The subscription to the stock of the over the Union. Messrs. Hackburn and company in New Berne has been liberal Ulrich will be gone about a month and and satisfactory. There were several good subscriptions made yesterday. Mr. J. A. Patterson will leave this 1 morning to go over the State in the interest of the hotel. If other cities of the State take hold of the matter as encouragingly as New Berne has, a grand and wellequipped hotel on the surf side of Bogne Banks, with every seaside attraction, will be an assured fact at an early day.

Shipping Figs.

Figs added to the other crops that this section ships would not interfere with any but would simply make one more source of revenue during the summer sea-

Appropos of the remarks that we have made recently of the adaptability of our climate to fig culture, the abundance with which the trees yield, the large and delicious character of the fruit, and the fact that the N. C. Experimental Station is making efforts to introduce the finest foreign varities free throughout the State we think the following will come in

The New! York papers tells us that fresh figs are being successfully shipped to that city from California. If they can be sent from there why not much better from North Carolina? We have no doubt that it can easily be done, and done at a greater profit than the California growers can make.

We can grow figs in all of eastern and soushern North Carolins just as success fuly as in California. Most people agine California to be land devoid rest. But the circulars of the California Agricultural Experiment Station show that last winter the fig trees even in Southern California were worse cut back by frost than they were even at Raleigh. Figs for shipment should be just ripe and tot too soft. Each fruit should wrapped in soft tissue paper and packed carefully in the ordinary strawberry boxes and these placed in small-sized crates Shipped in this way they will go to New York in better condition than strawberries generally do, and will bring fine prices. Let some of our growers try this. W. F. Massey, Horticultarist, N. O. Agr. Expt. Station.

The Cleveland-Carr Campaign Club are requested to meet at the Court House, rriday night, at eight o'clock. It is arrestly desired that all members of the club be present, and all Democrats wishing to join us.

THE MOREHEAD MEETING.

Necessity for it - Matters to be Discuss ed and Acted Upon.

Hon. Alf A. Thompson, of Raicigh has given the News & Observer a letter on the meeting of the business men of the State which is to be held at Morehead next Wednesday. It outlines the important work which it is proposed to carry line. Mr. C. S. Hollistor, wholesale ing a few days in the city left for his out at the meeting and it is hoped that general interest throughout the State may be enlisted on the occurrent Too much cannot be said of the importance of such a meeting and its possible beneficial result to the Stat therefore we Morehead where his family are spending take pleasure in publishing Mr. Thompson's comment in full as follow

Within the past ten years, the steady increase of railroad building throughout the State has caused such rapid growth in the size and number of towns in North B. Duun, who has been spending a short Carolina that it is surprising that no such entemplated and the meeting soon to be held at Morehead City is therefore the more important, and the need of such an

organization the more urgent When it is remembered that the citie and towns are leading in educational development, manufacturing enterprises in attracting immigration and outside and electing a delegate to the State Con-capital there has never been attempted vention to be hold at Raleigh August 16. my concert of action. The most important sobject for discussion is becation and no doubt this subject will early on gage the attention of the assembly. Local taxes, especially in the cities and larger owns are, because of the introduction of warter sewerage, the protection and street lighting salready burdensome, while the State and county taxes are always heavier than in the tural districts by reason of the fact that a market value is mor easily and correctly established and to these already overburdened people the cause, while the revenue act as being con-sidered in committee, the merchants have never taken enough interest in their own mittee welfare to be present and ask a hearing until the last Legislature-and even then a very feeble effort, was made. A thor-ough explanation of this whole subject by Mr. George Davis, of Wilmington and prompt action by all the merchants throughout the State would probably

prevent this imposition in the burare. The question of attracting outside cap-ital is of great importance, and some member of the Agricultural Department could no doubt make suggestions that would be of advantage. Now that the would be of advantage. State is fairly well supplied with rail toads, our energies should be directed to the permanent improvement of dirt roads. Mecklenburg has taken the lead in this matter, and Wake has followed her excellent example. If the road superin-tendent of either of these counties would deliver an address as to the best methods and material for road building, incalcu-lable good would be accomplished With the growth of cities comes, though solute necessity for proper sanitary men also render great assistance by outline

plans which could be' generally applied I am glad to see that the growing dairy interest is to be represented by such a complished gentleman as Dr R H of stock raising, trucking, manufacturing tobacco, wine-making and retton will be equally as fortunate

When the roll is called at Morehead let every enterprising town have a reprosentative there prepared to take an active interest in the proceedings of this con

Much good as a consequence must necessarilly fresult, and a long step for ward will have been taken towards the upbuilding of the State and the general welfare of our whole people
