If President Harrison would say right out that he intends to appoint a colored circuit judge, it would greatly encourage the 30,000 colored voters of Ohio, without whom the dauntless McKinley will be nowhere.—Louisville Courier-Journal.

STEVE RYAN, whose big failure recently at Atlanta, startled everybody, gives the reason. He says it was because he led a fast life, and lost thousands on prize fights, horse racing and in gambling saloons. Such business will break the best of 'em.

If Maj. McKinley wins this year he will be a significant factor in the next Republican National Convention, If Gov. Campbell wins he probably will secure a place on the Democratic national ticket. Ohio will play an important part in national politics next year.—Chicago Mail.

WHILE the mandatory clause of the Silver Act was of force it pressed the mints to coin \$2,500,000 per month, or at the rate of \$30,000,000 per annum. Running at this rate it would take the mints till 1924 to pay off the appropriations of the Fifty-first Congress, were they the only resource.—N. Y. World.

The heirs of the Edwards estate brought suit in New York last Monday to recover the property of the estate in that city. The claim embraces property in the heart of the city and is variously estimated at from 200,000,000 to \$700,000,000. Several of the interested parties live in New Berne, and the JOURNAL wishes them abundant success.

We are not surprised to learn that the handwriting has appeared on the walls of the White House, and that the Republican Nebuchadnezzar is pale with fright. Judgment—sure, swift, tremendous—will overtake him. He may take his journeys and indulge in mellifluous "flapdoodle" talk to the dear people from platforms of car or decorated hall, but the people are not fooled, and the hand of the avenger pursues him.—Wilmington Messenger.

THE Atlanta Constitution draws attention to the fact that during the last decade the increase in population of the Southern cities of 50,000 inhabitants and upwards has been greater than that of Northern and Western cities of the same class—49 per cent. against 47 per cent. We believe that the same rule will apply to the smaller cities and towns. The growth of Southern municipalities during the current decade is going to be far greater than it has ever been.

An exchange says: "Sugar should be put into the coffee without stirring and in a moment afterward a quantity of bubbles, due to the air contained in the sugar, will be seen to rise to the surface of the liquid. If the bubbles collect in the middle of the cup, the weather will be fair; if they leave the center and adhere to the sides of the cup, forming a ring of bubbler, with a clear space in the middle, there will be rain; if they scatter themselves indifferently on the surface, the weather will be variable, while a cluster of bubbles at one side of the cup indicates rain.

A good chance is afforded to spend a week at Ocracoke. The excursion on the Alpha leaves this morning at eight o'clock.

The Washington Post says the engineers are now surveying the route of the Norfolk, Wilmington and Charleston railroad through the Dismal swamp.

The New Berne Ice Factory fired up yesterday and found all the machinery to work satisfactorily. Its first output of ice will be made today. Now get ready to keep cool.

If you hear some loud, wild, weird music this morning about seven o'clock, do not be startled, neither imagine that a circus is coming and that the steam piano has unexpectedly arrived. It will only be the calliope whistle at the ice factory summoning the hands to work. It has eight tones the same as a scale of music.

Craven vs. Pamlico.

This case, which involves the adjustment of the debt due from Pamlico county to Craven county, which Pamlico county was adjudged to pay as its proportion of Craven county's debt prior to the division, was heard before W. R. Allen, Esq., of Goldsboro, at the court house on Tuesday.

Evidence on both sides was heard and the Referee is to report his conclusions of fact and law to the next term of Lenoir county court.

Craven county is represented by Messrs. F. M. Simmons and C. R. Thomas; Pamlico by Messrs. Stevenson and Cahoe.

K. Hattell, returning to his home in Beaufort, from a visit to his brother in Norfolk; and Mr. Geo. H. Clowes and family of Waterbury, Conn., en route to visit Dr. G. W. Blackhall at Morehead.

Remembering the Dead.

It is gratifying to note the care bestowed upon Cedar Grove cemetery and the neatness with which it is kept. Its attractiveness is also being enhanced by the nice class of monuments being erected by our citizens to the memory of departed loved ones. Another instance of this has just occurred in the placing in the cemetery of a large and elegant monument erected to the memory of our late estimable townman, Mr. Daniel Stimson by his wife.

The monument was made by Mr. J. K. Willis and that statement alone is a sufficient guarantee that it is finished in the highest excellence of workmanship.

It stands 16½ feet above the level of the walk. The greater portion is of the purest white. The base is of veined marble with bevelled edges. The sub-base is plain at the bottom with the upper part nicely moulded. The die is amply large for the inscriptions and is carved very prettily, the extreme upper portion being a regular octagon, and each of the four faces having at the upper corners small triangles, surmounted by rounded figures which at the rear meet the corresponding devices on the nearest corner of the adjoining face, and below these designs is a graceful scene—circle embracing the top of the inscription. The plinth or piece above the die is rounded and beautifully moulded.

Mr. Stimson was a prominent lumber man and one of our most valuable citizens, and the next portion of the monument is emblematic of his business. It represents a section of a tree. It is a plain straight column of dark mottled blue marble, of the same size throughout its length, and a pretty ivy vine twines around it from bottom to top.

From this section up, the monument is a collection of elegant decorations, there being charming figures of various kinds, cornices, a circle of drooping gothic, architectural leaves, and an ornamented, octagonal shaft, which is crowned at the summit with a beautiful fish.

The monument is a fine one, worthy of the purpose for which it was made, creditable alike to the one who had it erected, to the cemetery and to the city, and it reflects honor upon New Berne in that such splendid work, as fine as is needed anywhere in the State, is now produced by home talent.

NUMBER FIVE.

The Eastern North Carolina Dispatch, George Henderson, Agent, is one of the principal freight and passenger lines of New Berne. Its steamer, Neuse, admittedly the finest vessel in the waters of Carolina, makes tri-weekly trips to and from Elizabeth City, at which point it connects with a through line of railway for all points north. It is part of a system which embraces the Cape Charles route and Pennsylvania railroad line. It is a delightful route to and from the north and is growing in popularity daily. The freight business of the line is very heavy and the service excellent. The average season's exports of principal articles are, say, Twenty thousand bales of cotton, thirty thousand barrels of potatoes, fifty thousand packages of other truck, one hundred and fifty tons of fresh fish, six million feet of lumber, one million shingles, two hundred thousand dozen eggs, five thousand barrels of clams, besides tar, rosin, spirits turpentine, rough rice, peanuts, poultry, porpoise hides, fish oil, wool, hides, beeswax, honey and various other articles.

The Clyde's N. C. Freight Line between Baltimore and New Berne, S. H. Gray, Agent, has three steamers, the G. H. Stout, Defiance and Vesper, that make semi-weekly trips. From July 1st, 1890, to July 1st, 1891, this line carried out from New Berne 6,000 bales of cotton, 897 barrels of spirits, 4,665 barrels of rosin, 1,089 barrels of pitch, 933 barrels of tar, 115 barrels of oil, 5,669 packages of plates (aggregating 1,417,500), 2,097 packages of pulp, 162,880 cases of cannedysters, 15,929 packages miscellaneous merchandise, 2,350 staves, 3,143,400 feet of lumber, 6,091,000 shingles. The tonnage North and South bound for the year was 40,505,400 pounds. The Company has very handsome offices in this city and is now improving and extending its wharf.

In a former article we showed that the mills of New Berne can cut 90,000,000 feet of lumber a year, about 60,000,000 feet going North. Mills in the vicinity send off as much more. It is safe to say that 120,000,000 feet of lumber have been shipped on steamers and sailing vessels from this immediate neighborhood during the last twelve months.

Our attention will next be engaged on the Old Dominion Steamship Company and the Atlantic and N. C. Railroad.

DIED.

At the home of her parents in Swansboro, on Sunday the 12th inst., Pauline Bowden, a sweet little child and the youngest one of Rev. J. L. Keen and wife, aged about 18 months.

There's comfort and there's pleasure in a thing that's rightly made. This is more so in Clothing than in anything that is ready made for use. Now the Clothing sold by us is from reliable makers and will stand usage—and in shoes—they should be rightly made to afford comfort and pleasure—The ones made by Stacy Adams & Co., and sold only by us are the ones to buy. They last some people a year some longer. Remember us for anything in the men's line.
