school of Centenary Methodist church Cotton Factories Make Bread Winners of Former Non-Producing Consummers and Retains Money at Home.

The Norfolk Ledger copies a news item which states that girls employed in the cotton factories of Macon, Ga., ganus. even as high as \$9.00 a week and on arguments in behalf of the factories:

The above paragraph affords an idea of the benefits which have accrued to Goldsboro. kinds which have been established in numerous localities during the past ten or fifteen years. Such industries have, by utilizing the services of former nonproducing consumers, enabled a larger number of persons than was formerly possible, to become bread-winners, and the result has been that much money which would otherwise have gone elsewhere, has been retained at home to the great benefit of the localities in Hon, F. M. Simmon. which it has been circulated.

A very large share of the twenty-odd converting the half a million bales of cotton into manufactured products, was earned by women and girls, in addition to which numerous other avenues of earning a livelihood were open to cupancy by females. It is true that the field for female effort is not now water from the spring. A pitcher as wide as it will be in the future, but every year is adding to its scope and witnessing the employment of a larger number of females. At one time school teaching was about the only employ-ment that was open to white females in the South, but that day has passed and new there are dozens of avenues through which they may become in-dependent,

Carp a Nuisance.

Much has been written on the subject of raising carp and the United States States Fish Commission has been en gaged in introducing them, but as was seems that those who have them are more anxious to get rid of them than they were to obtain them. The following taken from the Baltimore Sun narrates the experience with them in Cali-CARP A NUISANCE IN CALIFORNIA.

S. C. Gillis, manager of the Laguna de Tache Rancho, says the carp which were introduced in the Kings river a few years ago have grown so plentiful that they are thinning out the ducks and almost all other water fowl except the wild geese, says the San Francisco Call. "They pervale the river in large numbers," said he, "and are very thick in the irrigating ditches. They seem to eat the grass. They devour the various kinds of small animal life, and though | We will sell our the ducks and other fowl dive down deep they can find little to eat. I can not imagine what the United States fish commission was about in sending out such a coarse-fieshed, ravenous fish as these carp are. They are certainly worse to eat than almost any fish we have in California, and they are thin-Nearly \$400 was paid out to them for are to be found in the water ditcher. They get out on the grass where there is little water, and there you can scoop them in. Some of them are very large. feet long. They eat the natural food of the duck, widgeon and snipe, and as a consequence all those are getting scarce. We need no more carp, and what we will do with those we have seems to me a great problem. They are breeding fast. Care should be taken that they are not introduced in other streams and lakes,"

> How the Pyramids Were Built. Moneyed man who was looking yes terday at the process of laying an arti ficial stone pavement in front of one of his many properties startled friend who were standing about him by remarking. "I believe that the by remarking. "I believe that the Egyptian pyramids were built in just hat way."
>
> Pressed for an explanation, he said

that while he had never been in Egypt he had read the works of all Egyptologists, including Brugsch and Piazzi Smyth, and had never found in any of them a theory which would satisfacto rily account for the manner in which the pyramids were constructed.
"Now," he said "you must remember that the pyramids are built of stone

which bears resemblance to nothing found within 500 miles of their loca tian of 4,000 or 5,000 years ago should have possessed the mechanical ingenuity to move these enormous blocks of stone from the granite quarries of Abvasinia or Syria to the pyramids. Is it not much more natural to sup

pose that the ancient Egyptians posse sed the secret of making artificial stone and that the pyramids were constructed by layer upon layer of Nile River mud, hardened by just such processes as we employ to make artificial stone and unintelligent suppositions that the stones were carried across the desert to form the foundation and base of the

I firmly believe that the Egyptians of the ante-Christian era understood the manufacture of artificial stone and that they built the pyramids out of it."
-Priladelphia Press.

Things Worth Remembering. When you feel a kind of goneness about the stomach it is a sign that your food does not sit well and that you are about to have a fit of indigestion.

When you begin to feel nervous and are unable to sit still comfortably: when your clothes suddenly seem to lose their fit and become too tight in places the fit of indigestion is surely upon you. When this fit of indigestion is re-

peated from day to day it finally resolves itself into dyspepsia. Remember that three to ten of BRAN-DRETH'S PILLS will cure the worst case

of indigestion or dyspepsis, or both, and that a regular course of them, say two every night for a week or ten days. will act as a preventive of either com-
