compared with the cost of former, even coembdays, it is amazing how the prices of tandard books are now reduced. This is especially true of the works of Charles Dickens, and the most maryelously cheap edition of his works ever published is unquestionably the "Bos" edition, now issued by John B. Alden, the "Literary Eevolution publisher, New York, Chicago, and elia where. It is printed in good, clear, large most anonparell type (from the same plate as Appleton's Popular Library Edition price per set \$10.00), double-column page strait quarto form, saay for the eye, convicient to handle, and is handsomely hour in cioth, in eight volumes as follows:

DAVID GRAHAM ADER

When Robertson, the dramatist, after when Robertson, the dramatist, after many hard struggles, saw fame and for-tune within his grasp, he said to a friend: "I have now got everything I want. From a group of illustrated ar-

ticles in The Century for October on educational topics we quote the following: "The absence of any proper and adequate professional training in the past-of over three hundred and twenty-five thousand teachers in the United States, but a small proportion are graduates even of normal schools-has made itself felt not only in the schools of the United States, but in those of Europe as well. The work of the

school population has not even been properly instructed, much less educated. It is not meant by this that the common school, the world over, has accomplished nothing; for the The Misses Nash and Miss Kollock history of Scotland since Knox, of will open the Sixty-first Term of their the United States under the Constitution, of Prussia since Jena, and of France under the Republic, tells a far different story. But popular education has not accomplished all the results hoped for, simply because popular education does not as yet exist. The framework, constitutional and administrative, is generally provided, but the proper supply of the necessary agents, thoroughly trained and equipped teachers, is not yet forthcoming. Reasons may doubtless be given why this is so. The teacher's salary is small and his tenure of

office is insecure. These obstacles are not easily removed. In the United States the absence of any national system of education makes their removal a matter of extreme difficulty and one involving great loss of time. Public opinionwhich, as our latest and kindest critic, Mr. Bryce, says, is not made, but grows in America—must stimu-late State, municipal, and district authorities in turn before any appreciable results can be secured. The process is a laborious and uncertain one, for the name of these authorities is legion. Because these obstacles are not removed, the profession of teaching involves sacrifice which the lawyer, the

physician, or the man of business is not called upon to make. "Another consideration, and a very important one, deserves notice. The fact that the universities have very generally neglected to provide instruction in the science of education has had a powerful influence in Any subscriber to the DAILY of WEERLY JOURNAL, who has paid one year in advance, will be entitled to 10 per cent. discount on a set of CHAS, DICKENS WORKS. For the money, this is the best edition on the man the money, this is the best edition on the man recent days, it is amazing how the prices of standard books are now reduced. This is suppossibly true of the works of Charles Dickens, and the most marvelously cheap editing to repair it come too late to ing to repair it come too late to prevent serious loss to the cause of popular education. At least nine German universities, two Scotch universities, and six of our own institutions of first rank have recognized the claim of the science of APOSITIVE for LOST or FAILING WANTED COURSE Weakness of Bodyana Eind: E education to a place in their calen-dars.
