

SWANBORO CORRESPONDENCE.

Hunting, Fishing and Farming Items.

We will have Democratic administration next four years to come, and it is to be wished the Democrats will be prudent and not do things too rashly.

The Republican party is dead for a season, and the hope always. The 1-3 party is dead also, and we certainly have better times as coming, already cotton has advanced; wages are getting better fast, and the Southern people surely have a right to be thankful that they will have once more, an honest Democratic administration, the first in 30 years.

Already the people in our county are making preparations to apply for certain offices held by Republicans, as it is to be supposed, and rightly so, the present ones will have to get further. We hope the few Democrats who deserted as for nothing, no party, as it is called, will see the error of their ways, take the scales from their eyes, and come back and be men amongst men again.

Fishing and hog killing is the business now. Some of the largest trout are now being caught in New river, and they sell cheap, only \$5.00 per hundred. We hear they are worth double that in New Bern.

Messrs. S. Goran and A. F. Farrell have just slain some very fine fat hogs, some pulling the scales down at 300 lbs.

There will be a grand justification Democratic meeting at Jacksonville on the 8th of Dec., a free dinner for all, besides music, speaking, exercises, firing of artillery, etc., etc., remember the day, Thursday, Dec. 8th, 1892.

Deer driving is profitable now. Rev. N. Henderson killed two large ones last week, one was a very large 3 snag buck weighed 145 dressed. Mr. H. put the deer in the cart, to carry him home, when his mule got soared, ran away and tore his cart all to pieces, that was no profitable for Bro. H. Mr. I. Hines killed one the day before, still larger, but that one caused no damage, as we helped to "tote" him off the field.

WARDS MILL.

KINSTON CORRESPONDENCE.

Items Picked up Around the Town.

The broomsedge which adorned many of our side streets has recently been burned by the town authorities. We need rain now, to wash away the blackened remains.

SNOW WHITE.

The operetta, "Snow White," under the management of Miss Catherine Smith, music teacher for the Misses Patrick's school, was played in the opera house on Friday night to a full house. It was a success and thirty five dollars, net, were added to the treasury of the Episcopal church here.

PERSONAL.

Mrs. Anna L. Davis, of Trent township, spent two days in town last week, visiting Dr. Lewis' family.

New liver oysters may be had now regularly every Saturday, fresh and fat.

The "merry-go-round" has returned, and occupies its old ground. Nicotins can still be found to patronize it.

Cotton on Saturday fell to 8 3/4. This gave downcast locks to some who had been holding for 10. But we prophesy another advance by the 1st of January.

PROSITS.

There have been seven frosts in succession; but no rain. This upsets a time honored saying, "Three frosts and then rain." The peculiar state of our atmosphere, or something else, is productive of much trouble from colds, coughs, etc.

OFFICE.

No longer does office seek the man. Man must seek the office assiduously, continually, persistently, perpetually, if he gets it. Anxious care, sleepless nights, forboding fears, treacherous friends, all go along with it. Modesty is at a discount. "Brass" is to the fore.

OUR OIL MILL.

Efforts are on foot to reorganize our oil mill. So mote it be.

Get up at 3 a. m. nowadays and hear the roosters crow. You have no idea how many roosters there are in your town, till you rise at this hour and listen. It is a perfect roar. But the turkeys are quiet—Christmas is coming.

This reminds us to mention that our merchants are getting ready for the holidays and are making displays in their windows. Your reporter will write up the Kinston merchants that advertise in the JOURNAL.

ARACHEL.

Latest Returns.

While the returns show an overwhelming majority for the Democratic ticket, which ticket has shared the Republican majority and their electoral vote to the size of a hair, the only ticket which ought now to be used in company with the great Democratic victory is the one which entitles the holder to ten shares and one cent of the hair for 1.00 at the Gaston Home Barber Shop.

Shill's Catarrh Remedy. A marvelous cure for Catarrh, Diphtheria, Croup, Hoarseness, Whooping Cough, Sore Throat, and all the ailments of the throat and lungs. It is a most successful treatment of these complaints without extra cost.

THE BEST EDUCATION FOR YOUNG MEN.

Points on this Important Subject That Should Be Considered

"I believe that in the schools of applied science and technology, as they are carried on to day in the United States—involving the thorough and most scholarly study of principles directed immediately upon useful arts, and rising in their higher grades, into original investigation and research—is to be found almost the perfection of education for young men.

Too long have we submitted to be considered as furnishing something which is, indeed, more immediately and practically useful than a so-called liberal education, but which is, after all, less noble and fine. Too long have our schools of applied science and technology been popularly regarded as affording an inferior substitute for classical colleges to those who could not afford to go to college, then take a course in a technical or law school, and then wait for professional practice. Too long have the graduates of such schools been spoken of as though they had acquired the arts of livelihood at some sacrifice of mental development, intellectual culture, and grace of life.

For me, I did not believe that the graduates of the institution over which I have the honor to preside were better educated men, in all which the term educated man implies, than the average graduate of the ordinary college, I would not consent to hold my position for another day. It is true that something of form and style may be sacrificed in the earnest, direct, and laborious endeavor of the student to acquire the science, but that all the essentials of intellect and character are here fully or less happily achieved through such a course of study no man, connected with such an institution, for a moment could doubt.

"That mind and manhood alike are served in a preeminent degree by the systematic study of chemistry, physics, and natural history has passed beyond dispute. The haste with which the colleges themselves are throwing over many of their traditional subjects to make room for these comparatively new studies, shows how general has become the appreciation of the virtue of these, when combined with laboratory methods, as means of intellectual and moral training.

"I have spoken of the characteristic studies of the new schools as the best of all available means of both moral and intellectual training. I believe this claim to be one too broad.

"The sincerity of purpose and the intellectual honesty which are bred in the laboratory of chemistry and physics stand in strong contrast with the sycophantic tendencies of plantology, sophistry, casuistry, and self-deception which so insidiously beset the pursuit of metaphysics, dialectic, according to the traditions of the schools. Much of the training given in college in my boyhood was, it is not too much to say, directed straight upon the arts which go to make the worse appear the better reason. It was always an added feather in the cap of the young disputant that he had won a debate in a cause in which he did not believe.

Surely, in these more enlightened days, it is not needful to say that this is perilous practice, if, indeed, it is not always and necessarily pernicious. Even where the element of purpose and boasted self-stultification was absent, there was a dangerous and a mischievous exaltation of the form above the substance of the student's work, which made it better to be brilliant than to be sound.

"Contrast with this the moral and intellectual influence of the studies and exercises I am considering. The student of chemistry or physics would scarcely know how to defend a thesis which he did not himself believe. In that dangerous art he has had no practice. The only success he has hoped for has been to be right. The only failure he has had to fear was to be wrong. To be brilliant in error only heightened the failure, making it the more conspicuous and ludicrous."—Francis A. Walker, President of the Massachusetts Institute of Technology.

Children Need Sleep.

Children, until they are twelve or thirteen years old, should have at least ten hours sleep, eleven is better; until eighteen or nineteen, nine hours is none too much, writes Mrs. Scovill in her valuable department, "Mothers' Corner," in the October Ladies' Home Journal. In this country our children inherit nervous temperaments. No hygienic measure soothes, quiets and strengthens the nerves like plenty of sleep.

Children should never be awakened in the morning. Yet the demands of household convenience and the claims of school make it necessary that they should be out of bed at a certain hour, usually not later than seven. To make this possible, and give them their fair share of sleep, so that they will be ready to waken of their own accord, they must be in bed between eight and ten, according to their ages. If bed-time is made pleasant to them, as mother-love can make it, with a story, a little talk over the events of the day with loving words and ministrations, the hard ship of banishment to bed will be robbed of most of its bitterness. For perfect digestion use TUTT'S PILLS.

A King's Cruel Sport.

The wild recklessness and extravagance of George IV. have become proverbial in history. During one of his carouses shortly after his coronation he commanded that six of the palace chambermaids be brought before him. The order was obeyed, whereupon the king, turning to his associates, asked them to make wagers upon the ladies as to which one would smoke the most cigars in half an hour.

Upon hearing what was expected of them two or three of the maids endeavored to beat a hasty retreat from the royal presence, but were prevented from doing so by the attendants. A box of mild cigars was produced, and each chambermaid bidden to light and smoke one.

The ludicrous manner in which most of them attempted to light the weeds caused the most hilarious merriment among the courtiers, in which the monarch heartily joined. With the exception of one maid, the rest tried to light their cigars with their fingers, and in the end, only one succeeded in smoking through a whole cigar, but she had to be removed in a fainting state. The others refused to smoke more than half of theirs, to the great annoyance of the king, and his courtiers.—Pearson's Weekly.

Things Worth Knowing.

The following is a splendid liniment for children: One ounce of ammonia gum, four fluid ounces of olive oil. Dissolve together by a gentle heat and apply to the affected parts.

If you find your hands growing cold and clammy, clap them together and rub them as much as possible. Rub them well first, in hot and then in cold water, using a Turkish towel to produce friction. Nothing so good for tired eyes has yet been discovered as bathing them in hot water, and nerving in nice cases out of tea will yield to applications of cloths wrung out in water in which the hand cannot be borne.

The order of washing dishes is of some importance. Glass should be taken first, then silver, then china. After the dishes are done carefully scald, rinse and dry dishcloth and towels. If they can be dried in the open air so much the better.

Removing Unfruitful Apple Trees.

In almost all orchards, especially if old, there will be found some trees past service, and only cumberers of the ground. The sooner they are dug out the better. We say dug out, for if this is done while the tree is standing, it is comparatively little trouble. Taking out an apple tree stump is quite another matter. The weight of the top acts as a long lever to pull the tree after it begins to incline. An old axe, not very sharp, will answer for cutting roots, as the strain on them will make cutting the roots easy. When cut on one side, hitch the team to it and twist the tree half way around. This finishes the job.

Take care of your character. Do not be too much concerned for your reputation. Keep the character right and the reputation will give you no trouble. Character is everything—something that cannot be hid from God or man, that cannot be changed as we change a garment; but we carry it with us wherever we go, and by it we are known every day of our life. A pure, earnest, broad, consistent, symmetrical character—what divine glory it reflects, what blessing it confers on the world!

Catarrh.

Catarrh is a most disgusting ailment and yet many unnecessarily suffer with the disease. They will try local applications, which do no good whatever, but fail to try such constitutional treatment as is afforded by a use of B. B. B. (Bottanic Blood Balm) which removes the mucous poison in the blood and thus eradicates the cause of the disease.

N. C. Edwards, Lampasas Springs, Tex., writes: "I was greatly annoyed with catarrh which impaired my general health. The discharge from my nose was very offensive, and I used various advertised remedies without benefit until finally the use of B. B. B. entirely cured me. I am proud to recommend a blood remedy with such powerful curative virtue."

B. C. Kinard & Son, Towaliga, Ga., writes: "We induced a neighbor to try B. B. B. for catarrh, which he thought incurable as it had resisted all treatment. It delighted him and continuing its use he was cured sound and well.

Nothing is more unjust or capricious than public opinion.

We have a speedy and positive cure for catarrh, diphtheria, canker mouth and headache, in SHILOH'S CATARRH REMEDY. A nasal injector, free with each bottle. Use it if you desire health and sweet breath. Price 50c. Sold by New Bern Drug Co.

NOTICE.

Application will be made to the next General Assembly of North Carolina to charter the New Bern Steam Ferry Company, to operate a steam ferry across the Trent and Neuse rivers at New Bern. HILL HUMPHREY AND OTHERS. New Bern, N. C., Dec. 24 1892. Wholesale Market Country Produce. Cotton, 9.25a8.50c. Corn, from boats 42.1-2a7.1-2. Field peas, 65c.a81.00. Seed oats, 50c., Feed, 45c. Wheat, 70c. Rice 65c. Rye, \$1.00. Peanuts, 60c. a50c. Apples—Mattamuskeet, 75c. Onions, \$1.50 per bbl. Chickens, 45a60c pair, young, 30a50c. Turkeys \$1.50a1.75. Beef, 45c. Dressed pork, 6c. Ducks, Eng, 80a100c; Muscovy 50a60c. Geese, 75c.a1.00. Eggs, 20c. Honey, 40a45c; beeswax, 24c. Hides—Dry Salt, 5c; dry salt, 4c; green, 3-4c.

Expenses of the Oyster Commission.

Lieut. F. Winslow in a communication to the Elizabeth City Economist gives the following: So many inquiries have been made during the past summer as to the receipts and expenditures of the Shell Fish Commissioners, and so little attention has been paid to the natural desire for information on an important matter, that I suppose the enclosed summary of the receipts and expenditures may prove interesting to many of your readers. The figures are taken from the official reports of the Commissioners to the Auditor. The statements of accounts are long and ill arrayed and their publication in detail might be tedious. I have therefore arrayed the items under several heads. The account extends to July 1st, 1892 only.

Statement of receipts and expenditures of the State Fish Commission. Total receipts \$5537.23. EXPENDITURES: Personal expenses of W. H. Lucas 406.74, Personal expenses of other Commissioners 91.64, Payment on steamer to S. R. Fowle (expenses of steamer) 2174.41, Attorney fees 100.30, Salary, Capt. A. Warner 380.00, Salary, W. H. Lucas 600.00, Expenses of inspection of oyster grounds 114.50, Stationary and printing 113.65, Hire of boats 287.95, Miscellaneous 74.23.

Total expenditures \$5117.83. The steamer said to have cost \$7500, on which \$804.00 has been paid, or about the interest. Mr. Lucas' salary is \$1800 and Capt. Warner's \$730 per annum. Both have served about one and one half years and consequently have still due them from the State, Lucas, \$1200, Warner, \$700, total \$1900. It appears then that at present the financial status of the Commission is about as follows: Cr. Balance as per account \$419.60, D. By amount due on str. salaries due Messrs. Warner and Lucas 1900.00, Total \$2419.60, Less credit 419.00, Liabilities of the State \$8981.00.

Farmer Meadows' Theory? Mrs. Meadows—Did that balloon really go up at the county fair? Mr. Meadows (just returned)—It did, for a fact. Mrs. Meadows—And did the felter go up with it a-hangin' by his hands, like the picture? Mr. Meadows—Jes' so. Mrs. Meadows—An' did he jump? Mr. Meadows—Sure as shootin' I saw it with me own eyes. Mrs. Meadows—Was he killed? Mr. Meadows—Nope. Mrs. Meadows—Hurt much? Mr. Meadows—Not a bit. But I'll tell you what it is, Mariah, I really b'lieve the dude would 'a' got hurt if he hadn't been so afraid of his complexion.

Mrs. Meadows—His complexion? Mr. Meadows—Yes. He had a great big sun umbrella, an' I think that sort o' broke his fall.—New York Weekly.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

TRY BIG IKE THE CLOTHIER. BIG—THE CLOTHIER—BIG. This very bell. Rings out the knell. Of prices high, now listen. Well, Good people who in New Bern dwell, To its ding long, both loud and long. My country friends, mark to its song. And trade with me in numbers strong! TRY BIG IKE—Come all and TRY BIG IKE this Fall—TRY BIG IKE. He has one price for each and all. Your notice to this effect I call. He rings out old, he rings in new, And tries his best by all to do. Come all, no time is to be lost. He is selling Shoes, Hats, Clothes at cost. All thick and strong, foes to Jack Frost. He'll treat you right, do no man wrong. Ding Dong! I call you all day long. BIG BARGAINS at BIG IKE'S my song. DING DONG! DING DONG! ALL COME ALONG. TRY BIG IKE.

A PRETTY SURPRISE. A beautifully illustrated and charmingly bound edition of Longfellow's "Evangeline," the most popular long poem ever published by an American author, and one of the most famous poems in the language, recently published, is a pretty surprise for book-lovers. It is in large type, numerous and excellent illustrations, very fine and heavy paper, gilt edges, remarkably handsome cloth binding, combining, in delicate colors, blue and white and silver and gold. No illustrated edition has ever before been published at less than \$1.50, and that is about what you might "guess" the price of this to be, but it isn't—witness our offer below. Every home in the land ought to have a copy of this Evangeline, so charmingly beautiful, as a poem, as a collection of artistic illustrations, and as a product of the book-making art.

Our Offer. By special arrangements with the publisher we are able to offer this book to the subscribers to this paper as follows: EVANGELINE and DAILY JOURNAL, one year, \$5.00, six months, \$2.75, three months, \$1.50, WEEKLY JOURNAL, one year, 1.25, six months, 75c. Under no circumstances does this proposition hold good except where payment is made in advance.
