# A Story That Hasn't Been Told—

# James Street Died After Explosive Bout With Speaker At AP Awards Dinner

### 'Skippety-ink' **Splits Audience**

(See page six for excerpts from yesterday's commentary over Station WCHL by Scott Jarrett of his impressions of James Street's last moments as he spoke before the broadcasters' meeting Tuesday night.)

James Street, author, died suddenly from a heart attack here Tuesday night just after he had been upset by the remarks of two persons at the dinner he had just been attending at the Carolina Inn.

One of these persons was the chief speaker of the occasion. The other was a prominent Raleigh radio commentator.

There was no doubt in the minds of those sitting close to Street that he strongly resented the war threats implied in the address by Yates McDaniel, Associated Press reporter at the Pentagon, the military headquarters in Washington, and was scarcely less affected by the more personal remarks made to him by W. E. Debnam, who is regularly heard on the radio from WPTF at Raleigh.

McDaniel got an M. A. degree 'Gold Rush' employed by the Durham Herald and was for some years a correspondent in Shanghai, China.
