ACCORDING to figures furnished by the Paris correspondent of the "New York Herald" the great powers of continental Europe hold as war reserve funds a sum aggregating over \$1,300,000,000. Of this France has \$400,000,000, Germany \$300,000,000, and Russia \$425,000,000. These vast amounts of treasure are permanently withdrawn from the channels of industry and commerce, and serve only as a sort of insurance to those in authority against the day of international strife.

THE INSURANCE COMBINE.

The Monopoly It is Intended to Create and the Extortion Meant to be Practiced.

There has been strong complaint about the advance in insurance rates in New Berne. Other cities are suffering likewise, and attacks are being made in various papers. We copy the one below from the Norfolk Virginian:

"The advance in insurance rates is not confined to Norfolk. The advances has been all along the line where the insurance ring or trust, disguised under the title of 'Tariff Association' has control and sway, and no reduction of the rates may be expected until such legislative action is taken in the respective States in which the companies forming the combine do business through their agents as will compel the trust to recede from its arbitrary and unjust requirements."

"Under cover of the same old chestnut of the inefficiency of the Fire Department, the combine has advanced rates in New York, Brooklyn, Philadelphia, Baltimore and many other places. But the expose of the New York Herald has clearly demonstrated that this cry of 'wolf on the part of the insurance companies as to the lack of facilities on the part of the Fire Departments of the cities named was simply employed as a blind and a snare, under the plea of which they could advance rates to whatever figures they judged proper to make."

"The combination was formed to stifle competition, to crowd out small companies, to increase rates, to enhance the power and wealth of the great companies and by the surrender of individual control of companies to an administrative board, from whose decision there is no appeal, a gigantic combine renders it powerless at present to resist unjust and burdensome exactions. It took years of deep scheming to build up the combine, it will take time to smash it, but it may be put down as a certainty that the smash will come."

A Suit Between States. There is now pending in the Federal Supreme Court a suit between the States of Virginia and Tennessee in which the former lays claim to a large tract of land now embraced within the boundaries of Tennessee.

The tract in question is a wedge shaped strip of land stretching across the Northern border of Tennessee adjoining Virginia on the South. It is 113 miles in length, 2 miles in width at its eastern end, and eight miles in width at its western extremity. One of the towns in dispute is Bristol, Tenn., which would be put wholly in Virginia if that State should win.

C.; Branden, Greensboro; and the other members of the committee are to be appointed by the President.
