Moon rises at 8:39 p.m.

BUSINESS LOCALS.

I will take for a time in the coming vacation a few classes of young ladies and gentlemen in French, Elocution and Geometry, as some have expressed a desire for lessons in said studies. See me for particulars.
Very respectfully,
m182t GEO. W. NEAL.

Just received, by Mrs. S. F. Stanly, a new supply of Royster's Choice Candies. Mrs. Dillingham's superior Ice Creams served daily at her rooms and furnished on reasonable terms for parties or festivals.
ma18 1m

Five bales of cotton were sold at the Exchange yesterday at 8.

Another large crowd of the Medical Fraternity arrived last night.

The trees in front of the city hall have been whitewashed, and their appearance much improved.

The Presbyterian Sunday-school will hold their annual picnic today. The boat will leave the foot of Metcalf street at 9 o'clock this morning.

Mr. T. A. Green made a good shipment of Irish potatoes—between twenty-five and thirty barrels—on Tuesday. We believe this is the first shipment of the season.

The Clarendon German Club gave a ball last night, complimentary to the medical society, at Lowthrop Hall. A very enjoyable entertainment to all who were present.

An invitation from President Bryan of the A. & N. C. R., to the N. C. Medical Society to visit Morehead City was declined on account of a press of business and other previous engagements.

The Medical Society of N. C. is a body of fine looking men. Their business on yesterday was conducted in a dignified, business-like manner. Dr. C. J. O'Hagan is designated as the noblest Roman of them all. We give today as full proceedings of yesterday's session as our space will admit.

We understand that many of our colored citizens are unnecessarily alarmed at a rumor which has gained much circulation among them to the effect that the Medical Society have concluded to use them as subjects for dissection. And many a smile played over the usual gray faces of staid physicians when they would behold some colored individual dodge around the corner, with the cry, "here they come!" upon their approach.

No meteor ever looked more brilliant than the steamer Button as she came dashing down Middle street in response to the taps of the fire department bell at 8 last night; and judging by the many expressions of surprise and admiration emanating from the lips of the members of the North Carolina Medical Society, in whose honor the exhibition was given, they were an exceedingly well pleased body. The ever faithful and punctual Button answered with her usual promptness and considering the fact that from the tap of the bell when the horses were hitched and then a half a mile of streets driven through, the hose unreeled and a stream of water thrown, only four minutes and three-quarters were consumed, we think that the fire department were well entitled to the many congratulations they received. The time was given us by Capt. Alex. Miller.

The Ladies' Lovg.
Dr. Geo. W. Long, of Graham, will deliver the oration before the Medical Society at the court house tonight at 8 o'clock. The ladies, citizens and visitors of New Berne are especially invited to be present.

Personal.
Col. Geo. I. Nowitzky was in the city yesterday on his way from Pamlico. He leaves for Raleigh this morning but will be back next week to deliver that prohibition speech which he has promised. He has a wonderful faculty of knowing how to speak on this interesting question so as to please everybody.

Col. John W. Cotton of the 1st Regiment of State Guards was in the city yesterday and left for Morehead City last night.

BRIEFS.

The nomination of Mrs. Thompson to be postmaster at Louisville, Ky., has been confirmed.

The Senate has confirmed the nomination of Gen. W. S. Rosecrans to be register of the treasury.

Geo. W. Turner was suddenly killed by jumping from a moving train on the Shenandoah Valley road in Virginia.

Lord Tennyson, Robert Browning and Sir Theodore Martin are arranging for a grand banquet in honor of Oliver Wendell Holmes who recently arrived at England.

MEETING OF THE STATE MEDICAL SOCIETY.

A Large Gathering—The Address of Welcome—Proceedings of the Day.

Yesterday morning at 10 o'clock a large number of the Medical Fraternity of North Carolina, from all sections of the State, assembled in the courthouse. The aisles had been neatly carpeted and chairs placed in the vacuum between the temporary rows of benches which have been improvised for court purposes, and in the jury boxes and bar. On the President's desk was a basket containing a huge bouquet of flowers, the fragrance of which spread throughout the room and gave evidence of the thoughtfulness and esteem of our ladies.

The members began to drop in about 9 1/2 o'clock, the Secretary, Dr. Julian M. Baker, of Tarboro, and his assistant, Dr. Isaac M. Taylor, of Chapel Hill, being among the first. At 10 o'clock the President, Dr. Joseph Graham, of Charlotte, Hon. C. C. Clark and Rev. L. W. Crawford were invited to seats on the stand by the local committee of arrangements, when the chairman of the committee, Dr. J. B. Hughes called the Society to order.

Rev. L. W. Crawford, of the M. E. Church South, arose and offered an earnest prayer, invoking the wisdom and guidance of the Great Physician upon the Society in its deliberations.

Dr. J. B. Hughes introduced Hon. C. C. Clark, who delivered the following ADDRESS OF WELCOME:

Mr. President and Gentlemen of the State Medical Society of North Carolina:

It has been made my pleasing duty, through a kind of kindly and friendly prize, to extend to you, in the name of the whole people of Newbern, a most cordial welcome to their generous kindness and unstinted hospitality. We feel honored by your presence, and most humbly invoke Heaven's blessing on our deliberations.

When I recur, Mr. President, to your ancient origin, and trace all along down through the ages, in wars, famine, pestilence, disease, devastations, and death, your heroic and self-sacrificing efforts, constantly and perseveringly put forth, to lift humanity up above humanity's infirmities, I realize a holiness and tenderness of relationship, drawing us nearer and nearer together, which purifies the heart of the least taint of hypocrisy and deceit, and emphasizes, with the profoundest sincerity and truth the earnest greeting: Welcome! thrice welcome! distinguished representatives of the most honorable fraternity, which was born in philanthropy, and baptized in patriotism.

We live, Mr. President, in what is vaingloriously termed an eminently practical age—an expression to which I will, under the inspiration of this interesting occasion, give an accurate and comprehensive interpretation, thus: an age, in which every talent, every energy, every sensibility, every attainment must be so subordinated to the accumulation of wealth, that the muscle which digs up the money may be much more honored than the brain which enlightens and blesses mankind. It is capital that leads society; it is capital that dominates legislation; it is capital that shackles and controls the intellect; it is capital that deadens moral sensibility; it is capital that stifles religious truth; it is capital that makes the politician a scamp; it is capital that debases the statesman into the demagogue; it is capital that off circumscribes the influence of the pulpit, detracts from its mighty power, and obscures its holy prerogative; it is capital that is prostituting the profession of law, until its fastidiousness is the trickiest of trades; generating into the trickiest of trades; it is capital that is everywhere, seeking to put its yoke on the necks of the people, that all may be forced to bow, in abject submission, to the golden calf, and acknowledge money to be the only true god.

Humbled and appalled, Mr. President, by these startling developments of this closing era of the 19th century, with all its boasted paraphernalia of science and learning, how refreshing it is to refer to your great founder and his noble conduct, when, with his big heart beating with the loftiest aspirations, and fully responsive to the needs of the people and the claims of patriotism, he disseminated, without price, his constantly increasing knowledge of the curative art, and sanctified his whole life by an unreserved dedication of his powers and his service to the honor and glory of his own beloved native land. He lived a century, less one year, having had his sublime integrity and benevolence rewarded by a kind Providence, with a long life, that might fully illustrate the aims and purposes of his noble profession, and exemplify, "as its Homer," the true poetry of human life and human effort. When dead he was crowned "Divine and Great," as the benefactor of his race, and a splendid specimen of lofty, genuine manhood, mitigating human woes, alleviating human distresses, and fulfilling human destiny.

And today, Mr. President, after the lapse of more than two thousand years, with their tremendous record of revolutions, moral, social, political, and intellectual; of numberless overturnings and numberless upbuildings, of darkest crimes and brightest virtues; I eagerly seize the opportunity to felicitate you that you have been, and are still, loyal to the genius of a great, beneficent and illustrious example.

Dams Nature herself, for obvious reasons, Mr. President, incited the expression of the poetical sentiment, "that the incidental beauties which the meridian sun exhibits are much fewer than those of the rising sun." But yet, Mr. President, when the day-ding "rides high at noon," and his rays fall perpendicularly on the grateful earth, shades and shadows disappear, and light beams everywhere, blessing everything. So, Mr. President, the sun of your profession, from increasing attainment, advancing knowledge, just and benignant legislation, the cultivation of a proper esprit de corps, the wise, judicious, consecrated work of associated effort, has been rising higher and higher, under the brilliant impulse of its earliest morn, until it seems now to be almost reaching its meridian splendor, with the shade of darkness almost gone, and the glorious light shedding its healing effects, in the fullest fruition, in almost every nook and corner, where humanity can suffer and humanity may be blessed.

And still full, Mr. President, of the same philanthropic sensibility; still inspired with the same patriotic devotion; still ardent, persistent, and unselfish in the pursuit of knowledge; still the patient explorers of the abstruse fields of science; still the unfeigned, wise, and intelligent lovers of humanity; you have, by your gentlemanly deportment, your chaste and courteous relations, your disinterested service, your suavity and urbaneness of manners, your mildness and gentleness of speech, your benevolent visitations, your dexterous skill in protecting health, in conquering pain, and in snatching life from the jaws of the grim monster, rendered yourselves and your profession worthy of all honor and emulation, and I would that all stood on the same immutable foundation of truth, dignity, and manhood.

This, Mr. President, is no fulsome eulogy. You deserve it every whit. And when I cast my eyes back to the ancient renown of this historic city, to the brilliant orations of its still more brilliant geniuses, its heroes, its statesmen, its orators, its philanthropists, its godlike women, who are in deed and in truth, the source of all true greatness and remember that we are, today, the sons and daughters of such a noble ancestry, I feel under the influence of the kindling emotion, that I but voice the unanimous sentiment of those I represent, when in grateful appreciation of the truths I have uttered, I again, on their behalf, extend to you the welcome of the heart to the domesticity of our firesides, the hospitable provisions of our homes, and bid you, God speed, in the prosecution of your noble work.

Caryle, Mr. President, who was peculiar in his originality and quiet in his greatness, has said: "The latest Gospel in the world is: Know thy work, and do it." How replete with wisdom, how abundant in philosophy!

You, Mr. President and gentlemen of the Society, are about to engage in your work; and while I would not essay, ignorant as I am of the rational processes of your technical action, and the maxims and scientific appliances which conduct you to wholesome conclusions, to obtrude myself into the domain of your research, or even venture to proffer one word of counsel: yet will you pardon me for making just one modest suggestion, seemingly wise and so very appropriate to every stage of your professional labor? You are, doubtless, thoroughly conversant with the broad field of your work, and its urgent demands on your benevolence, patience, wisdom and learning; yet, Mr. President, when clouds obscure your pathway, when intricacies puzzle your intellect, when novelty would fold up the wings of your aspiring genius, remember this, that as the very embodiment of eloquence ascribed the success of the heaven-born art to action! action! action! so with you; all progress and every victorious achievement must depend on action! action! action! for pursuant to the divine economy, and, in accordance with the limited attributes of the human intellect, "Doubt of whatever kind is ended by action, and action alone." Not to solve the doubt is to wrap the black mantle of ignorance around you, and ignobly submit to the tyranny of your deadliest foe. Doubt, Mr. President, must always be the manacled captive that sheds the greatest lustre on your triumphant brain.

One word more, Mr. President, by your kind indulgence, and I have done. No polished historians facile pen may ever record your grandest deeds of patience, courage, skill and benevolence; no monument of brass or stone may ever rear its lowering column to perpetuate the memory of your most exalted virtues. No painter's brush with beauty's aid may ever delineate, on the speaking canvases, the noblest acts of moral heroism which may bedeck your lives. All these may be the flattering heritage of poets, orators, statesmen, military chieftains, whose deeds, born of the earth, receive from the earth their glittering rewards. Yet, Mr. President and gentlemen of the Society, as you wearily trudge along day by day, and night after night, strewn here and there and everywhere your flowers of consolation, which bloom as well beneath cold winter's stars, as in the genial summer's sun, I conjure you to recall, in your sublime renunciation of this world's bright but fading honors, the most exquisite lines which were ever embellished by the divinest touches of the poets most royal fancy—

"Full many a gem of purest ray serene,
The dark, unfathomed caves of ocean bear;
Full many a flower is born to blush unseen,
And waste its sweetness on the desert air."

And then remember, Mr. President, that this is true only here, not so yonder, "just over the river" where the Great Physician d. vells, to whose healing tenderness and love I finally commend you.
God bless you, Mr. President, one and all, and fully develop the plenary capabilities of your profession for alleviating the woes and distress of fallen man.

The President responded in a neat and appropriate extemporaneous speech, in which he spoke feelingly of

Gaston, Hawks, Spaight and others—representatives of the bench, bar, church and the medical profession of New Berne, and extended an invitation to our citizens to attend the deliberations of the Society.

Dr. J. B. Hughes announced the following program for the Society:—Wednesday evening, 9 o'clock, ball at Lowthrop Hall by Clarendon German Club, Thursday evening, oration at courthouse by Dr. Geo. W. Long, of Graham, at which the public are invited, afterwards banquet at Gaston House; Friday morning, excursion on the steamer Shenandoah by Cotton and Grain Exchange and Board of Trade.

Dr. Satchwell moved that the thanks of the Society be tendered Hon. C. C. Clark for the address of welcome. Carried unanimously.

The Secretary proceeded to call the roll and a large number of members answered.

When the name of Dr. James McKee, of Raleigh, was called, Dr. R. H. Lewis made a statement as to the cause of his absence.

During the call, Dr. C. J. O'Hagan entered the hall and his presence produced a hearty, spontaneous applause from the Society.

When the name of Dr. T. F. Wood was called, Dr. Geo. G. Thomas, of Wilmington, arose and announced the illness of Dr. Wood as the cause of his non-attendance.

Dr. L. J. Picot moved that a message of sympathy be sent by telegraph to Dr. Wood. Carried, the President appointed Drs. L. J. Picot, C. J. O'Hagan and Geo. G. Thomas to prepare and send the telegram.

The President appointed the following committees: On finance, Drs. T. D. Haigh, S. W. Stevenson and E. H. Hornaday. On credentials, Drs. Charles Duffy, A. G. Carr and G. G. Smith.

Dr. S. D. Booth called up the following resolutions introduced by him at the last annual meeting:

Resolved, That all regular meetings of the Medical Association of North Carolina be held in the city of Raleigh.

Resolved, That a tax of \$1 per capita be levied upon the members of this Society, which shall be collected each year in addition to the regular dues, and the amount so raised shall be set apart as a sinking fund.

Resolved, That the said fund shall be put into the hands of a committee which shall be selected for that purpose, and this committee shall so invest or lend the money so raised as will continually draw a good interest.

Resolved, That when a sufficient sum shall have been raised, that this Association direct such a building to be erected in the city of Raleigh as will be a suitable depository for interesting and useful articles pertaining to medicine and surgery, and that the museum and library shall always be under the immediate direction of the officers of the Medical Association.

Dr. Picot moved to strike out the first resolution.

Dr. Carr moved to amend by striking out Raleigh and inserting Durham. Not accepted.

Dr. Booth urged the adoption of the resolutions and gave his reasons therefor.

Dr. O'Hagan said the resolutions were complex, embracing two propositions which had been discussed for twenty years. He opposed the proposition to localize the society as he felt sure such a step would kill it stone dead. He did not object, however, to the erection of the museum and library.

Dr. Picot moved to strike out Raleigh and insert to be held at any place which the society may agree upon.

Dr. Summerell thought the whole project impracticable. He did not see of what use a museum and library would be unless the society be localized and meet at the place where these buildings would be erected.

Dr. A. B. Pierce moved to lay the whole matter on the table. Carried.

Drs. F. M. Rountree, H. G. Bahnsen and J. J. Summerell were appointed committee to select essayist.

Dr. Haigh moved that the President's address be heard. Carried.

Vice President, Dr. L. J. Picot, was called to the chair and the President proceeded to read his address, which was received with earnest attention by the Society. He urged the importance of maintaining and strengthening their organization by organizing county societies and recommended that a committee be appointed to examine the charter and constitution of the Society and see what alterations can be made to promote its interest. He also made some practical suggestions as to how to make the sessions of the Society profitable. A reference to the work done by the editor of the N. C. Medical Journal was roundly applauded. The address showed that during the year there had been 154 applicants for license, 16 practice medicine, 119 of whom passed satisfactory examinations, 4 were granted temporary licenses and 31 were rejected, and withdrew.

At the conclusion of the address Dr.

Ennett moved that the thanks of the Society be tendered the President for his able address and a committee be appointed to take into consideration the recommendations therein made.

Dr. R. H. Lewis called the attention of the President to the fact that he was mistaken as to the resolution offered by him at the last annual meeting in regard to the nominating committee. The resolution was not a law and could not be acted upon until the present meeting, and he had offered it, not that he was in favor of changing the manner of appointing the committee but to give others, who had complained, an opportunity of altering it if they so desired.

Upon examination it was found that the resolution had been declared adopted by the last meeting and was a part of the constitution. A long discussion followed which was participated in by Drs. Lewis, G. W. Long, O'Hagan, Young, Pierce, Ennett, Summerell, W. J. Jones, Haywood and others. It appeared that the resolution had become a part of the constitution through an error, which the President decided could be corrected. A motion to correct was carried.

This action placed the resolution in condition to be acted on at this meeting. Dr. Lewis asked permission to withdraw but objection was made.

The President announced that the President of the A. & N. C. R. had tendered a train for an excursion to Morehead City to the Society during their meeting. The matter was referred to a committee composed of Drs. Robards, Pool and Satchwell.

Dr. Chas. Duffy, chairman of committee on credentials, submitted a partial report which was withdrawn before action was taken.

Adjourned to 4 p. m.

AFTERNOON SESSION.
Society called to order by the President.

Under the head of unfinished business the resolution of Dr. R. H. Lewis concerning the nominating committee came up, and after some discussion was, on motion of Dr. C. J. O'Hagan, laid on the table.

Dr. Roberts, chairman of committee on invitation to visit Morehead City, submitted a report accepting the invitation and appointing 2 o'clock, p. m., Thursday, as the time for leaving New Berne. After discussion Dr. Lewis offered a substitute for the report of the committee, returning thanks for the invitation but declining to accept it on account of business and having previously accepted other invitations.

The President called for the report of the committee on the establishment of a medical department at the University. Dr. W. R. Wood asked further time, and stated that one of the committee, Dr. T. F. Wood, was unable to attend and asked that some one be appointed in his place.

On motion of Dr. Carr, Dr. W. T. Ennett was appointed to fill the place of Dr. Wood on the committee.

Dr. Satchwell offered a paper on the Germ Theory, which was referred to the publication committee.

Dr. W. T. Cheatham, of Henderson, read an interesting paper on Opium Poison, Artificial Respiration, etc., which was referred to the committee on publication.

Dr. Geo. G. Thomas asked the opinion of the Society on questions bearing upon the code of ethics, which were discussed by Drs. Lewis, Geo. W. Graham, Booth, O'Hagan, Pierce, Hayes and others.

The report of the board of censors was adopted.

Dr. Chas. Duffy submitted the report of committee on credentials, which was adopted.

The report of the committee on medical jurisprudence was called for and was read by the chairman, Dr. J. D. Roberts.

Adjourned to 9 o'clock this morning.

The peach crop in Maryland and Delaware is going to be poor. Experts say the yield will not be more than half what it was last year.

Becklen's Arnica Salve.

THE BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures piles.
