"Newspapers have done much to abbreviate expression, and so to improve style. They are to occupy during your generation a large share of attention." (This was said nearly a quarter of a century ago. It was as if he saw shead the blanket editions.) "And the most studious and engaged man can neg-lect them only at his cost. But have little to do with them. Learn how to get their best, too, without their getting yours. Do not read them when the mind is creative. And do not read them thoroughly, column by column. Remember ÷ they are made for everybody, and don't try to get what is n't meant for you. The miscellany, for instance, should not receive your attention. There is a great secret in knowing what to keep out of the mind as well as what to put in. And even if you find yourself interested in the selections, you cannot use them, because the original source is not of reference. The usual treatment of catarrh is very unsatisfactory, as thousands of despairing patients can testify. A trustworthy medical writer says: "Proper local treatment is positively necessary to success, but most of the remedies in general use by physicians afford but temporary benefit. A cure cannot be expected from snuffs, pow ders, douches and washes."
