### REFORM NEEDED.

The Expenses of the Government and Some of the Ways in Which They Should be Cut Down.

EDITION JOURNAY - Much has been said and is now being said about relation the attains of this government, to bring about relief to the people of this country The Democratic majority in Congress should carry out the pledges made to the people in 1892. They should curtail the xpenses of the government beginning t Washington,

The present salaries paid in the various epartments of the government are er irely too high for the times. If they were proper twenty years ago, they are too high now. Office-holders do not have half so much work to do now as then, for their number has increased many fold, and more than this \$5000 twenty ago would buy only about one-third is much of the new-sames of life as the one amount will now, Reforming the tariff, will have but little

Also great unifecessary expenses have been added to the life saving service which has proved useless on the coast. Is this the reform promised to relieve the distressed of this land;

The annual expenses of this govern ment are about four brindred and twenty five millions of dollars per year. Severa salaries to the amount of \$2,683,818,70. which should not on the case. There are men that the government has to aid, for injuges received during the war, who should be put at this work and save the amount to the people.

This enormous expense makes the high tariff and internal revenue and income tax necessary. We need to make public officers public trusts, and of archious duties, with reasonable salary and no mor clerks than necessary, treating it as business matter, and pay no more for i than would be paid in any other busines-When all this is done we may expect th reform promised to be consummated and he people prosperous and the light of the Democratic party restored to the people and the next election a great trimuph to
