Hood's Saraparilla has a steadily increasing popularity which can only be won by an article of real merit.

Another Statement. EDITOR JOURNAL:-In my communication in your issue of Sunday, after referring to the statement made by you on Thursday in reference to the action Parker and C. Y. Loftin, of Olivers, of the board of councilmen upon the matter of the electric light, I used the following language: "This statement is grossly inaccurate, and does the board of councilmen a serious injury." was apprehensive at the time of writing costrued with reference to my entire communication might be considered by its readers as having been used in a Mr. W. G. Elliott, President of the Pickwickian sense, but your editorial Wilmington and Weldon Railroad comment has relieved me from any and seriousness which were intended, teacher. 'not a single councilman on whom Mr. Williams says the injury has been inflicted has mentioned it to us (you),' and the only reason why this course THE nomination of Pattison and Co.. who has been in the city, went to has been pursued by the councilmen which suggests itself to me is the very reasonable conclusion reached by them that since their ingenuity in drafting interest of the Provident Savings Life the resolution has misled the editor of Assurance Society. Mr. Haigh is from the JOURNAL into believing that the Fayetteville and was formerly editor of board has offered through that resolution to pay for the light actually furnished, of course the average citizen can reasonably be expected to reach the same conclusion. The fact that the editor of the JOURNAL has been deceived by that resolution is the strongest evidence which the board would desire as to the success of their ingenuity. You repeat in your comments upon my communication the statement that the board through its resolution offered to

pay for the light actually furnished. If you or any one else, after carefully reading the resolution, can find any offer made, directly or indirectly, to pay for the lights actually furnished, you can do more than I have been able to do. The only offer which the board makes is to pay 775-1200 of the monthly bills due according to the contract, and then follows the declaration that if this sum is not competent, and upon an as a judge.
examination it should be found that the Politics is light furnished is less than 1200 candle power, the board will declare the contract null and void. To illustrate: Suppose the electric company declines to accept 775-1200 of the contract price, and an examination is had which discloses the fact that the company is

actually furnishing a light of 1150 Sheriff; W. N. Marine, for treasurer; candle power and not 775 as the board says it believes it is furnishing, what last with no opposition, so we hear, as will be the result under this resolution? Why the board simply declares that the nothing else for them to do, according to the resolution. Is it not plain, Mr. Editor, that the board is trying to compel the Electric Light Company to accept 775-1200 of the contract price by EDITOR JOURNAL-Pursuant to the threatening if the company should redemands of the Democratic Executive fuse to accept that sum to annul the that's who we need in our Congress.
