HOUSE-June 19 .- The Speaker laid before the House a message from the President subouncing his approval of the Shipping bill, but pointing out a defect which he discovers to exist in the measure. The message is as follows: "To the House of Representatives;— Upon examination of the bill originating in the House of Representatives, Number 4,838, entitled 'An act to abolish certain fees for official services to Amer-ican vessels, and to amend the laws relating to shipping commissioners, seamen and owners of vessels, and for other purposes. I find that there is such a failure to adjust the existing laws to the new departure proposed by the bill the new departure proposed by the bill as to greatly endanger the public service if this bill should not be amended or at once supplemented by additional legislation. The fees which are at present collected for vessels for services performed by the Bureau of Inspection. and which make up the fund from which certain expenses appurtenant to that Bureau were paid, are by the pro-posed act abolished, but an provision has been substituted directing that such expenses shall be paid from the public treasury or any other source. The ob-jects of the bill are in the main so use-ful and important that I have emplaided to approve the same, upon assurance of those actively promoting its passage that another bill shall at once be intro-duced to cover the defect above refer-red to.

The necessity of such supplemental legislation is so obvious, that I hope it will receive the immediate sesses of Congress.
