Economy is a good thing, but econom which haggles about the price of food when a man is starying, or the price of medicine when he is sick, or the building a dike to turn the torrent whiel sweeping down to deltige the valley be not economy; it is somethin that we haven't any name for that fits it Last year cholera raged in several countrics of Europe, it was brought to this

country but by a rigid quarantine and herculean efforts it was stamped out before it spread. We know how the coun try became alarmed then, and how read ily"it it would have spent money then t rotect the people from that scourge. Now there is every reason to believe

that cholera will re-appear with virulence again in those countries next spring and summer. It is there now, Fatal cases antine law, or law which is very defective, but better, perhaps, than none. A big streak of economy struck Congre and it refused to make any appropriation This it left for the State to do.

Our Legislature has been asked to ap propriate money to build a house at th station near the mouth of the Cape Fear and this it hesitated to do unless the city mington having done this there can be no further excuse for refusing to make the appropriation by the State. Wil-mington is interested, of course, in having an effective quarantine, but the State is quite as much interested as Wilmington for if the disease were introduced and got a foothold in this city, there is no earthly power which could prevent it from spreading to other portions of the State.
