City Council Proceedings. NEW BERNE, N. C., May 4, '86. The regular monthly meeting was held this evening, Mayor Meadows in the chair.

Present, Councilmen Ellis, Hancock, Moore, Fackburn, Miller, Smallwood, Crawford and Styron.

The following reports of officers for the past year were read and adopted: MAYOR'S REPORT.

MAYOR'S OFFICE, MAY 3D, 1886.

To the Hon. Board of City Councilmen. GENTLEMEN :- With this session closes your administration of the municipal affairs of the city of New Berne for the fiscal year ending April 30th. How well you have performed the important and responsible duties devolved upon you, will be submitted by the reports of your officers and committees to an impartial constituency for judgment.

SANITARY.

The health of the city has been notably good and its mortality rate will compare favorably with any city of even higher latitude, and more perfect sewerage system. Your sanitary committee aided by marshal Harget have contributed much to accomplish the good sani tary condition of the city.

BUSINESS AND ENTERPRISES.

The general business of the city has not been exempt from the trade depression prevailing throughout the land, though we have not suffered to the extent of other localities. Many of our industries and enterprises have been fair-ly profitable, and it is hoped that the enterprises of Messrs. Moore & Brady at Union Point and Capt. S H. Gray at Graywood will prove as profitable investments, as they have been beneficial To sale of hand engine ... to our large laboring class.

FINANCE.

The financial policy inaugurated by the finance committee and aided by treasurer Moore and collector Hancock cannot be too highly commended. Under their judicious management the city has incurred no debt on current expenses for the year, and have applied \$4,000, to the extinction of the old debts. It is hoped that your successors may appreciate your financial policy, for if pursued for a few years, will present the an-omaly of a city without a debt. STREETS ANE PUMPS.

The shell streets have proven beneficial in many respects, and in the future may be kept in excellent condition at little expense. New curbing should be laid at an early day as possible on many of the sidewalks, which would save great expense, for the cost of temporary
