NOTES AND COMMENTS. Tus Spanish Government has offered two prizes for the model of a monument amemorate the discovery of Ameritoe ca. The first prize is 5,000 francs, the second one 1,000. Both native and foreign sculptors are allowed to compete for the work. Models are to be sent to the Academy San Fernando, in Madrid, within one year.

Ose hundred millions of dollars invested in truck farming yields, from 535,000 acres of land, nearly \$77,000,000 worth of production, giving constant occupation to 240,000 men, women and children and 76,000 horses and mules. Truck farms, as a rule, are on lands far removed from markets, and this marvelous advance in capital investment and people employed is due entirely to the contemporaneous extension of railroad facilities.

It may encourage the humble maiden of limited resources and busy life to know that during the life of the Danish King's daughters the royal sire was comparatively poor, and consequently the two most popular and powerful women of Europe, the Princess Alessandra of Wales and the Czarina Dagmar of Russia, used to trim their own bonnets. fashion their own gowns, and do up their own laces, besides looking after several other things not nearly so easy of accomplishment.

AT church, the theatre, and other assemblies the Japanese take off their shoes. "At the large theatre in Trukiji, Tokio," says a correspondent, "the rush for shoes is sometimes tremendous. Imagine 2,000 people after a matince crowding and elbowing and pushing to get at their shoes, so as not to be late for their supper! Further, imagine what anyteties and distress of mind the attendants must undergo who have in charge the task of getting the multitude properly shod. The tamous problem propounded by Caryle in the opening chapter of 'Past and Pre-cut' of 'getting the thousands of shirts on the thousands of backs' doesn't offer more difficulties." WILLIAM H. RIDEING (who has all his

life been familiar with steam-hip affairs) gives in Scribner a clear account of the ingenious precautions and devices which have made ocean travel one of the safest methods of locomotion. He prints the following remarkable record for 1890: "Nearly two thousand trips were made from New York alone to various Europcan ports; about two hundred thousand cabin passengers were carried to and fro, in addition to nearly three hundred and seventy-two thousand immigrants who were landed at Castle Garden. This enormous traffic was conducted without accident, and no more comforting assurance can be given than this of safety on the Atlantic."

THERE is no sweeter charity in all England than the Robins' Treat, which a Mrs. Louisa Birt, of Liverpool, provides semi-annually for 5,000 of the poorest little children she can find. A month in advance of the Treat agents are sent into all the dark courts, alleyways and back streets of Liverpool with invitations for the Robins. Absolutely no questions are asked, the messenger s-cing with half an eye whether the dwellers deserve cards or not. At the last Treat, served New Year's Eve, the Finance Committee placed St. George's Hall at the disposal of Mrs. Birt and her 5,000 Robins. The treat was all that could have been desired, and not one birdling was permitted to escape until he was too jolly full to cat another crumb

Within one decade the States west of Ohio will produce enough beet sugar to supply the entire demand of the country, and that notwithstanding the alleged cheapness of the cane product. The home-made and home-grown product will supplant the foreign article. Illinois, Nebraska and California have the best soil for the growth of sugar-produ-ing beets. Capitalists have great confidence in the future of this industry and are investing large sums in it. I have just completed two refineries-one at Grand Island, Neb., and the other at Pomona, Cal.-the cost of each being \$600,000. We shall begin work on another plant at Norfolk, Neb., next month.

THE census shows that there are twentyeight cities in the United States with a population of 100,000 or more. It also shows that Texas, the largest State in the Union, has not a single city of the first or 100,000 class. According to the census the largest city in Texas is Datlas, whose population is 38,000. Next comes San Antonio, with 37,600, while Galveston is third with 29,000. But the census shows that Texas, in the percentage of its increase in the population of its cities, surpasses all rivals. From 1880 to 1890 the ten leading cities of that State had an increase in population ranging from 30 per cent, to 1,300 per cent. -- the for-Galveston, the latter El Pase. Fort W th shows an increase of 246 per cent. ; Dailas, 267 per cent., and Laredo, 221 per cent. At this rate of progress the next census will show nothing in Texas excepting cities of over 100,000 population.

DR. WILL R. LEE, of Springfield, Ohio, who has been appointed royal physician to the King of Siam, is only twenty-eight years of age. Only four years ago he was driving an express wagon and delivering express packages in Springfield. He was youthful, of handsome appearance, of fine physique. rare intelligence and was always sclive in church work. His friends raised a fund of over \$1,000 to assist Mr. Lee in taking a course at the University of New York to fit himself for a medical missionary. He was graduated with high honors in the class of 1890, and after his marriage with a young Canadian lady, who had also studied to become a medical missionary, he was assigned by the Presbyterian Board of Foreign Missions to a station at Petchaburee, Siam. He entered into the work there with a will, and the stories of the astounding cures of the young Yankee physician soon alled the sleepy Oriental land with wonuer. QUEEN OF WASHERWOMEN.

New-Berne, N. O.

powerful cor-

day of Mi-Ca-

order of proces-

sion, and de-

cided where they will hold their evening revel. In each quarter of Paris there is a "lavoir," or public wash-house, and along the River Seine there are also many others. In these thirty or forty establishments there are always many robust types of feminine beauty, and a woman who wishes to become the talk of the town can do it most effectually by getting the nomination of "Queen of the Washerwomen" for the season.

The pageant generally represents a strange mixture of pagan mythology and medizval splendor.

There are 83,000 women in the corporation of washerwomen. So it is no light honor to be chosen their queen. and to have absolute power over them, if only for one day.

Mlle. Siccard, this year's queen, is a splendid brunette, 26 years old, with a profile worthy an antique statue of Venus and a bust of almost as heroic size as that of the great statue of the Republic, near which she was crowned queen the other day. She was the unanimous choice of the women in all the Paris lavoirs. In the procession she rode in a great coach garnished from top to bottom with camellias and draned with red velvet sown with golden stars. The coach was drawn by four magnificent white horses.

Crowned with a golden diadem, dressed in a cream-colored satin gown with golden embroideries, the beautiful blanchisseuse perhaps fancied, as she rode enthroned on her coach past the hundreds of thousands of laughing Parisians, that she was indeed a queen. But that did not hinder her from taking her usual place next morning in the wash-house and attending to her business as usual.
