THE JOURNAL.

Printed at the Postoffice New Berne, N. C., in accordance with law.

B. B. Gordon, ex chairman of the Virginia State Democratic Executive Committee, has been extensively travelling through the South. He says "that he found this sentiment every where unmistakably in favor of Mr. Cleveland, so universally and so strongly so indeed that with the support which Mr. Cleveland will receive in the North and Northwest, Mr. Gordon declares that his renomination is inevitable."

It is as unwise, as reckless of consequences, as blind to the needs of the party and the interest of the country to force this silver discussion at this time, with nearly the whole Northern Democrats opposed to silver, as it is for white Democrats in North Carolina to pull out of the party and to run after the ignis fatui of Polk's leadership in the Third party. Both mean Republican success and Democratic defeat. The Jack-lanterns should be quiet.—Wilmington Messenger.

WAGES in this country are higher than they are in the Old World, as the Protection orators constantly assert. But so are the trees and the pumpkins and ware houses bigger. Wages have been relatively as much higher here for a hundred years, alike under low tariffs and they would be under no tariff. The greater and wider demand for labor our still uncultivated fields and undeveloped resources, the higher average intelligence and productiveness of our workmen, the spirit of our institutions, and the opportunities of our boundless continent, all combine to multiply opportunities for labor and to increase its value. Mr. McKinley has just admitted that tariffs were not intended to increase wages. If they could work this wonder wages in protected Germany and France would be higher than they are in free trade England, instead of much lower, as they are now and have always been.

THE CHINESE EXCLUSION ACT.

The theory that America affords an asylum for the oppressed of all lands seems about to be exploded. Some years ago the American party—commonly called the Know Nothing party—announced as its policy the exclusion of all persons not native born from the honors and emoluments of office. Its slogan was, "Americans must rule America." That party was of short duration, but it was not killed by its Americanism, so much as by its religious intolerance. There is now and always has been, a strong sentiment in this country against the preponderance of foreign influence. The communism that has manifested itself in some of our cities has increased this feeling of opposition until it has become active and violent hostility.

Again, and again, have the people appealed to Congress to erect barriers to the influx of foreigners, especially Chinamen, and again and again have acts been passed intended to limit immigration, but never before has so exclusive a measure been proposed as the bill that has just passed in the House of Representatives.

No Chinaman can hereafter come to this country, and should any of those who are now here go away, it will be never to return. All are excluded except the Minister and members of the Chinese legation.

The ground on which this policy of strict exclusion is sought to be justified is that the unrestricted immigration of the Chinese is full of danger both to our institutions and industries.

With the lights before us, we do not believe the danger is as great as it has been represented to be, but, if it were greater it would not justify an open and flagrant violation of treaty obligation.

We agree with the Washington Post that, "The passing of the bill in its present shape would, in this respect, be an act unworthy of the legislature of a country that boasts of its holding the foremost position among civilized nations, and while there may be reasons for discouraging the admission of certain classes of Chinese immigrants, there can be no valid reason given for a rude and dishonorable breach of treaty stipulations on the part of this Government."

CONGRESS.

All things considered, Congress is doing well. The best thing about it, perhaps, is, it is getting ready to adjourn.

The vexious silver question has been disposed of, and a breach has been made in the iniquitous tariff.

The appropriation bills are well underway. Extravagance has been checked, and the public moneys applied where they will do most good.

Republicans are employing obstructive tactics, but with little success.

It was not to be expected that the present session would accomplish much positive legislation. In all sessions preceding Presidential elections, most of the time is passed in skirmishing, preparatory to the great battle that is about to be fought.

In Mr. Cleveland's speech made at Providence to the Democrats of Rhode Island he confined himself to a discussion of tariff Reform, saying not a word about silver. His faith in the position taken by the Democratic party on this question has not abated one jot or tittle. It is the only issue to be met in November. The division in the ranks of the Democratic party on the silver question is not more radical than the division among the Republicans, who by the act of 1880 are committed to a policy of silver storage and inflation which, if persisted in, will bring about all the evils of unlimited coinage. Until the Harrison administrations have removed the silver beam from its own eye it cannot consistently find fault with Democratic inflationist, Mr. Cleveland, therefore, wisely preaches the political wisdom of doing one thing at a time. He does not hide his ideas of the 70-cent dollar under a bushel. His position as to questions of finance are well known. But the people of the United States must meet the tax question first, and settle side-issues afterward, when they shall have more time, more occasion and a clearer understanding of the merits of the matter in dispute.

The Power of Money.

What an influence for good or evil is exerted by the proper or improper use of money. It seems to be the first essential of modern life. Bad indeed is the lot of that man or that woman without money and without friends. Especially in cases of sickness is the need of money felt most pressing, and yet even the rich with all their money fall into a state of poor health and die, whereas if their money was rightly expended and the proper remedies applied they might regain health and strength.

Z. A. Clark, Atlanta, Ga., says: "I spent four hundred and eighty dollars in gold to cure me of terrible blood from a torpid or diseased liver, stomach, kidneys, bowels or blood. One month's treatment of B. B. B. healed the ulcers, restored my appetite, strengthened my kidneys and added 21 pounds to weight."

Still, in spite of this and much other testimony there are many who refuse to try the remedy, seeming to prefer to pay large fees to physicians, or visit distant springs in vain hopes of recovery. The great truth however, ever shines brightly and that is, that no one who ever gave B. B. B. (Botanic Blood Balm) a trial ever found disappointment therein.

GREAT MAGAZINE.

The Century's Programme in 1892.—A New "Life of Columbus"—Articles for Farmers, etc.

That great American periodical, The Century, is going to onto its own unrivaled record in its programme for 1892, and as many of its new features begin with the November number, new readers should commence with that issue. In this number are the opening chapters of "The Naulahka," a novel by Rudyard Kipling, the famous author of "Plain Tales from the Hills," written in collaboration with an American writer, Wolcott Balestier. It is the story of a young man and a young woman from a "booming" Colorado town, who go to India, he in search of a wonderful jeweled necklace, called "the Naulahka" (from which the story takes its name), and she as a physician to women. The novel describes their remarkable adventures at the court of an Indian maharajah. Besides this, The Century will print three other novels during the year, and a great number of short stories by the best American story-writers.

The well-known humorist Edgar W. Nye ("Bill Nye") is to write a series of amusing sketches which he calls his "autobiographies," the first one of which, "The Autobiography of a Justice of the Peace" is in November. This number also contains a valuable and suggestive article on "The Food-Supply of the Future," which every farmer should read, to be followed by a number of others of great practical value to farmers, treating especially of the relations of the Government to the farmer, what it is doing and what it should do. This series will include contributions from officers of the Department of Agriculture, and other well-known men will discuss "The Farmer's Discontent," "Cooperation," etc., etc.

A celebrated Spanish writer is to furnish a "Life of Columbus," which will be brilliantly illustrated, and the publishers of The Century have arranged with the managers of the World's Fair to print articles on the buildings, etc.

One of the novels to appear in 1892 is

A story of New York Life by the author of "The Anglioman-lacs," and the magazine will contain a great deal about the metropolis during the year,—among other things a series of illustrated articles on "The Jews in New York." In November is an illustrated description of "The Players, Club," founded by Edwin Booth, and one of the features of the splendidly illustrated Christmas (December) number is an article on "The Bowery."
