SHALL NEW BERNE PROGRESS! Jarore Drawn.

The following is a list of jurore drawn

Today the friends of progress are called upon to do their duty. There can be little more, than has already been said, to induce our people to vote for the subscription. There is but one point on this last day to which we desire to call attention, and it may possibly influence some undetermed reader, and put him in line with the

friends of the pending measure. There is no more regretful phase of our present and immediate past condition, than the self expatriation of so many of our very best young men and women, who with their capital and brain, see other fields for the investment of both; the loss of every intelligent person to a community is a serious one, and the lamentable inference has had to be, but too frequently drawn, that New Berne was a good place to emmigrate from, and why? because there is not a sufficient field for our surplus labor, especially that class that add strength and character to communities; the young Bryans, Hughes, Mitchells, Hutchinsons and others, illustrates the point we make and but emphasizes the crying need for some action that will open up avenues for all classes of our people in which to obtain a respectable and remunerative

Now what is there in sight to remedy existing conditions? Who has a proposal to offer that is better or more feasible than inducing this railroad to come here? and in the absence of any other or better proposition is it not folly to oppose or stand aloof from this?

As we have heretofore demonstrated that individual capital will not combine to pry us out of the slough of business despond, it. is clearly the duty of the people to raise money in their corporate capacity and by a strong, earnest effort today, determine to put the old town on the road to prosperity. A day like this comes only once in the ized road, Tuesday evening, Mr. H. B. lifetime of an individual or community, Duffy was thrown from his buggy and and this is "the tide which taken at the

There will be a new sun in our heavens that will illumine our whole land. Under its benignant rays verdure. The arm of the mechanic will become strong as steel under the beneficent influence of profitable labor. The heart of the husbandman will rejoice in the prospect of fields ripening for a broader and ever expanding commerce, and our merchants will find in distant communities ready purchasers

of their wares and merchandise. The whirl of progress will be un locked, and every home feel the inepiration of an era of universal prosperity. As in a great decisive battle every man must do his duty. So every Shipping News. New Bernean must go to the front achievement. Now is the day, and ber and shingles. now is the rise. Rise fellow men or be forever fallen !

We owe it to our fathers to improve the heritage they left us, we owe it to ourselves and our children to utilize the present and span the future with the bow of promise.
