Let Mr. Williams Go Ou.

EDITOR JOURNAL:- The danger apprehended that the whitewashing of the trees will kill them, will not hold good. It has been customary for many, many years to have it done and no injurious effects have ever been seen from it.

Let Mr. Williams go on and get the streets cleaned; let him put a stop to the throwing of waste refuse, &c., into streets; let every old barrel, box. chicken, coop, and, everything, which is so unpleasant not only to the eye, but to the smell be removed. Let the mer-chants and hucksters display their goods and merchandise as much as they place within the space allowed next to their buildings, but require the balance of the side walk and guttern to be kept free. If Mr. Williams will persist in this he will receive a hearty commendation from the citizens.
