Often neglect and delay in giving proper attention to their children who have become unhealthy. Place your sickly children upon the use of B. H. H. as a tonic and general regulator; give it to your weak and feeble children; prescribe it to your husband and sons as a general tonic and appetizer before breakfast, and they will never have any need for whisky butters.

That the English government is one of the shrewdest of the globe there is no mistake. In every issue of the New York Ledger can be found short and pointed articles that not only interest, but are of real worth and value.

What we cannot refrain from copying a portion of an editorial in the issue of September 4th headed "The Value of Character," which runs thusly: "With regard to mercantile affairs, character is well said to be of equal with capital, for it is not less efficient as a means of advancing interests. Where capital does not at all exist, character will do much. After capital has done its utmost, character may be called upon to do something more. Supporting capital gone, and the character remains, no insurmountable obstacle can be considered bankrupt. Character will help to reconstruct the most broken fortune. The very consciousness of having a fair character lends a spirit and energy to those who have little else to depend upon; and with this precious capital comes the world's man will gain through the world."
