PHOSPHATE POR THE DIGGING. The Sprouting Grub Worm

Discovery of This Fertilizing Material at the City's Edge - Investigate Its Richness and Move

According:y.

It is that a deposit of green sand struck which judging from appearances uniform in length. s about a score of feet in thickness.

Mr. Berry has made an examination sufficient to determine the presence of phosphite, but not to determine the perentage of it.

The State Agricultural department will do that free of charge and a supply should be sent to Raleigh for the purpose of having a perfect analysis made by the State Chemist there. This will determine whether it will pay to form a company and mine it or not. The indi cations are that the deposits lie between latter.

Mr. Berry informs us that the now not start as productive lands—they were the worm. mainly regular sandy deserts, and the discovery and utilization of just such deof the farming country of that State to its present noted fertility.

The local use of this material if it proves valuable enough to work the deposits will at last put a stop to the need of the outside purchase of phosphates, and other materials can be added to the

An early and thorough investigation should be made.

Miles Simmons, colored, of Bachelor table sprouts growing out of him, has sight. works has led to a discovery by Mr. R. The sprouts come out in the same locality senger Berry which may prove of some interest on either side of the worms at the junction of the body with the head. Those embrace Tuesday, December 5th,

> Mr. R. Berry, the best posted man in lows this region on things rare, curious and scientific, took a look at the specimens yesterday and solved the puzzle. The bells and fire alarm. vegetable growth is a parasite partaking never found except on these worms and and firemen's parade—E. G. Parmele. eventually kills each one on which it secures a footbold. Mr. Berry gives us the following short article on the matter:

"Most people, whether observant or not, have noticed the green worm on toa depth of 22 and 45, feet. They are mate vines and may have seen them with found beneath the shell rock and are of peculiar attachments standing up on an older geological period than the their backs and sides, in appearance like small grains of rice on the point of a

"This comes from the ichneumon fly famous truck farms of New Jersey did having deposited its eggs on the body of

"When the eggs hatch out, the larva or grub lives and grows at the expense of its host, and at maturity comes forth and posits as this has changed the whole face goes into the chrysalis state, the rice like attachment of the tomato worm being the cocoon of the chrysalis of the ichneumor and it very soon emerges as a new fly to again become an enemy of the tomate

worm.
"The tomato worm is the larvae of a large night-flying moth that frequents the blossoms of our local "jimson" or Jamestown weed, and it is commonly called the "Swift moth" from its rapid flight. The larvae of this moth live in the earth and the parasite in this case is a fungus that attaches itself to the grub or larvae

"This grub seems to be particularly the prey of the peculiar and particular fun-gus attached to the species at hand. "The plant as it grows, robs the grul

of lat and other matter until it finally dies of exhaustion.

insects very destructive to vegetation.

The first fight of the season between the State fishing force and the illegal dredgers has occurred in the Chesapeake. by said Board as aforesaid. As a result, Capt John Mister, of Baltimore, one of the best known oystermen Island bar, Anne Arundel county, and commenced to dredge on forbidden

When Herring Bay, near the Patuxent her sails and halted. Captain Mister following: was found dead on the forecastle, with a bullet through his head. The mate surrendered. The shooting will be investi-

A Huntsmen's Resort.

Hunters from other States continue to seek the sports of Eastern Carolina Dr. Bristol, Tenn., arrived Monday night for to lose him from the community our the purpose, purchased a suitable boat for the purpose and struck out yesterday fully equipped to go up and down the river on protracted stays and follow the spirit for all it is worth.

We have just received a letter from Cambridgeport, Mass., from a gentleman who has heard of the good hunting here, and making inquiries about it. For answer we mailed him one of Sunday's JOURNAL's. Sportsmen are likely to be more plentiful in New Berne this year than usual and it will no doubt prove a good year for a game exhibit at the New Berne Fair. There is every indication of

A Swindler on His Rounds.

A tall stoop-shouldered individual, having the appearance of a countryman, and who gave his name as W. B. Freeman, was in town several days ago en-deavoring to secure advances on bills of lading for alleged shipments of cotton and naval stores from stations on the Atlantic Coast Line He did not succeed in his scheme, and it was subsequently ascertained that no such shipments had been made.

been made.

The fellow had evidently got possession of some blank bills of lading and filled them out with the purpose of defrauding merchants whom he expected to induce to make advances. So far as known, he did not succeed in swindling any one in Wilmington. It would be well for merchants at other places to look out for him,—Wilmington Star.
