given to them on Wednesday night, a suit to recover lands which defendant held and claimed under a sheriff's deed for taxes, for a number of years, found a verdict in favor of defendant in the sum of \$500 for betterments. Plaintiff moved for a new trial.

The calendar set for Thursday was taken up, and the first case, Moyer vs. A. & N. C. R. Co., consumed the entire day. This is a suit brought by Geret Moyer, who owns a farm on the A. & N. C. R. eight or ten miles below this city, where a culvert crosses it, to recover \$2,000 damages to his farm during the years 1879-'80 and '81, said damages, as he claimed, having been caused by obstructions in the culvert which prevented the water from getting off.

Every inch of ground was contested, Messrs. H. R. Bryan and Simmons & Manly appearing for the defendant corporation and Messrs. M. DeW. Stevenson and H. C. Whitehurst for the plaintiff. A large number of witnesses were examined for both sides.

Mr. Whitehurst opened the argument for the plaintiff, and was followed by Messrs. Bryan and Manly for the defendant corporation and Mr. Stevenson closed for the plaintiff.

The case was given to the jury after night, and up to this writing had not started.

Personal.
Mr. F. S. Koonce of Jones county arrived last night with a lot of fine dressed turkeys. He is stopping at Nelson Whitford's.

Dr. D. H. Abbott of Vandemere is in the city.
T. E. Gillman, Esq., of Jack-sonville is in the city.
W. C. Fields, Esq., of Kinston, is in the city.

Death of General Hancock.
We surrender our editorial page today for an account of the death of General Winfield Scott Hancock. The survivors of Cooke's brigade will call to mind how often they came in contact with his command during the memorable campaign of 1864; especially will they remember the battle of Reams Station, where the General's horse was shot under him, and where Cooke's, McRae's and Lane's brigades made such a brilliant dash, capturing several pieces of artillery and more of Hancock's men than the three brigades numbered. His conduct after the war had closed endeared him to the Southern people in such a manner that his death will be sadly regretted.

The Elm City Leased.
The stockholders of the New Berne and Pamlico Steam Transportation Co. met according to adjournment yesterday evening at the Exchange rooms.

L. H. Cutler, Esq., was called to the chair.
The proxy committee reported twelve stockholders present, representing 502 shares of stock.

The Chair declared a quorum present, and the meeting ready for business.
The committee appointed to receive the steamer *Elm City* from the former lessee, asked further time to report, which was granted.

Mr. J. V. Williams having withdrawn his proposition to lease the *Elm City* at the previous meeting, now renewed it. The committee appointed to examine charter and consult counsel in regard to the power of the stockholders to lease, made a verbal report that it was the opinion of counsel that they had a right to lease.

Mr. J. A. Bryan called for the reading of the proposition, which was in substance that Mr. Williams would lease the boat for one year with the privilege of two, paying therefor \$1800 per annum, payable monthly, and keep the boat in like good order as received.
A spirited decision arose upon the right of the stockholders to lease without requiring a bond from the lessee and having the boat insured. Messrs. Gray, Green, Gates, Bryan, Williams, Watson, Foy and Daniels participated in the discussion during which points of order and parliamentary enquiries were piled upon the presiding officer so thick that he threatened to vacate; but the call for the previous question having been withdrawn the matter was calmly discussed and finally a vote was reached upon the motion to accept Mr. Williams' proposition, and it was carried by a stock vote of 295 to 200.

We learn Mr. Williams contemplates running the *Elm City* to Norfolk and probably to Baltimore. And so endeth our steam connection with Hyde county for the present.

No Candidate for Any Office.
EDITOR JOURNAL:—I noticed in your issue of this morning that under the head of "Local Politics," among others mentioned for office that I am named with others as a candidate for register of deeds. Permit me to say that I am not a candidate for any office, whether "the truck farm pays" or not. I have something else to do besides discuss politics. As to the chairmanship of the executive committee of this county, I shall lose no sleep; that matter will take care of itself, and will be settled at the proper time.
Respectfully yours,
E. R. DUDLEY.
Feb 11, 1886.

Do Not Be Deceived.
In these times of quack medicine advertisements everywhere, it is truly gratifying to find one remedy that is worthy of praise, and which really does as recommended. Electric Bitters we can vouch for as being a true and reliable remedy, and one that will do as recommended. They invariably cure Stomach and Liver Complaints, Diseases of the Kidneys and Urinary Difficulties. We know whereof we speak, and can readily say, give them a trial. Sold at fifty cents a bottle, by all druggists.

The Chinese Trouble.
PORTLAND, February 10.—Everything is quiet both at Seattle and Olympia. The militia are still on duty at Seattle, anxiously awaiting the arrival of the government troops. At Olympia the sheriff's posse is able to keep the peace. Precautions are being taken by the State and municipal authorities at Portland by private citizens to prevent trouble here.

The publisher of the *Beaver Falls, Pa.*, Courier, Mr. John F. Porter, some time ago contracted a severe cold. He says: "I tried half a dozen remedies ineffectually, and upon recommendation of a physician I gave Dr. Bull's Cough Syrup a fair square trial. It relieved me immediately and cured my cold and catarrh entirely. It is a remedy that should be used in every household."

BRIEFS.
The Kentucky Senate has passed a bill prohibiting the sale of pistols and buoys knives.

Cuba has been visited by another spout that contained hailstones as large as partridge eggs, which did much damage to the crops.

The New York Chamber of Commerce has appointed Hon. John Bigelow as representative on a tour of inspection of the Panama Canal.

The Young Men's Christian Association at New Orleans is reported to be in a flourishing condition and has an active membership of 324. The association celebrated its 33rd anniversary last week.

The following is what Virginia has done and what North Carolina can do: "Mr. W. B. Glover, an enterprising farmer of Augusta, Va., has demonstrated what sixty acres of land can be made to yield when intelligently managed. Mr. Glover raised last year 253 bushels of clover seed, which he sold for \$5.25 per bushel or \$1,428. At the same time he made 87 tons of clover hay, which he sold at \$13 a ton, or \$1,131, giving a grand total of \$2,559, all the product of only sixty acres of land. This is a good deal better than going West.

Many have been the messages of condolence sent Mrs. W. S. Hancock in the sad bereavement of the loss of her husband. The death of Gen. Hancock excites regret throughout the country. His military services in both the Mexican and civil war were of a distinguished character. During the most trying periods of the late war he never forgot the principles of humanity and the respect for the rights of non-combatants which other generals won popularity by ignoring. He was known as a hard fighter but at the same time a kind gentleman.

Lieut. Winslow and the North Carolina Oyster Beds—The Stomatopods.
The North Carolina Legislature has this winter employed Lieut. Winslow, U. S. N., who is well known for his surveys of the oyster beds of Tangier sound, to make a survey of the oyster area of the State, in order to ascertain what oyster ground is suitable for the private cultivation of oysters. In a letter to Dr. Wm. K. Brooks, of Johns Hopkins University, he says he has finished his field work for the winter. At the request of the Governor of North Carolina, the trustees of the Johns Hopkins University placed the outfit of the Beaufort marine laboratory at the service of Lieut. Winslow, and his surveys have been made in the steam launch belonging to the laboratory.

THE CHALLENGER STOMATOPODS.
Dr. Wm. K. Brooks, of Johns Hopkins University, has just finished and is correcting the proofs of his report to the British government of the stomatopods collected by the Challenger expedition. The work has occupied much of his time for nearly three years. The sixteen quarto plates which illustrate the report are being prepared by Hoen & Co., of Baltimore, as the proofs which they submitted compared favorably with the plates which had been prepared for a series of reports by the best lithographers of England and Germany. The stomatopods are a group of marine crustacea which are quite widely distributed over the waters of the tropical ocean. One species is found occasionally in the Chesapeake bay, and the reports contain an account of the habits and development of species found at Beaufort, N. C., although chiefly based on the material found by the Challenger expedition, sent out by the British government to investigate the life of the ocean.

During the cruise, which lasted several years, they visited all parts of the Atlantic, Pacific, Indian and Arctic oceans, and made very rich collections of all groups of marine animals. After their return these valuable collections were distributed among naturalists in all parts of the world, who have prepared reports on them, which are now in course of publication in a series of illustrated quarto volumes. Three of the reports are by American naturalists; one by Alex. Agassiz, one, by Theodore Lyman, of Boston, and one by Dr. Brooks, of Baltimore. In consideration of Dr. Brooks' work the British government has presented the John Hopkins University with a full set of all the reports, and the volumes so far published, are all at the University.

TESTIMONY OF BLOOD.
In connection with the mysterious disappearance of P. H. Haviland, the Montgomery county (Md.) farmer, Mr. John L. Frymann writes to *The Sun* from Arcachon, (Gironde,) France, to inquire if blood stains, found near where Mr. Haviland, who is supposed to have been murdered, could not be identified as human blood, and thus narrow down some of the suppositions as to his fate. Dr. William K. Brooks, of the Johns Hopkins University, says: "While the blood corpuscles of the mammalia differ somewhat in size, and occasionally in shape, yet the differences are so slight and the range of variation so great, and the possibility of error in measuring such small objects so considerable, that it is absolutely impossible to state with certainty from microscopic observation that a given specimen is or is not human blood. It might be possible to say that a given specimen was from one of two animals rather than from the other." *Baltimore Sun.*

The douloureux or neuralgia can be instantly relieved and permanently cured by the use of Salvation Oil. Price twenty-five cents a bottle.

Congressional Work.
SENATE.—Feb. 9.—A bill to increase the efficiency of the army was reported favorably from the Committee on Military Affairs by Mr. Logan. Placed on the calendar.

Among the bills introduced was one by Mr. Allison to make full legal money interchangeable at the treasury or at the sub-treasury in New York. Also one by Mr. Beck to provide for the issue of coin certificates.

Mr. Plumb's resolution calling on the Secretary of State for reasons for the depression of prices in cereals and cotton contributed by the United States to foreign countries, was agreed to.

After further routine business, bills providing for the erection of public buildings were passed as follows: Annapolis, Md., \$100,000; Norfolk, Va., \$50,000; Huntsville, Ala., \$100,000; Fort Smith, Ark., \$150,000; Monroe, La., \$100,000; Jacksonville, Fla., \$150,000; Greenville, S. C., \$50,000; Vicksburg, Miss., \$100,000; Fortson, Va., \$150,000.

A bill to appropriate \$35,000 for the purpose of purchasing a site for a public building at San Francisco was discussed at considerable length, and finally at 2 p. m., displaced by the Educational bill.

Mr. Blair took the floor and said that the Educational bill would appropriate for the first year, \$7,000,000; for the second, \$10,000,000; the third, \$15,000,000; fourth, \$13,000,000; fifth, \$11,000,000; sixth, \$9,000,000; seventh, \$7,000,000; and eighth, \$5,000,000. The money was to be divided among the States and Territories in that proportion which the whole number of "persons in each State or Territory, who being over ten years of age and unable to read or write, bears to the whole number of such persons in the United States."

Mr. Blair thought that, as the bill stood, it would meet with favor by the Senate and House of Representatives.

At this point the Senate resumed the consideration of the Public Building bills, and the following were passed: For a building at Newport, Ky., not to exceed \$100,000; also at Wilmington, N. C., \$200,000, and at Augusta, Ga., \$200,000, and for the enlargement of the building at Petersburg, Va., \$50,000.

Mr. Cameron called up the bill to provide for the appointment of an Assistant Secretary of the Navy.

Mr. Logan submitted an amendment which provides for the appointment of an Assistant Secretary of War at a salary of \$4,000 per annum. The amendment then went over.

The Educational bill was made the special order for 2 o'clock tomorrow, and at 5:10 p. m. the Senate adjourned.

HOUSE.—The response of the Secretary of the Treasury to the Bland resolution, respecting the silver balance and circulation, was laid before the House today and referred. The Secretary says he will, with all due diligence, make a full answer to the resolution.

A communication from the Secretary of the Treasury was laid before the House, showing that during the fiscal year ended June 30, 1885, \$45,875,702.75 were applied to the sinking fund.

NEWS BY MAIL.

ARMING AGAINST THE WESTERN UNION.
HARRISBURG, Feb. 8.—Cherick Westbrook, sr., of this city, now in his seventieth year, patented a duplex instrument for receiving and transmitting messages by wire fourteen years ago, and declined all offers to sell it until recently, when manager Phillips, of the United Press Association, opened negotiations with him, and an agreement was reached by which Mr. Phillips secured control of the patent. The invention is said to be a great improvement over the instruments now in use and, it is thought, will put rival companies on a footing to compete advantageously with the Western Union monopoly.

Nine Physicians Outdone.
It is generally considered a pretty difficult task to outdo a physician, but the following will conclusively prove where nine were completely outdone. Mrs. Helen Pharviz, 331 Dayton street, Chicago, Ill., was treated for Consumption by nine physicians, and all pronounced her case incurable. Seven bottles of Dr. King's New Discovery for Consumption completely cured her. Doubting ones, please drop her a postal and convince yourselves. Sold by all druggists.

COMMERCIAL.

JOURNAL OFFICE, Feb. 11. 6 P. M.
