

Anti-Baker

Has Goods that everybody wants. We are offering them at prices that all can well afford to pay. We don't pretend to give a list of all our attractions; if we did we should have to pay for extra advertising; but here is a condensed and sufficiently representative bill, which we commend to your attention.

Dress Goods.

A nice Cashmere, part wool, for 10c. per yard, in nice shades, worth 20c. of any man's money. Fine Debaise and other dress goods at remarkably low prices; all we ask is an inspection. Then in Fine Goods we have all wool Cabul Serges, 40 inches wide, Camel's Hair Serges, French Plain Cashmere, Striped French Silk and Worsted Hair Mixed Cloth.

Wraps for Ladies and Misses,

Walking Jackets, Jersey Jackets and Dolmans, made of boucle cloth and other fabrics, are cheap.

Our Hosiery Stock

Is complete and very low. We realize that times are hard, have bought our stock at bottom prices, and sell them very close.

We have among the thousand things too numerous to mention a full line of Corsets, Gloves, Ladies' and Children's Vests, Handkerchiefs, Buttons, Gimps, Fringes, Etc., Etc., Etc.

We are the only parties that sell the Celebrated Diamond Shirt, Collars and Cuffs.

To our friends in the country and city we would say we are very anxious to have your trade. We are headquarters in this city for styles, and we sell good goods at hard time prices. If you want Fine or Common Goods we have them.

Then to that class of our friends, the Wholesale Buyers, we would say we wish you all the success possible, and will sell you goods very, very cheap, but unless you can pay the cash spot down we cannot sell you, as we have marked our goods too close to sell them on time.

We respectfully request a call from all, and if we don't sell you it won't be because our goods are not cheap.

Don't Forget

Improving Cotton Land.

Please tell me how best to improve my cotton land. I manured the present crop with 200 pounds acid phosphate, 100 pounds kaint, fifteen bushels cotton seed and fifteen bushels stable manure to the acre, mixed by Farman's formula and allowed to stand eight weeks in heaps. In February I turned under the stalks and with them a fair manuring of swamp mud, woods mould, lime and fresh salt, and on this bed put the acid phosphate, etc., just before planting. How much acid phosphate should I put to the acre next year, and what other manure with it? Land is level and easily drained with good clay subsoil. Has been cultivated in cotton past five or six years with but little manure. Past season has been unfavorable, will make about 250 lbs. lint per acre. Will thank you for any suggestion in cultivating and manuring cotton and corn on such land.—F. W., Eden-ton, N. C.

ANSWER.—You could not do better than to repeat for several years that you did the present year, applying the same kinds and same quantities of manures. It would be better to rotate crops; instead of planting cotton continuously, you might follow with corn, follow corn with oats, and oats with cotton. Manure cotton and corn as above; the oats might go unmanured, but would be better with manure. One hundred pounds each of acid phosphate and cotton seed meal per acre will help the oat crop decidedly. Sow rye in cotton field in August or September, and turn under in spring when getting ready for corn. Never leave land bare through the winter. —Southern Cultivator.

WHAT IT WAS FOR A school examination a clergyman was descending on the necessity of growing in loyal and useful citizens. In order to give emphasis to his remarks he pointed to a large flag hanging on one side of the school room, and said: "Boys, what is that flag for?" An urchin, who understood the condition of the room better than the speaker's rhetoric, exclaimed: "To hide the dirt, sir!"
