Those Snakes(?) In Snake-Bitten Dogs. Alluding to the recent article in the JOURNAL, telling of snake-like parasites being found on the livers of dogs which had been bitten by snakes, Mr. F. S. Ernul from near Vanceboro tells of a dog he owned once which was twice bitten and the dog was killed about three years after he was bitten the first time and two years after the last one and two of the parasites were then found attached to his

We have had numbers of people to tell us of similar experiences, the greater number of which we have heard being five which were found on the liver of a dog which had been repeatedly bitten One farmer tells of finding the same kind of thing attached to a hog's liver. He knew nothing of whether the hog bad ever been soake bitten or not, but says those who viewed it declared to him that was the cause.

The idea seems firmly implanted in the minds of those under whose observations the experiences came that the existence of the parasite was due to the snake bite, and no one has reported the finding of one in any dog which had not been bitten but nevertheless physicians and medical works as well as reason teach that there is no connection, between the twothat the parasite is a species of worm to which domestic animals-it seems dogs especially-are subject, (occasionally they are found in human beings) and that they are as liable to exist in an animal that has never been bitten as in one that has. The reason probably that none are reported as being found in dogs that have never been bitten is because of tack of investigation of those animals.

TRAVELLING AOTES.

Observations by Our Canvassing Agent at Goldsboro, Baleigh and Durham,

EDITOR JOURNAL: -Leaving the citshort stay in Goldsboro, seeing the famil iar faces of those I used to know, and partaking of a sumptous dinner at the Hood House kept by that most estimable christian lady Mrs. Mattie Hood, we arrived here at 5 o'clock in the afternoon, and soon found ourselves cared for in princely style at the Carrolina Hotel, the finest hotel in the State, and surpassed by few in the South. The inside work is very artistic. All hand painted, rich and perfectly beautiful.

They have near ten million pounds of smoking tobacco now on hand, beside: the mammoth amount of leaf on hand, Durham is truly a manufacturing town. Leaving Durham this morning at six clock we were soon in Raleigh where we found the Democrats jubilant over the proceedings of the State convention. We paid our townsmen townsmen Roberts a call at the revenue office and it was pleasant to be with them, and only regret that it was not my good fortune to be one of the employes in the office.
