**Thinking and Doing.**  
Nothing will so effectually solve doubts, relieve suspense and remove uncertainty, as a habit of promptly performing the nearest duty. Much of the hesitation and perplexity which hinder advancement and confuse men's lives comes from simply thinking, when they ought to be doing. Thought and action should never be separated. If action is often fast and ill-judged for want of thought, thought is often vague and abortive for want of action. Men pause and speculate about what may or may not happen, they wonder what they ought to do or can do in certain contingencies, and no light reveals the one or the other; on the contrary, they become more and more doubtful and perplexed. Mean while, the first steps are still untaken that would have led to others. They have been standing at the foot of the ladder, looking perhaps, eagerly to the top, and marveling how to reach so high a point; while the lowest rounds, so close to their feet and so easy to ascend, have been quite neglected. The nearest duty, when performed, sheds a light, revealing the next, and chasing away the shadows of doubt and uncertainty which have hindered onward progress.

Nothing is more amiable than true modesty, and nothing more contemptible than that which is false; the one guards virtue, the other betrays it. True modesty is ashamed to do anything that is repugnant to right reason; false modesty is ashamed to do anything that is opposite to the humor of those with whom the party converses. True modesty avoids everything that is criminal; false modesty everything that is unfashionable; the latter is only a general, undetermined instinct—the former is that instinct limited and circumscribed by the rules of prudence.
