The excursion train for Morehead leaves this morning at 8:30 o'clock. Fare for round trip, when tickets are purchased, one dollar.

The intense heat during the past week has not been without deadly effect. In many of the larger cities there have been some deaths and a great many sun strokes.

Whatever inaccuracies may exist, in the reports of the average census enumerator, those from New Berne should be deemed perfect, as they will be, what many persons believe to be the highest human utterance—Popes-Bull.

The officers of the Teachers Assembly for the ensuing year are: President, Prof. Chas. D. McIver, of Raleigh; Vice President, Prof. Hugh Morson, of Raleigh; Secretary and Treasurer, Maj. Eugene G. Harrell, of Raleigh. Seven other vice-presidents are to be appointed.

This month has been a big month in the matrimonial business. There were eleven licenses issued by the Register of Deeds, seven of which were to white couples. There was not such a rush among the colored population, but there were more white couples than during any previous month this year except January, which had seven.

The News and Observer says: "The North Carolina Pharmaceutical Association will hold its 11th annual meeting at Morehead City, N. C., on July 8, 9 and 10, 1890, and we are informed by Mr. F. W. Hancock, the local secretary, that this will probably be the largest and most interesting meeting for several years."

An intelligent farmer said yesterday that in addition to having the most promising crop he had ever had, that the cultivation of it had never cost him so little. His cotton, he stated, had not cost him over fifty cents an acre, while ordinarily it cost from one dollar to one dollar and a half per acre. The continued dry weather since last November he says makes the difference.

Miss Carrie May Cox, of Kinston, is in the city visiting Miss Maria Cox.

Mr. F. W. Hancock is in the city.

Men Who Build Up Towns.

As has always been it is yet, men who build up towns and instill life and prosperity in localities are those who are willing to take some risk in developing the resources that lie around them. Progress is the watchword and those who fail to realize its full import are going to get left just so sure as there is any display of energy elsewhere, and there is in the greatest abundance. We doubt if there is today a State in the Union making greater advancement than North Carolina. Her agricultural and educational interests were never before given such care and attention.

Our mining, stock raising, fruit and vegetable growing are just rising from their infancy with a bright future in sight. What is the cause? Simply public spirit. Who is it displaying this public spirit? Each man has his share, but in the main it must be the business men, those who have capital, to take the lead. If they sit back with their money in bonds or place a dollar only where they see another in sight, indirectly they are destroying their own life blood. Even with an advanced position we can not afford to be satisfied, for we must either go forward or backward. Just so true as is this statement with individuals, so true is it with towns and cities.

Why is it that some places with scarcely no natural advantages are outstripping others more blessed? Because they have men of tact, energy and push who are willing to see some one else thrive besides themselves. They have men who endeavor to open up new business instead of dividing that of their neighbor. We have as intelligent men in New Berne as there are in any portion of the State and they are not without business capacity and energy but the question is have they sufficiently realized the great importance of concentrating their strength in looking to the good and welfare of the public. If you love your home you will look to its interests in being active towards the establishment of industries that enhance the value of property, encourage labor, and put money in circulation.

Paying Taxes.

There is a large class of people who had as soon sink their money to the bottom of the ocean as to pay it out for taxes, though the amount of the taxes be ever so small. Our sheriff said yesterday that he was now dealing with that class who, it seems, "had as soon die as pay their taxes." If their wages are garnished there are some who will stop work to "get the best" of the tax collector. They will resort to all manner of schemes and contrivances to escape paying a just debt which they owe their country. Rightly considered, no citizen invests the same amount of money to better advantage than in paying just taxes. It must be then, that this aversion to paying taxes is another one of the evils (for it is an evil) which arises from ignorance and false teaching.

Taxes are just debts and our sheriff says he is going to collect them if possible. Those who will not pay willingly will be forced to pay. The other day the sheriff called a fellow into his office and asked him to pay his taxes. "Lor, Mr. Sheriff," he said, "I listed way last June!" "Well, I know you did," said the sheriff, "and now I want you pay." "Pay? Why I ain't got no money to pay—but I listed long ago." And the fellow went on to say that he didn't have any money, was not at work, didn't know when he could pay it, and might as well have said he wouldn't if he could. The tax collector is the most widely known and the least popular man in the county among a large class of people.

A Model Class Room.

We visited the infant class room of the Centenary M. E. Church Sunday School yesterday. Mr. J. K. Willis, the excellent superintendent of the Sunday school, had been busy during the day getting in some new furniture and arranging it. The room is the study of the old parsonage next to the church, and it is a model class room for the little children. It has recently been handsomely painted inside. A set of neat and comfortable settees, donated by the society of "Little Helpers," has been placed in the room, the floor has been carpeted, and the walls are adorned with Biblical pictures illustrative of Sunday school lessons. A blackboard, which is used in illustrating the lesson by Mrs. A. B. Ferree, who has charge of the infant department, has been placed in the room also, and with a Mason & Hamlin "baby" organ the outfit is complete. The room will seat sixty children comfortably. Mr. Willis hopes that, with all the conveniences and advantages the Sunday school has for teaching the little children, the attendance will be increased. As we said above, it is a model class room. Friends of the school should visit it today, and see what is being done for the little children.

If there is one duty which is more binding to a man than any other, it is that of supporting or aiding in supporting all enterprises which tend to up-build the town or locality in which he lives. One of the best things for "booming" a place is a good, well edited, largely patronized newspaper. It is the best advertising medium the merchants can secure. An advertisement in a paper with a large circulation will go to many people who never heard of "you" or "bargains." The Editor, whose paper is patronized by a large number of people, can afford to buy good presses, material etc., and can pay the wages which expert employers in a printing office always command. Without it he is helpless, unless he is a man of almost unlimited means. Some people seem to think that it costs but little money and less work in a printing office to make it a success. To all such let me say that there is a great deal of expense and hard work to be encountered in running a paper. A great many people are very apt at advising, and telling the Editor what to do, all of which he takes in good part—it's in one ear and out of the other. But my friends if you can't or won't subscribe for your home paper, let me beg of you, in the name of the community in which you live, don't do anything to impede its progress. The "Editor" has a good deal of brain as well as body work to do, and so don't be a block in his path way, but if you think you can run the paper better than he can, why just try it. ju28-29

Why It Is Popular.

Because it has proven its absolute merit over and over again, because it has an unequalled record of cures, because its business is conducted in a thoroughly honest manner, and because it combines economy and strength, being the only medicine of which "100 Does for one Dollar" is true—these strong points have made Hood's Sarsaparilla the most successful medicine of the day. ju28-29
