Thus for the women the days go by and traced on her the perfect represeatation of the branch of a tree without in one monotonous round, year in and out. hurting her in the least.

The men omit the mass, look a little after their business affairs, if they have any, during the middle of the day, but diligently attend to the promenade, the opera and tertulia or to the gaming table for the night. Gambling is a national habit. In many of the swellest cases of Santingo and Valparaiso the gaming table is regularly set out and forms one of the features of private entertainments, like the baccarat of Great Britain, which lately plunged the eldest hope of her respected majesty into such boiling water. In Chili the poorest peon and raggedest gamin may be seen at all times in the alleys and by-ways betting medios and centavos (the pennies and nickels of the country) with as much eagerness as the wealthy mine owner stakes his golden ounces. The tallest gambling that has ever came under my wn observation took place on a steamer between Copispo and Taleshuano, when a man who had recently "struck it rich" in copper at the Atacama mines lost \$90,000 in a single night. There are laws against gaming, but they are seldom enforced. In Chill the man who makes your

shoes, the tailor who cuts your cost, the woman who irons your linea will charge according to your "cloth" for his or her service. If you claim to be a gentleman by dressing up to the character the price will be enormous; but if you are a tradesman, a clerk or a laborer of any descrip-tion it will be more moderate. Should you be so excessively vulgar as to yeature to the market in person to purchase a piece of meat it will cost you at least forty cents a pound; but if you send a servant he will buy the same quantity and better quality for half the money. In Chili the greatest repect is shown

EOWA CELEBRATED COPPER MINE WAS DISCOVERED

> A Michigan Boarding-House Keeper Found the Animals Rooting and Squeating in Fine Ore.

"How was the Calumet and Hecla discovered? you ask. Here, Captain drop in without knocking at nine or ten Duncan, you tell this man what he wants o'clock, every evening in the week if you to know

Thus appealed to the broad-shouldered, smiling faced man whose spirit pervades the great copper mine, stepped up to the little group waiting for dinner in the hotel at Calumet. "It was pigs, 'he said,

"Pigs?" I exclaimed incredulously. "Pigs, and no mistake," returned the captain. Back in 1863 an exploring party came here to try to find copper. They built a shanty to live in, and of course, they brought some pigs. One night we at the north understand the term, | the pigs were lost. The boarding-house keeper started out to find them. After a long search he heard the pigs rooting and squealing, but he could not see them. The noises seemed to come from down in the earth. Next morning a party of men went back to the place whence the poises came, and after a search they found a pit ten or fifteen feet deep. The mouth was covered with bushes, and the growth Teachers' salaries in the United States. of the trees about the sides gave every evidence that it had not been used for centuries. There the pigs were contentedly rooting among broken pieces of

ruck. "A rude stone hammer and some charred sticks give evidence of earlier explorers who had evidently gone away unsuccessful. The hanmer was of the same kiud as the other implements, which had been trace I back to the days of the predecessors of the Indians whom the French found in possession of the lands-the Indians who built the mounds and who over-ran the whole country from Mexico to Lake Superior, where they got copper for their implements and utensils. The mound-builders, like the explorers way had discovered the ancient pit, looked for copper only in masses, as it had been deposited in fissure veins and in the lava flows. The huge chunks of virgin copper weighing many tons and the smiller masses hangin; in the rocks like metal icicles were the only kind known to the ancients, and the moderns had been assured by the learned geologists that copper could be found only in rocks formed from lava.

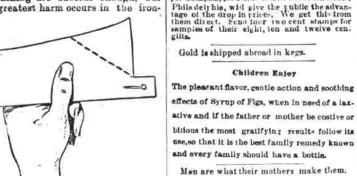

"But the pigs hal turne lover pieces of rock formed by the action of the water-aqueous rocks -and in these conglomerates there certain was copper. This seemed a find indeed. But when the matter was reported science scoffed at the explorers, saying that the copper conglomerates found were simply a freak of nature and that money would be wasted if an attempt should be made to the case of an old horse which Dr. Walwork them. So Mr. Hurlbut, who ter Nangle, of Virginia, had owned for owned the lands, continued to give his attention to the Huron mine, which was working the lava flows. For the money he borrowed for the Huron he gave to ter, becoming unmunageable, and, when Quincy Shaw, of Boston, the lands on which the conglomerates were found. Mr. Shaw soon began to work these

rocks, and from these beginnings the called "Hundreds," as, for instance, Bermuda Hundreds, on the James River, richest, the most staple and the best promising copper mine in the world has een built up.

The Calumet and Hecla is a mysterious corporation. Owing the greatest mining plant in the world and spending they were accustomed to there. A "hundred" in England was a subdivison of a county consisting of ten times ten famimoney lavishingly in experiments, im lies, or ten tithings. In England the provements and elaborate machinery, the "hundreds" system is said to have been company allows none but its own emoriginated by Alfred the Great, for the ployes under ground and guards the details of all its affairs with a jealousy that piques curiosity. The company owns thousands of acres of land from which it takes the wood-considerably over one The history of the lighthouse goes hundred cords a day-which in summer back to the time when your neighbors feeds its extensive battery of boilers, cal

POINTERS ON COLLARS. fime and Trouble Saving Devices for Shirt

and Collar Wearers. Millions of good linen collars are ruined annually by the handling they receive in laundries. The acids used in washing are baueful enough, but the greatest harm occurs in the iron-

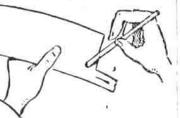

MALARIA cured and eradicated from the system by Brown's Iron Bitters, which en-ricates the blood, tones the nerves, and a diges-tion. Acts like a charm on persons in general ill heatn, giving new energy and strength. ing. Perhaps the most popular of col-"bent-edge" style. This is the familiar "bent-edge" style. This is the one that suffers most at the hands of the laundress. The points are turned over, and the hot iron presses down on the seam, stretching the fiber at that point NERVE RESTORER. No fits after first day's use. Marvelous cares. Treatise and 52 trial bottle free. Dr. Kline, 921 Arch St., Phila, Pa. so that the collar sarely is presentable after two or three washings. Here is shown a little device that will effect a great saving if put into practice,

while being simple in operation First, instructions should be given that your collars are to be returned "ironed flat," the ends not bent in any wise. Then take the collar in hand, as shown in Fig. 1.

Run the tongue along the under side of the seam for folding, moistening it, not so that it will penetrate to the upper surface of the collar, but yet sufficiently so to loose a the fibers of the linen around the seam. Then reverse the collar and hold it against some flat, clean surface, as shown in Fig. 2.

With a lead pencil or the themb nail in play it is readily and neatly pressed down to the project angle. Treated thus a good collar will last

twice or three times as long in use ay the ironed down affair. Some difficulty may be experienced at first in having the collars returned as requested, but a card attached to the

children to their parents, but the ten der love between mother and daughter, as it exists among us, is almost unknown.

A young girl never leaves the house of her parents unless accompanied by some member of the family or a female servant. If she goes to pay a visit the duenna waits for her at the front door or gossips with the female servants. Interviews between young ladies and gentlemen never take place except in the presence of others.

Servants are abundant, and if one does not please a better may be readily ob-tained, so that Chillan ladies are entirely relived from some of the responsibilities that harass northern housekeepers. Here t e hire of servants is so cheap and their demands so moderate that people can more easily afford, the five or six that usually compose the kitchen brigade than the matron of the United States her one or two. Eight dollars a month is a high price to pay one's cook, and so on down the scale to nothing but his "keep

for the errand boy, who is everybody's servant and the hardest-worked member of the household. In every Chilian household hospitality to evening visitors is expressed by tea and cakes, the hostess always pouring out the beverage and a servant handing out the beverage and a servant handing it to the guests. The beverage of the common people is yeron mate, the leaves of a shrub that grows in Paraguay, and it is also much used by the better classes, though the Chinese plant takes its place in the parlor. Yerba mate is a slightly exhilerating drink, with the tasts of tea and a faint savor of tobacco. It is pre-nared by nutrices a little hund succar in pared by putting a little burnt sugar in the bottom a cup, then a pinch or two of the dried leaves, after which boiling water is poured on and it is drunk ing hot, or rather sucked through ups. The poor use little gourds for ups, with a bamboo tube called a ombills, while the rich indulge in ele-

gs of miver or china, with silver

Evening parties, large and small, for-mal or informal, are very much in mahino, and the refreshments served are always cakes, ices and ices. Years ago-origners and also, perhaps, before journal at came, down here to publish unpleas at truths about them—all stranger were veloced with overflowing hospi-tity and delighted simplicity. But now invote country places, where the more pand its bombling are still passed from your paighbor's lips to your own, and where the heatens will passes in front of and spoon in the other while abs eavelops a pack is a its rich sirely and gently around the sirely mouth, and so on sound the sirely in the drasing room. Evening parties, large and small, for-

one was placed on a tower of the temple of Apoilo, on Mount Leucas, the light of which, visible far out at sea, warned and guided mariners. It is even said that the colossus of Rhodes, erected 300 years before the birth of Christ, showed from his uplifted hand a signal light. But the famous Poaros of Alexandria, built 285 B. C., is the first light of undoubted reccord. Other lights were shown from towers at Ostia, Ravenna, Apamea, but the lighthouse at Corunna, Spain, is believed to be the oldest sea town. This was built in the reign of Trojan, and in 1634 was reconstructed. England and France have towers built by their Roman conquerors, which were used as lighthouses, and they are to-day marvels in the art of masonry .- Chicago Herald.

American Watches Lead the World.

"The American watch leads the world to-day," said Charles L. Genta, of Waltham, Mass., at the St. James Hotel, "and any other better than the high grade American watch is made simply to please a rich man's fancy and is practically a toy. Before the war the watches made in the country were cheap, plated a fairs, with little or no merit. All our good watches wore then made by Swiss workmen. The war stopped all that, because it made it impossible to obtain tae watches of foreign manufacture, and of course our people set themselves out to see what they could do. We sell watches to-day in all parts of the world and they are acknowledged the world over to be the best of timekeepers. You will not find a sailroad maa in this country, no matter how able he is to have a watch of

Preserving Iron From Rust.

The beautiful ironwork so much in vogue nowadays, is generally finished, on account of its susceptibility to rust, with a coaling of black isoquer, or some other proparation, which is not only in-appropriate but gives to the metal an unnatural appearance. A clever French-man, who was an expert in metal work, showed us such a simple and effective way of preserving it from rust, that if is worth remembering. The only material required is a cow's horn (the toy trum-pets sold in the shops will answer the purpose). Heat the iron and rub the edge of the horn over it—that is all. If the horn amokes a little as you rub it on you will know that the iron is hot usough. This will cause the horn to meit, and an imperceptible couting will be left upon the iron that will afford complete protection from the damp for a purpose. Heat in indefinition. The beautiful ironwork so much in

gives off a pungent odor. No lands are sold, but the employes of the company lease the surface right of their lots and can sell out to the company at a fair valuation for improvements and lease.

being used only in winter. As the res-

inous wood crackles in the fierce beat it

The company has built an enormous school house, and the towns of Calumet and Red Jacket enjoy a good degree of civilization. The very large number of educated men employed in the various mines makes an excellent society, which has close connections with New York and Boston, where the mines have their financial headquarters. Saturday, July 18, was pay day, and the various mines disbursed in cash \$290,000 -an enormous amount of money to flow into the little towns about Portage Like. The people in Houghton and Hancock buy Calumet and Hecla stock as they would make a deposit of money in the savings bank.

At the present rate of output President Agassiz reports there is work in sight for seventy years to come. The company is increasing its capacity so as to about double its present output, or to work out the ore in sight in about thirty-five years.

The machinery for the Red Jacket shaft now being put in place will cost the company \$1,500,000. Like all the other machinery operated by the Calu-met and Hecia, it is built to stand for ages. The granite on which it rests comes from Massachusetts and the castings from Philadelphia. The great engine in the central power house has a greater power than the two Corliss en-gines which were the wonder of the Cantennial. From a depth of 4200 feet it hauls trains of ore and dumps them on cars to be taken to the great mills on Lake Linden, where the ore is crushed and the rock portions are washed away by successive washings until copper par ticles as fine as flour are deposited on the washing tables.

A new pumping engine, with a ca-acity of 50,000.000 gallons a day, has just been put in place, and after the water has been used it is again elevated by huge wheels having a diameter of fifty-two feet, and is allowed to flow into Lake Linden. Six days in the week and twenty-four hour in the day the operations of this great mine are carried on .-Detroit Tribune.

A Giant Sauflower.

A Giant Sunflower. There is growing on East Walnut street, near Jefferson, a sunflower that has attracted much attention on account of its great size and beauty. The stalk has now attained the height of fourtsen feet, and the plant is crowided with forty-five separate and perfect blossom. As this magnificent bunch of flowers leans toward the raing sun fresh from its damy bath, the giant plant testilles elo-ountly to the fortility of the soil of the Oractes. Kanna should need to Spring-field for has ford unblom. -Springfield

all, and He knows that as soon trust Him we shall begin to love Him. That is the way to love God; to put your trust in Him first of all.' Then 1 spoke to him of the Lord Jesus, and how God sent Him that we might be lieve in Him, and how all through Hi-life He tried to win the trust of men; how grieved He was when men would not believe in Him, and how every one who believed came to love Him without

trying, because 'He first loved them.' "He drank in the truth, and, simply saying, 'I will trust Jesus now,' without an effort put his young soul in Christ's hands that very hour, and so he came into 'the peace of God which passeth understanding.' and lived in it calmly and sweetly to the end. None of all the loving friends who watched ove: him during the remaining weeks of hi life doubted that the dear boy had learned to love God without trying, and that, dying, he went to Him whom, 'not having seen he loved.'

THE number of arrests for drunkenness in Massachusetts for the year 1890 was 52,814, of whom only 5,882 were women. Forty-five thousand nine hundred and eighty-two arrests were made in the twenty-five cities, and only 6,591 in all the rest of the State. The city population is 1,327,164; the town population 911,779. The number of arrests has increased since 1885 from 35,480 to 52,824 in 1890, whatever the figures may mean.
