

BUSINESS LOCALS.

FINE Mellow Apples just received. C. E. SLOVER.

LOST—A Gold Sleeve Button, on Middle Street, the finder will be rewarded by leaving it at the Drug Store of the New Berne Drug Co.

SMOKE Genuine Havana Tobacco. cot8t

FOUND near Meadow's Grist mill, one bunch keys. Apply at JOURNAL Office.

TOBACCO—If you want the highest market price for your tobacco ship it to Reams Warehouse, Durham, N. C., care Jas. B. Hutchings & Co.

TO ONE who can copy music in a clear style. I will give work at intervals during the winter. I prefer the services of one who understands harmony and counterpoint, although this knowledge is not necessary. CHAS. L. GASKILL.

NEW DRUG STORE—Drugs, Medicines and Chemicals, C. P. Popular Proprietary Medicines. All varieties of Druggists' Sundries. Teas and Biscuits. New Crop Garden Seeds. Fine and Large Hook Cigars and Tobacco. ALL NEW. Prescriptions accurately compounded (and not at war prices), our motto and our success. C. C. GREEN, Druggist and Apothecary, Middle St., four doors from Folwell. Jan 23/91

THE Christian is the gentlest of men; but then he is a man.

EDUCATION is a better safeguard of liberty than a standing army.

SMALL farms and diversified agriculture must be the watch-word henceforth.

FARMERS must look the fact square in the face that they must raise less cotton and more of other crops.

MANY farmers fail in wealth because they fail to make their own provision crops on their own premises.

CONGRATULATIONS to Mr. and Mrs. Cleveland. Good morning Miss Cleveland. All doing well. Heaven bless the baby!

THE Piedmont Exposition, the Road Congress, and the Cotton Growers' Convention are all to be at Atlanta very soon.

We have before us the first number of the New South, a weekly paper published at Richmond, Va., in the interest of Southern Immigration, Industrial Development, and Progressive Agriculture. It is proposed to make the New South a journal of facts concerning the entire South from the Potomac to the Rio Grand. Regular subscription price two dollars a year.

THE Massachusetts Democracy has declared most unequivocally for tariff reform and against free silver. This gives another reason why Southern Democrats, to win next year, should make tariff reform, upon which the party is united, the issue, and drop the currency question, upon which it is hopelessly divided. Let us present our most solid front to the enemy. —Columbia State.

THERE is great hope that Gov. Pattison's vigorous policy in the interest of honest State government will result in the Democracy carrying Pennsylvania this fall against the corrupt methods that have prevailed during the misrule of the Republican party, and it is believed that if the State goes Democratic Gov. Pattison will be a formidable candidate for his party nomination for the Presidency.

THE Richmond, New South says: The Buena Vista Company, the promoter and fostering guardian of material development here, is arranging for a full display of fabrics at the Virginia and North Carolina State Expositions. In the schedule embracing a variety of work in wood and metal will also be the products of the Casimere mills, the fire brick works and of the varied wares and implements of glass from the first works of the kind established in Virginia.

THE next sixty days will show great stringency in money affairs for various reasons. After that time there will be a gradual let-up and after the year 1892 has fairly opened good times may be expected. It is true we have immense crops, and many people who have been impatiently waiting for a rift to break through the clouds think that money will be set afloat at once. This is a mistake. They do not take into consideration the great cost of moving the crops to the seaboard. The money is in the country, but it will come west slowly, and there will not be much of a change in financial affairs before the middle of March.

LOCAL NEWS.

NEW ADVERTISEMENTS.
C. E. Slover—Apples.
Miss G. Smith—Millinery.
J. M. Howard—Hats etc.
Churchill & Parker—Special Prices.
New Berne Co.—Gold Button.

COTTON—New Berne Market—Sales yesterday 78 bales at 7 3/4 to 8 1/16.

There will be a meeting of the Centenary Methodist Church Working Society at the parsonage tonight at 8 o'clock.

The city Council held their first meeting in their new hall last night. It is a spacious room, it lights up beautifully, is handsome in every way and a decided credit to the city.

Elevator "A" of the Baltimore and Ohio railroad system at Locust Point near Baltimore was burned Sunday morning together with 185,000 bushels of wheat. Total loss \$500,000.

Two runaway mules hitched to a wagon demolished the pump in front of the JOURNAL office yesterday morning. The team was stopped a little farther down the street with but little further damage.

Messrs. Sam'l and Joe Windley, sons of Dr. J. L. Windley of Hyde county and Mr. Jas. Rice, of Pamlico county entered the New Berne Collegiate Institute Tuesday. In addition to that, sixteen new pupils of the city entered the previous day.

We have received from our former townsmen, Mr. Frank S. Smaw, who is now head clerk at Hotel Brighton, Atlantic City, a souvenir of the 14th Annual Convention and Grand Tournament of the New Jersey State Firemen's Association just held there:

Those who attend the lecture of Rev. T. P. Ricard at Hancock Street M. E. church tonight will be likely to have new lines of thought opened up for their consideration. The subject will be "Noah and the Flood" and very interesting points relating to anti-deluvian inhabitants of the flood and the relations of the different races to each other will be presented.

In another column will be found an interesting article on grape raising and raisin making. In addition to the proof thereof adduced that Eastern Carolina, owing to its location and climate, is one of the best adapted countries in the world for these industries. Mr. R. Berry informs us that records of the temperature as kept through a series of years for the State Geologist show New Berne to be above the average of the eastern part of the State in favorable conditions for them.

Cooper—Ulrich.
Yesterday morning at 8 o'clock Mr. John L. Cooper and Miss Blanche Ulrich were married at the residence of Mr. Ferdinand Ulrich, brother of the bride in the presence of a large company of friends, Rev. T. M. N. George officiating and Mr. Rudolph Ulrich and Miss Ada Cooper, Mr. Jones Wahab and Miss Kate Smaw acting as groomsmen and bridesmaids.

The happy couple were the recipients of many nice and valuable presents. After the ceremony they left on a Northern wedding tour, accompanied by Mr. Rudolph Ulrich, brother of the bride and Miss Ada Cooper, sister of the groom, and Mrs. Iris Hammond a relative of the way. A merry party of relatives and friends assembled at the train to "see them off."

Coming and Going.
Mrs. E. B. Roberts and children and Miss Mary Bryan returned yesterday morning from a pleasure trip to business.

Mr. and Mrs. E. L. Mann, the father and mother of our townsmen Mr. J. S. Mann and their daughter Miss Lizzie Mann, who have been spending the summer at Beaufort came up en route to their home in Hyde county.

Mrs. T. M. Dewey went up to Goldsboro to attend the wedding of Mr. John L. Borden and Miss Rena Micks tonight, after which she will visit the Interstate Exposition.

Mr. and Mrs. F. M. Bowden left to attend the Exposition.

Mrs. J. L. Hardy who has been visiting at Mr. J. M. Hines returned to her home at LaGrange.

Mr. Fred G. Mitchell, of Henderson, came down last night to visit relatives in the city.

Our Sidewalks!
Do you not feel in a better humor and feel more pride in the city when you are walking on one of the fine concrete pavements that are now in front of a number of our business houses or on the nice shell rock pavements which add so much to the attractiveness of many New Berne residences than you do even when you are in front of fine dwellings when the sidewalks are uncurbed for. Now that sidewalk improvements have taken such a hold in this city let us see, as shown by the following extracts, how the Raleigh Mirror views such and let it be an incentive to prosecute the work with even increased earnestness:

"There are but few things which show the enterprise of a city or make it attractive to visitors more than good sidewalks. Raleigh might be said to be one of the most beautiful cities in the Union, and would be with a few improvements of sidewalks. We intend to see that the sidewalks of this city are improved in the most judicious manner possible."

Gratifying to All.
The high position attained and the universal acceptance and approval of the pleasant liquid fruit remedy Syrup of Fig, as the most excellent laxative known, illustrate the value of the qualities on which its success is based and are abundantly gratifying to the California Fig Syrup Company.

To the Public.
I have leased the old reliable and popular Reams warehouse, Durham, N. C. for a term of years. I have had many years experience in the warehouse business and understand thoroughly how to guard the Farmer's interest and get the highest market prices for his crops. I have an elegant warehouse well equipped. The best light in the world, and a well trained warehouse force. I will have my opening sale October 1st, and you will do well to have a shipment there in time. Give me a trial and I will show you the value of my warehouse. My address is New Berne, N. C.

Dwelling For Rent!
Next door to the Presbyterian Manse on Johnson street.

JAMES W. WATSON

Twelve Ton Capacity.
We have announced that the New Berne Ice Company were about to double their capacity. We are now pleased to note that it will be more than doubled.

Mr. Stuart St. Clair, general manager of the York company from whom the 8 ton plant now in operation was obtained in response to the desire of the ice company and has received from them an order for another complete plant—a 12 ton one—to be in operation by February 10th, 1892.

An addition 85 feet long, the same width of the present building will be erected on the south end and the boiler room which is now not quite 30 feet wide will be extended and made 40 feet wide and 2 new 60 horse boilers put in in addition to the ones already there making a total of 180 horse power, and a large storage room will also be built.

The plants will be so arranged that if one should break down the other will still continue to run, and there will be no necessity to shut down the factory for cleaning boilers, engines or other machinery or for repairs.

It is pleasing to see the factories already started thus flourishing and enlarging. Let others be encouraged to select some other line of manufacturing and emulate the example that has been set.

Small vs. Large Factories.
Instead of attaching great importance to large factories the JOURNAL believes in the greater desirability of a number of small ones, and has repeatedly advised that instead of wasting efforts after those of such size as to be almost unattainable at the start, let the beginning be made with whatever means are available and let the size increase as needs require and accumulated means permit.

The South has an article in which a positive stand is accorded with the above position is taken. It urges that as a means of securing solid prosperity, groups of smaller industries are far more effective than great industrial establishments, though the latter may give immediate importance to the site, as the smaller ones supply the immediate wants of the section, and are thus not so liable to be affected by periods of depression and if one or more of them does fail the result is not so widely or disastrously felt. A dozen small factories of different kinds employing from ten to fifty hands each are to be preferred to one large factory employing the same number of hands. "Disperse not the day of small things."

THE HOME OF THE GRAPE.
Eastern North Carolina Cannot Be Exceeded—New Berne Midway in Latitude Between the Greatest Grape Producing Countries in the World.

Finest Varieties do Best—Yield—Prices—Profits—Home Made Raisins for the New Berne Fair.

Eastern North Carolina is noted for the vigorous growth of the vine, various abundance of its fruit, the Walter Raleigh reporting it as preeminently "the home of the grape," their abundance being noticeable in every direction. The climate is mild; extremes of heat and cold are never felt; very rarely a freezing temperature below 14 deg. Fahr. occurs, and many Winters pass without the mercury falling below 20 deg. The report of the State Geologist shows the "average mean annual temperature" of the eastern division of the State to be 60 deg. Fahr.; average for Winter, 44 deg.; and compared with the prominent grape-growing sections of the world, shows conditions as favorable as any of them while the latitudinal variations of the sections which produce the best raisons and wine, give to Eastern N. C., in the neighborhood of New Berne, a position nearly midway between the latitudes of the most prominent of them, viz:

New Berne, N. C., latitude, 35° 06' 20" being 3° 56' 20" north of Alexandria Egypt; 3° 18' 40" south of Sacramento, Cal.; about 8° 30' south of Valencia, Spain; about 1° 48' 40" south of Almeria, Spain; about 1° 40' 40" south of Malaga, Spain.

The writer heretofore has, for the past ten or more years, made a fairly exhaustive and special study of grape culture, watching the markets to note the run and range of prices; studied the character and peculiarities of the various kinds of grapes competing for popular favor as "table bunches." The conclusion is irresistible that the coarser varieties, such as 'lives' Seedling, Champion, *id genus omne*, must go; that the Delaware, Niagara and Green Mountain grapes are far more profitable than the latter by reason of their productiveness and quality, seem to invite attention. Concord, quoted in market at 30c. per lb., are not as profitable as Delaware and Niagara at 10c.; and Delaware at 10c. not as profitable as Niagara at 9c., inasmuch as the Niagara is much the more abundant bearer. One Niagara vine, after having been carefully attended to twice a week for this and the two previous years, has given a mass of fine, solid bunches of fruit, amounting to 80 pounds, or at the rate of twenty-four tons per acre, and a hundred vines to the acre (set 8x9 feet).

The yield of fruit, by the Niagara vine mentioned, was undoubtedly heavier than could be reached in field practice; the conditions may not be the same or even approximate; but given a market of good prices, it would pay to make the conditions approximate, as nearly as possible; at the rate of 24 tons per acre and sales of the fruit at 10 cents per pound, the receipts would be \$4800. Let us say one-quarter of the yield may be aimed at—or \$1200; the grower could get \$300 in growing and marketing the crop (if it raised) and still have net profit of \$700 per acre. It is both possible and probable, however, that with an expenditure of \$500 per acre in the production of a crop of Niagara grapes, to realize much more than one-quarter; six tons of Niagara grapes per acre would be so much more profitable, such an expenditure, judiciously applied.

There is always a market demand for the best, as in all pursuits; no matter how much crowded, there is always "room at the top." The poorest will not sell well, while the best goes at good prices, it would pay to make the conditions approximate, as nearly as possible; at the rate of 24 tons per acre and sales of the fruit at 10 cents per pound, the receipts would be \$4800. Let us say one-quarter of the yield may be aimed at—or \$1200; the grower could get \$300 in growing and marketing the crop (if it raised) and still have net profit of \$700 per acre. The poorest will not sell well, while the best goes at good prices, it would pay to make the conditions approximate, as nearly as possible; at the rate of 24 tons per acre and sales of the fruit at 10 cents per pound, the receipts would be \$4800. Let us say one-quarter of the yield may be aimed at—or \$1200; the grower could get \$300 in growing and marketing the crop (if it raised) and still have net profit of \$700 per acre. It is both possible and probable, however, that with an expenditure of \$500 per acre in the production of a crop of Niagara grapes, to realize much more than one-quarter; six tons of Niagara grapes per acre would be so much more profitable, such an expenditure, judiciously applied.

ROYAL BAKING POWDER
Absolutely Pure.

A cream of tartar baking powder. Highest of all in leavening strength. —Largest U. S. Government Food Report

NEW MILLINERY.
Thursday-Friday.

The attention of the Ladies is directed to the

And a full line of other fancy Groceries too numerous to mention. Thanking you for your past favors and trusting you will give us another trial, we are
Very Respectfully,
CHURCHILL & PARKER,
Broad Street.

IS
The East Carolina Railroad
A FAILURE!

They are Moving Too Slow to Ever Reach New Bern.

Can the People of the Old City of Elms Wait on them Any Longer?
Would it not be best to take our fifty thousand dollars in bonds and give it to five manufacturing industries, who will move their plants to New Bern and employ one hundred or more hands each, daily? Ten thousand dollars each to five industries of some kind would be a considerable inducement for them to move to New Bern. We have water transportation equal to any in the country. Our Railroad Commissioners give us as low rates of freight as any. We have the laboring class, both white and black here; what fear need we have to start the wheel in this direction?
Would it not be well for the city authorities to look into the matter and see if something can't be done? If the Railroad will be built and they intend to get our bonds, let them give us some assurance as to when it will be completed. There seems to be considerable doubt as to whether or not the city of New Bern is to have any more of the East Carolina Railroad than the city of Elms. There is no doubt that New Bern is on the greatest boom during her existence. Real estate has advanced from two to five hundred per cent. Not a vacant house in the city. Families have moved out of town for want of houses to live in—men, women and children. They would spend this little capital sum on 20,000 dollars railroad bonds stop the progress of so beautiful a city as ours? Why not call an election for one and vote 50 thousand more and give to manufacturing industries as above stated and employ some good men, say J. W. Waters, to travel the manufacturing cities of our country and show them the advantages our city has over any other town in the country. Our Board of Trade, Cotton Exchange and all other organizations have held meetings and advised every man, merchant and all have failed. Now put this matter before the people and let it be thoroughly discussed and voted upon and it is not carried the High Kick, who buys so many people out at 50 and 75c. on the dollar, will pay the entire expense of the election. The question is now we have got New Bern on a boom. Will we continue to boom her?

ARE YOU A KICKER?

Our \$3.00 Army and Navy shoes are good to kick WITH, but there is nothing in them to kick AT.

FOR SALE.
I have Two Good Feather Beds—live goose feathers—weights 45 to 50 pounds each. Also a No. 4 Herring & Fernal's Gate, Dexter lock, in perfect order, for sale.
