

THE GREATEST DISCOVERY OF THE AGE!

ALL DISEASES CURED BY MICROBES!

—AND—

RADAM'S MICROBE KILLER

Positively Kills All Microbes in the Human System!

POSITIVELY CURES

Asthma,
Bronchitis,
Consumption,
Cancer,
Catarrh,
Leprosy,
Chills and Fever,

POSITIVELY CURES

Diphtheria,
Dyspepsia,
Dropsy,
Dysentery,
Diarrhoea,
Eczema,

POSITIVELY CURES

Syphilis,
Scrofula,
Scarlet Fever,
Small Pox,
Sick Headache,
Tumor,
All Female Troubles.

WORD OF WARNING!

BEWARE OF FRAUDULENT IMITATIONS.

The success of the Radam's Microbe Killer has brought out many worthless imitations. Some of them are positively injurious, and we give this warning, that the public may not be deceived. See that every jug has our trade-mark on it, same as above cut.

CAUSE OF DISEASE AS GIVEN BY THE SCIENTIFIC MEN OF THE AGE.

Monsieur Pasteur, who for years has made them a special study, first discovered that these minute insects were the cause of spreading the most deadly contagions through their astonishing rapidity of reproduction. Pasteur discovered them in myriads in human blood, in sheep, rabbits and rats. He found that the Microbe was the direct cause of the Variolosis, or Small-pox—Bronchitis, Yellow Fever and other contagious diseases.

The Microbe, in the human system attacked by Variolosis, is thread-like, cylindrical, somewhat swelled. It is the smallest of all powerfully magnified animal organisms. It breeds by the thousand per minute. Pasteur, after making a close study of the Microbe, discovered that the quickest way to exterminate them was by the free inhalation of Oxygen gas, or by liquids charged with that gas, but admits that the time must come when some powerful liquid will be discovered that will effectually destroy the Microbe, and that the liquid must contain such gaseous combinations as will directly destroy in the human body, those germs or Microbes of disease.

Doctor Maclean, a prominent member of the Royal College of Physicians and Surgeons, says:

The idea that many of the diseases to which man and the lower animals are subject, result from the presence in the system of minute organisms or microbes is not a new one.

The introduction of the microscope, the discovery of the Yeast plant, and the further parasitic nature of many contagious diseases have proved conclusively that it is directly attributable to the Germ or Microbe Theory of Disease.

The theory has positively proved that many diseases are due to the presence and propagation in the system of minute living organisms. It is essential, therefore, to become thoroughly acquainted with the class, kind, very composition of the Germs that produce disease.

Contagion, Infection, is created by the minute organisms or microbes. The Contagion, or microbe being irregular, and the minute particles being irregularly scattered about in the atmosphere, it is evident that the inhalation of one or more of these particles is purely a matter of chance. Yet, such inhalation, no matter how healthy and strong the man or animal thus inhaling it, will, as a matter of course, be attended by either sooner or later, by the myriads of microbes that will, according to the contagionous nature of the disease, breed in his system.

To exterminate those it has been found that liquids strongly impregnated with gases and alkalies were the most efficacious, and it is a matter of time when a liquid, strongly impregnated with those substances will be discovered that will effectually destroy the microbes of Germs of Disease.

It is an organic form of such organisms as to be classified under the

head of Microocci. The Microbe is spheroidal, transparent and of a gelatinous consistence. It enters the human system by inhalation, or exists in the water or milk we drink, or the food we eat. It is able to stand the greatest amount of heat. By the most careful study and frequent experiments microbes have been induced, by ivory needles, into meats that have been thoroughly roasted and boiled, and yet, when taken from the ovens, pans, griddles or pots, the microbes have been found to be yet alive and propagating, thus showing that even cooking has no effect upon them.

Prof. Tyndall says of the Microbe: They are found in myriads and countless shapes floating in the air, destroying man, as well as beast and vegetation. The virtual triumphs of the antiseptic system of surgery is based on the recognition of lying contagia or microbes, as the agent of putrefaction, and this discovery made, it behooves the closest study of the subject by the physician, surgeon, chemist, agriculturist, in fact, by all men, to endeavor to discover some powerful liquid substance, heavily charged with some so far undiscovered gaseous substance that will penetrate through every tissue of the human, animal or vegetable system and effectually destroy that death-dealing pest, the Microbe.

The word Microbe was first introduced by Professor Charles Sedillot and indorsed by the great philologist, Littré, who caused its adoption by the Academie des Sciences of France, and thus had it admitted as a scientific term to be used by all scientists.

Science has taught us that the direct causes of contagious diseases are directly attributable to a minute, invisible, yet death-dealing, insect, feeding, living on the germs of corruption inhaled, absorbed in the system, whether human, animal or vegetable.

It is designated in a science as the Microbe the most deadly of all animalcules, propagating by millions, and spreading disease wherever it makes its appearance. The extermination of that curse to the human race has taxed the ablest scientists, who have devoted hours of study in each and every branch of their different researches to check the frightful ravages made by the Microbe upon whatever it attacks.

William Radam, a florist and botanist of Austin, Tex., who, from his earliest boyhood, had been brought up to take care of and watch tenderly over the plants, seedlings and slips, that were extensively grown in his father's world-famed nurseries, having frequently seen many of his favorite plants suddenly droop and die, was the first to make the Microbe his special study, and its extermination the object of his life.

Fortunately for Wm. Radam he was able to command the means that enabled him to purchase the instruments, needed to perfect his experiments, as he patiently advanced in his studies of the Microbe. He was not the man to rely merely on book learning, although he closely studied the theories advanced by scientists.

William Radam, after years of patient

study and analysis, found the true origin of the germs of disease, and by a secret inspired by Nature's close study, was able to produce what will be read below, as that exterminator of the dreadful scourge, Microbe—as recommended by the greatest authorities, and world-famed authorities, on the subject, who all admit that to exterminate that pest and scourge requires just such a liquid, surcharged with gases, as William Radam's Microbe Killer.

TESTIMONIALS.

Now read the testimonials and convince yourself if they are genuine or not. Please investigate. I will forfeit \$1,000 if you will find any of our testimonials not genuine. We give full address, so that you can write to any of them. Do not forget to inclose a stamp, and you will certainly receive an answer. We have a great many other testimonials in our office, and have the consent to show them to the afflicted, but have no authority to publish them. From the following testimony you can see at a glance that this medicine cures every disease:

Consumption.

PASADENA, May 13, 1889.

Microbe Killer Co.: I can recommend Radam's Microbe Killer for the cure of consumption. I have been sick four years. I have employed the best physicians in San Francisco, San Jose, Los Angeles, and am now taking my fifth jug of Wm. Radam's Microbe Killer. I have gained fourteen pounds in three months, and I note a steady improvement. The medicine has accomplished more for me in the short time I have tried it than all the doctors and the outlay of \$7,000, and I hope all my friends who are afflicted in the way I was, will use it. J. F. RENOUULT, Formerly of San Francisco, now a resident of Pasadena.

Complicated Diseases.

SACRAMENTO, April 3, 1889.

Wm. Radam's Microbe Killer Co.: Gentlemen:—I take pleasure in adding my testimonial to that of others who have been cured by the virtue of your medicine. I have been afflicted for several years, and for the last three or four years have not been able to work, having been confined to my bed a good deal of the time. My system was so poisoned with catarrh of over thirty years' standing, in connection with the alarming symptoms of malaria and diseased liver, that life was a burden. As a result, the liver, kidney, urinary organs, heart, bronchial tubes and lungs were involved, causing dyspepsia, neuralgia and rheumatism, with many alarming, indescribable symptoms. Have been under the care of physicians and have taken all the popular patent physics and medicines of the day, and belts, batteries and baths, without avail, and had almost given up hope of relief. But one of God's good and perfect gifts to man (through the instrumentality of man) was made known to me by a letter to my wife from her father, a man of 70, in Albany, Mo., stating that Wm. Radam's Microbe Killer was curing all

diseases given up by physicians, and advising me to use it and not give it up until a cure was effected. Coming from the source it did, I at once ordered two gallons expressed from St. Louis, Mo. Cost me \$3 per gallon; but was the cheapest medicine I ever took. Commenced taking it in December last. Have taken seven gallons and have been improving slowly but surely. Have now gained my usual weight and feel better than for years. Am over 60 years of age. No money would induce me to be without it in my family. I hear many good reports from those who are now using it. Yours respectfully, etc., L. L. GODDARD.

Dyspepsia.

LYNCHBURG, Texas.

Messrs Wallace O'Leary & Co., Agents Radam's Microbe Killer, Houston, Tex.: My sufferings from dyspepsia and bayou fever made my life a misery, and at times I was so despondent as to care little to live, when I heard of your great medicine and purchased a gallon. It gives me pleasure to inform you that before half a gallon had been used, \$1,000 could not have bought the remainder of the gallon, had I not known where to get more.

Yours truly,
CAPT. GEO. L. SMITH.

Dysentery.

GALVESTON, Tex., March 10, 1888.

A. Behrend, Agent for Wm. Radam's Microbe Killer.

Dear Sir:—I have been suffering for years with a complication of diseases which originated from a diseased liver. I had dysentery, bloody flux and internal tumors. I consulted some of the most eminent physicians in the city and used their medicines for a long time without getting any relief. I was finally given up to die, when a friend advised me to try the Microbe Killer. As a last resort I gave it a trial, and the relief that it gave was wonderful. When I commenced to take Microbe Killer I weighed only 86 pounds. My present weight is 146 pounds, and I am restored to my usual good health.

JOHN W. DERRICK,
Sworn to and subscribed before me this 10th day of March, A. D. 1888.

JOHN A. CAPEN,
Notary Public, Galveston county, Tex.

SAN MARCOS, Tex., Sept. 17, 1887.
Mr. William Radam:

Dear Sir:—The Microbe Killer I find is a splendid thing. Can I get the agency here? My little boy that was affected with worms is cured and getting fat and rosy. My father is also using your medicine, and is improving very fast.

Mrs. ALICE LEE,
Catarrh.

DEAF AND DUMB INSTITUTE,
AUSTIN, Tex., July 11, 1888.
Mr. William Radam:

Dear Sir:—I certify that I have been a great sufferer with pains in my chest, catarrh in the head, and headache for over four years. My sickness has been declared leprosy by the leading physician and the public generally, being entirely abandoned and left alone to die, but thanks to Mr. Radam, whose medicine or Microbe Killer I have been using for five

weeks with the most beneficial results. I am satisfied that by continuing this great and most wonderful remedy a few months longer, I shall again be able to get to work and support my poor aged father, upon whom I have been a drawback in his declining years.

W. H. LACY,
Superintendent

Malarial Fever.

HOUSTON, Tex., October 9, 1888.

Messrs. Wallace O'Leary & Co., Agents William Radam's Microbe Killer: Gentlemen:—I have been using the Microbe Killer for malarial fever and general debility, and write you to certify that I am again strong and healthy, and am satisfied the Microbe Killer is a sure remedy for those diseases.

R. E. LEWIS,
Proprietor Capitol Stables.

Asthma and Bronchitis.

NASHVILLE, Tenn.

I have been a sufferer from Asthma, Catarrh and Bronchitis for nearly twenty years. I have tried the best physicians and remedies without any relief, and now, since I have been taking Microbe Killer, I am entirely cured and can recommend it to all.

NEW ORLEANS, Feb. 27, 1887.
M. Herstein, J. P., Nashville, Tenn: To whom it may concern:—This is to certify that after taking one jug of Microbe Killer I was permanently cured of a severe attack of bronchitis and pulmonary inflammation, said illness having resisted all methods of medical treatment.

I cheerfully recommend Mr. Radam's Microbe Killer as being more than is claimed for it. HENRY V. MIELY,
With Rice, Born & Co., 77 Camp St.

Leprosy.

The only case of leprosy ever known to have been cured by any medicine. James Kavanaugh, Jr., is now entirely recovered and is back in New Orleans. We are treating five other cases of leprosy, all successfully.

FIFTH DIST. N. O., July 23, 1889
To whom it may concern:

I positively assert that my son was afflicted with that most hideous and loathsome disease, leprosy, and of a character most malignant. Any person who may be skeptical regarding this case are most cordially invited to call and see him now, or at an early date, at my residence, No. 157 Eliza street, Algiers, Fifth district of New Orleans, because if not seen soon, and he continues to improve as he has, since beginning the use of Wm. Radam's Microbe Killer, they will not have an opportunity of giving an honest verdict concerning his case.

Respectfully,
JAMES KAVANAUGH.

ALGERS, FIFTH DIST., N. O., July 24, '89.
I, the undersigned, do hereby declare that I have been afflicted with leprosy for over four years. My sickness has been declared leprosy by the leading physician and the public generally, being entirely abandoned and left alone to die, but thanks to Mr. Radam, whose medicine or Microbe Killer I have been using for five

Heart Disease.
SACRAMENTO, Cal. April 27, '89.
Radam's Microbe Killer Co.: Gentlemen:—My son, 14 years old, was cured, with less than one gallon of Radam's Microbe Killer, after being given up by physicians as incurable with enlargement of the heart. My wife was also cured of a severe bronchial trouble after a failure on the part of physicians to relieve her. I consider it far superior to all known remedies.

JAMES J. KAVANAUGH.

Rheumatism.
KNOXVILLE, Tenn., Nov. 14, '88
The Microbe Killer Co.: Gentlemen:—Having tried every suggested remedy for chronic rheumatism for more than ten years, I was dubious as to the efficacy of your Microbe Killer, but am frank to admit that a cure (and I earnestly trust a permanent one) was the result after having taken not quite the entire jug you sent me according to directions. Accept my thanks. I am dear sir, respectfully yours,

FRANCIS P. DOOLY.

NEW YORK, Sept. 25, '88.
The Microbe Killer Co.: Gentlemen:—In reply to your inquiry as to the effect that the Microbe Killer had on me, I would say that if it cost me \$100 per gallon I would not be without it. I took it three weeks and am now clear of all pains and aches. I suffered for the past ten years with muscular rheumatism, and it has been so bad at times as to prevent my attending to business. Very truly yours,

JOHN BLAKELY,
233 Broadway, N. Y.

Kidney Troubles.
PHILADELPHIA, March 30, 1889.
S. E. Cor. Fourth and Market Sts.
William Radam: Dear Sir:—I have had kidney troubles for three years, accompanied with pain and aching across my back and hips. Suffered very much at times; at night I had pains across the lower part of my abdomen; had considerable inflammation at the neck of the bladder. In general, it almost broke me up. I could get no relief from anything I had taken until I commenced with your Microbe Killer, I feel now like a new person. I will further explain my case to any one writing me. Would advise at any one with any disease of the kidneys to use the Microbe Killer.

PHILADELPHIA, Mo. Feb. 15, 1889.
By using Radam's Microbe Killer I have been cured of piles of many years' standing.

JOHN LETHAM,
Room 2, Opera House Building.
