Public Schools of Craven.

From the report of Superintendent Long we glean the following facts in regard to the public schools of Craven county for the year ending Dec. S1st,

There were 59 schools taught in the county during the year, \$2 whites and 27 colored. The average length of the white school term was 7 weeks, colored 10 weeks. The average salary paid to white teachers was \$25 per month, to males, 875 females; colored 3475, 1650 ket. males, 1825 females. There are 2891 white children in the county between the ages of six and twenty-one, 1280 males, 1161 females; there are 4095 colored children between the ages of six and twenty-one, 2011 males, 2084 females. The value of school property for whites is \$12,545, for colored \$6,390 The superintendent granted certificates during the year to 61 teachers, 18 whites and 48 colored. First grade certificates were granted to 2 white males and 13 females, second grade to 2 females and third grade to 1 male. First grade certificates were granted to 12 colored males and 6 females; second grade to 10 males and 15 females. The average attendance at school of the total number of white children in the county was about 60 per cent, of colored a little during the year, 39 white and 32 colover 70 per cent.

One item in this report deserves special notice, and that is the length of the school terms. It will be seen that the average white school term was seven weeks, while the colored was ten weeks. The superintendent informs us that the colored term was a fraction over ten. The last General Assembly amended the school law so as to authorize the board of education to reserve in the apportioning of the school funds one third for the purpose of equalizing the white children there was an averthe schools. The board of Lenoir county did this, and we see in a report of their work, to be found elsewhere in this issue, that the school terms for each race were of equal length, 15 weeks each. The board of Craven county did not reserve the one-third and the result is the colored school term was nearly one month longer than the whites. The wisdom, justice and fairness of the law giving this power to the board of educa- and 4 females second grade and 2 males tion, is shown in its practical workings and 5 females received third grades.

The report also shows the value of in Lenoir county, where the school The candidates on the Hahn Republi- in Lenoir county, where the school school property to be, for whites can ticket in the late election have be- facilities were equalized. We call special attention to this point in the report because the board of eduestion on Monday did reserve the onethird this year and on account of this action we learn that certain Republicans are singing it in the ears of the colored teachers who voted with the Democrats in the recent election, that the Democrats had stolen several hundred dollars of their money. Of course these chronic office seekers will say or do anything to excite the prejudices of the colored people in order to keep them in the Republican party and to keep themselves in office. But the fair-minded and intelligent among them will fay by Representative I. B. One of the evidences of "hard times is the frequent magistrates courts in civil matters. Many have failed to meet the mortgage and the closing out process has been put in motion. The scarcity of the wherewith to settle renders these courts rather unprofitable to the lawyers.

The county board of education was in session last Monday. Mr. D. C. Mur-chison, of La Grange, qualified as a member of the board. The school fund reported on hand amounted to \$6.185.99 of which \$4,012.85 was apportioned to the schools, reserving the one-third fund for the equalization of the schools. The superintendent's report shows that seventy-one schools have been taught ored, the average term being fifteen weeks each. The number of children enrolled: whites, 1209 males, 1096 females; average attendance, 1795; colored, 925 males, 980 females average attendance, 1290. The average salary paid white teachers was \$38.00 per month, male and female: colored teachers, \$22.00 per month to males, \$20.000 per month to females. The total number of white children in the county between the ages of six and twenty-one, 2882; 1512 males, 1870 fe-males. Tetal number of colored chil-dren, 1855; 925 males, 980 females. Of age attendance at school of a fraction over sixty per cent.; of the colored children there was an average attendance of about 70 per

cent. Certificates were granted to sixty-nine teachers during the year, 88 whites and 31 colored. Of the white teachers 7 males and 17 females received in a box and sells them to a train bo first grade certificates; 8 males and 5 females received second grade 1 male received a third grade certificate. the colored teachers 6 males and 2 females received first grade, 12 males The cost the amount of work done. The super intendent is a live, energetic, thoroughly competent man, and is infusing an interest in the public schools that is marked throughout the county. The steady increase in the average attendance shows this. The gentlemen composing the board of education are also men of education and intelligence, and are managing the school affairs with economy and with justice and fairness
