"Of all the sad words of tongue or pen Are those sad words, 'it might have been.

We see in one of our exchanges that a hen was slain somewhere in this State, which contained 825 eggs in different stages and sizes, from a No. S shot to a full sized egg. Now the sadness of this affair is brought to mind very clearly by a mathematical friend who figures thusly: These 825 eggs, duly matured and hatched, would have yielded a like number of chicks; now if these chickens had all been of the egglaying sex and had each laid their 825 eggs, there would have been 680,625 eggs as the product. Then if that number had proved as successful as the others, what "might have been" the price of eggs.

The dinner was a sumptious repost and in superabundance, if a picnis can ever have that indescribable quantity. Every one had a plenty and there was a plenty left. Who make their purchases of goods is simple problem as to where they can get the most value for the least money will never regret the time spent in looking over the new Spring Stock of Goods just received at A. M. Baker's. Of course he was much surprised to hear came from his large new stock of good goods, to be sold for such a small amount of money. Bending closely over the pile his ears were greeted by the last words of the song "How can I leave thee?" There may be a little fiction in this statement, but the plain fact remains that A. M. Baker is selling piles of
