**SMOKE** Genuine Cuba Tobacco, outfit.

**THE** largest and best selected stock of Ladies' Corsets ever brought to New Berne now in stock.  
m28 BARRINGTON & BAXTER.

**ELECTRICITY** in its various forms of application, is said to give employment to 5,000,000 persons.

In all the Japanese Empire, with its population of 237,000,000, it is estimated that there are fewer than 10,000 papers.

**THE** Atlanta Constitution, the backbone of the Hill movement in Georgia throws up the sponge and declares that the Senator is beaten.

It is estimated that 1,200 persons lost their lives in the destructive hurricane which recently swept over the Island of Mauritius in the Indian Ocean.

**FARMERS** who propose following the advice of third party leaders to raise less cotton and more holl, may find it difficult to get advances on this new crop.—Augusta Chronicle.

**WHAT** possible hardship can there be in taxing large incomes? Can anybody better afford to pay than the man whose income is greater than all his need?—New York World.

**A** NEW method of census-taking has been adopted in Chicago. The authorities have decided that the population is 1,500,000, and the census-takers have been ordered to find them.—New York World.

**THE** Democrat, newspaper, on the authority of Jesse M. Gove, of Boston, "the original Blaine man," says that if Harrison does not receive a nomination on the first ballot at Minneapolis, Mr. Blaine will accept the nomination.

**THE** Newport News Sun advocates Hon. John Goode for the Senatorship. It asserts that he is the equal of the distinguished sons of Virginia named for the position in ability and in party services, of great public experience, and an orator of almost unequalled power, besides coming from a part of the State which is entitled to the appointment.

**A** BILL to place on the pension roll at \$20 a month George W. Jones, of Iowa, formerly a distinguished Senator from that State, was reported to the Senate by Mr. Turpie, and, at his request was immediately passed. The services for which Mr. Jones was thus pensioned were rendered first as a drummer boy in the campaign of 1814, and afterwards as an aide-de-camp to General H. Dodge in the Black Hawk war. He is now eighty-eight years of age, and is in generally reduced circumstances.

THE director of Warner's Observatory, Rochester N. Y., who discovered the comet now attracting so much attention, has succeeded in obtaining an excellent photograph of it. The comet has eight distinct tails, and is said to be unprecedented in astronomic history.

WE have started in the ocean greyhound buying business, and we will set up in the building business soon. Undoubtedly in this latter industry we can beat the world when we set out to do it. We did this in the old wooden ship days, and we can do it under the present conditions.—St. Louis Globe Democrat.

## LOCAL NEWS.

**NEW ADVERTISEMENTS.**  
New Berne Iron Works.  
Howard—A thing done, etc.

Weather today: Fair and warmer.

Sunday is the time for the dedication of the new Presbyterian church at La Grange. The commencement exercises of Kinsey Seminary will begin the next day.

Messrs. Bellard & Donnelly are changing the looks of the Baptist church considerably by repainting in a handsome manner the entire interior.

It looks like a regular buggy show to see the large number of them that Mr. J. W. Stewart is now showing in front of his stables. He seems to have enough in the vehicle line to enable every customer to make a selection in full accord with his tastes.

It seems that a good many schools have settled on the first of June for the commencement exercises. Those of Wilson Collegiate Institute will be held on the 1st and 2d. Hon. M. W. Ransom, U. S. Senator will deliver the annual literary address at 8 P. M. on the 1st.

Mr. Eugene Harrell, who has been at Raleigh in the interest of the Teachers' Assembly, passed through yesterday morning. The Assembly building, in common with the Atlantic Hotel, is being repainted, decorated and put in excellent order for the approaching session.

Owing to the fact that the church building will not accommodate the crowd to hear Dr. Hall's lecture, the theatre has been secured, and to pay the additional expense, reserved seats will be 40 cents and general admission 25 cents. Get your reserved seats at New Berne drug store.

Mr. F. W. Ramsey, musical director of the Five meetings and Mr. J. T. McLead, colporteur, left yesterday morning for Goldsboro to be present at the series of services being held there this week which were arranged for by the pastors at a meeting last Saturday. They are being held in the Baptist church and participated in by all the denominations, the pastors taking turns in conducting them and Mr. Ramsey holding an introductory song service.

**Truck Quotations.**  
New York, May 24.—Strawberries 10 to 15c; cabbage \$1.50 to \$2.00; peas, 50c to \$1.00; beans \$1.50 to \$2.00.  
PALMER & RIVENBURG.

**A Fire Alarm System.**

Councilman Ellis, chairman of the fire department committee has received a letter to the effect that a representative of the Gamewell fire alarm system will be in the city within two weeks to see what can be done about selling one of the systems to the city or to some stock company to be formed here for the purpose. We ought by all means to have it. To have the means of giving instant information at the engine room that a fire has broken out and where it is located would be almost equal to the addition of another engine to the department. This system is a late patent and is considered the best. It is known as the non-interference system—that is when one box is opened to give an alarm, an alarm cannot be given from any other box. This does away with the possibility of more than one alarm being sent in and thus creating confusion.

**Coming and Going.**

Mr. and Mrs. Welch, Judge Seymour's son-in-law and daughter of England, who have been visiting him left, to visit relatives in Pennsylvania.

Mrs. David and Mrs. Abbottinger of Kingston, who have been visiting the family of Mr. O. Marks, left returning home.

Mr. I. Feder, recently of New York, who has been visiting his father-in-law, Mr. M. Hahn, left for his future home in Cincinnati.

Mrs. W. B. Barrington and Mrs. H. W. Allen left to visit their father, Mr. J. M. Patrick, of Lenoir, on account of his illness.

Hon. Jas. S. Long, L. L. D., will leave this morning to deliver the Literary address before the two societies of Elm college, near Greensboro.

Mr. W. H. Oliver left on the steamer Newberne for the Norfolk, Newbern & Washington Direct Line, to attend the National Silver Conference in Washington, as a delegate-at-large from this State.

Dr. F. Warren, who has been on a pleasure trip in this part of the State, left on the steamer Newberne for his home at Jersey City Heights.

## TWO VALUABLE FEATURES.

The Music Contest and Inter Collegiate Oratorical Contest at the Assembly.

The "music contest" at Morehead for the Assembly gold medal this year will be held on the evening of June 29th and be confined exclusively to instrumental music, this being considered the better way as natural gifts give some greater advantages in vocal music and instrumental is nearer a matter of practice.

The same rules will be observed as were in force last year except that each member of the committee will be instructed to judge upon some particular point without regard to any other feature of the playing.

Any girl who has been a teacher in any North Carolina school within the past two years may enter the contest.

It is considered that those contestants will be of great value to those who take part in them, and the North Carolina Teacher states that the Assembly has no difficulty in securing a good position for every young lady who enters the contest, as the entry is in itself evidence of special musical talent, skill and cultivation.

During the day of the 29th the "Inter-Collegiate Oratorical Contest" for the Teacher's Assembly gold medal will take place. There will be eight contestants taken from the four leading colleges of the State. The University, Trinity, Davidson and Wake Forest. Each college will select one speaker from each of its two societies. The orations are to be original, each speaker preparing his own on any subject he pleases. Their length is limited to fifteen minutes. This contest is one of the new features and one of the most interesting features of the Assembly's program for this year.

An Inspiring Educational Address.

Dr. Geo. T. Winston, President of the State University, who is to deliver the literary address at the New Berne Collegiate Commencement, delivered an interesting address Friday night at the Commencement exercises of "Educational Benefactors" in which he gave a number of incidents of youths who through their own determination and gift of natural talents rose to distinction, amassed great wealth and founded noted institutions of learning. Among them was Senator Leland Stanford of California.

In connection with the statements President Winston told of similar youths now struggling for an education—one young man from Sampson county now at the University who entered with only four dollars in his pocket to get an education in four years and who, he learned, was living on one meal a day—dinner. He told of similar incidents at other Universities of young men who supported themselves at any labor that offered while prosecuting their studies and at the same time were better geniuses and better scholars than the sons of millionaires along side of them. Such pluck is bound to succeed.

President Winston is a fine scholar, a pleasant speaker and one of the best educators of the State. Our people are fortunate in having the opportunity of hearing so able a man address them at our Collegiate Institute Commencement on Wednesday the 10th of June.

**Improvements at Morehead.**

The biggest crowd and the jolliest time and the most successful session of the Teachers' Assembly ever held are expected at Morehead this year, and Mr. John O. Plank, who has charge of the Atlantic Hotel, is showing that he is the right man for the place by his thorough preparation he is making in everything that will conduce to the comfort of his guests.

The hotel is being completely repainted and the interior nicely decorated, and by a little changing about sixty more rooms will be made available for the visitors this year than before, and the hotel as far as at all needed is being nicely refurnished.

In addition to this Capt. John Eady will have two and possibly three handsome steam pleasure yachts there through this season. One will accommodate eighteen people, the other forty, and if the third is purchased, as is now more than probable will be the case, it will likewise accommodate forty; and there will be a fleet of row boats put on for the use of those who like that kind of exercise, besides the sail boats which are always ready with their services.

These increased conveniences for enjoying the pleasure of old ocean will be a great additional charm to this widely known popular summer resort.

The latest improvement decided on is the building of a tramway across to the beach. It also will be under the management of Capt. Eady.

**A True Bill.**

The grand jury at Pamlico court now in session found a true bill against Mr. Thomas Clark charged with the murder of Mr. E. D. McCoster. Hon. P. M. Simmons, representing Mr. Clark, endeavored to get an immediate trial, but this was refused by Judge Shepard on the ground that the applicant was not ready and wanted to walk farther developments on the case, was postponed to next term of court. Another man was arrested on suspicion but was released on the ground of an alibi.

**Children Cry for Fitch's Castoria**

## SOUTHERN COTTON MILLS PLAYING HAVOC IN NEW ENGLAND.

What Better Proof is Wanted that a Factory Would Pay?

The article copied below is as plain and convincing testimony as any need want that the South is advancing to her proper place as the leading cotton manufacturing section of the union. The cotton raised here has got to be manufactured by some one some where and the advantages of south fit her for doing this better than any other section. This is being realized both North and South and the days of the New England mills are numbered because the establishment of factories all over the Southern country are driving them to the wall.

Why will not our capitalists take hold of this matter, establish a factory in New Berne, even if it is a small one, and keep pace with other North Carolina cities in the development of this branch of the manufacturing industry? The manifest prosperity of the mills of the State now in operation, and the perusal of articles like the one below should afford enough encouragement and inspire with enough confidence to cause a move in a decided manner.

Read the article carefully. The testimony to the excellence of the Southern mills and the wholesome dread of their competition are points worthy of being borne in mind and reflected upon. Here are the statements as they appeared in the Tradesman:

The Massachusetts Legislature has been considering a bill to reduce the hours of labor in mills to 58 hours per week. The cotton mill manufacturers are protesting against this strenuously and their arguments before the Legislative Committee disclose what havoc the Southern cotton mills are producing among the New England plants. The facts, as stated below, should be compared to the conditions among the Southern mills, which are now in prosperous condition, paying good dividends and steadily enlarging and improving the quality of their output. It seems to settle for all time to come the controversy of where the real seat of cotton manufacture in America is to be.

J. Howard Nichols, treasurer of the Dwight Manufacturing Company, Chicago, Mass., testified that competition, partly from the Southern mills, "is so intense that a small fraction of a cent on a yard is the difference between success and failure." Mr. Nichols' success mill, and he added "for myself, I confess the outlook is not cheering, and I would not invest nor advise a friend to put one dollar into any new cotton factory in Massachusetts."

"Our men of greatest wealth are no longer getting their money into Massachusetts. They can find more profitable employment elsewhere for their capital, and they see the danger which threatens them here."

Mr. Joseph Healy, treasurer of the Osborn mills, Fall River, takes almost gloomy views, and supports it with market quotations, in regard to Massachusetts. They can find no profitable employment elsewhere for their capital, and they see the danger which threatens them here."

"The southern States today have almost, if not quite, as many cotton spindles as the cities of Lowell and Lawrence combined, and the buildings of industry in those States is increasing all the time. And when it is considered that the hours of labor in the Southern mills are from sixty-six hours weekly in Georgia to sixty-nine and seventy-two hours weekly in other localities in the South; that labor is very much cheaper there than in Massachusetts; that the facilities for transportation of finished goods made more advantageous there than here; that there is comparatively no cost for the transportation of raw cotton to the mills, and that even now the finished product of these Southern mills is being offered over the counters of New York, Boston and other leading markets in direct competition with goods made in Massachusetts, to say nothing of exportation, it will be seen that the situation is becoming somewhat serious, to say the least."

**THE SOUTH THE CAUSE.**

Following all this testimony comes that of Mr. Elliott O. Clark, treasurer of the Boott mills, at Lowell, "I simply want," said Mr. Clark, "to give you a few cold facts in regard to Southern competition, and he proceeded to give them in detail and at considerable length. "It seems to me," he said, "that the whole danger to our Massachusetts industries is from the South; that has been brought to my attention, especially within the last few years, by the fact that Southern mills are taking away my work from me. I am losing my contracts a good deal in that way. It is also the same in regard to the trade in China, because the Southern States get ahead of me."

The witness went on to explain that he had looked into the subject carefully, comparing goods, prices, etc., with those of South Carolina mills, to learn how and where he was being beaten. He continued: "There are several good mills down there. The Poolat is a good mill; so is the Clifton and the Piedmont. I looked at their goods and found they were just as good as mine. They beat me actually in speed. In the cost per pound of 13 to 23 yarn I found that they beat me out of my boots; we are not in it with them. My cotton was costing me 10.2 cents per pound and theirs 9.10 cents. The difference in the price of cotton was practically comparing goods, prices, etc., with those of South Carolina mills, to learn how and where he was being beaten. He continued: "There are several good mills down there. The Poolat is a good mill; so is the Clifton and the Piedmont. I looked at their goods and found they were just as good as mine. They beat me actually in speed. In the cost per pound of 13 to 23 yarn I found that they beat me out of my boots; we are not in it with them. My cotton was costing me 10.2 cents per pound and theirs 9.10 cents. The difference in the price of cotton was practically comparing goods, prices, etc., with those of South Carolina mills, to learn how and where he was being beaten. He continued: "There are several good mills down there. The Poolat is a good mill; so is the Clifton and the Piedmont. I looked at their goods and found they were just as good as mine. They beat me actually in speed. In the cost per pound of 13 to 23 yarn I found that they beat me out of my boots; we are not in it with them. He continued: "There are several good mills down there. The Poolat is a good mill; so is the Clifton and the Piedmont. I looked at their goods and found they were just as good as mine. They beat me actually in speed. In the cost per pound of 13 to 23 yarn I found that they beat me out of my boots; we are not in it with them. My cotton was costing me 10.2 cents per pound and theirs 9.10 cents. The difference in the price of cotton was practically comparing goods, prices, etc., with those of South Carolina mills, to learn how and where he was being beaten. He continued: "There are several good mills down there. The Poolat is a good mill; so is the Clifton and the Piedmont. I looked at their goods and found they were just as good as mine.
