wonder what influences are at work on army mentality. in the world, and its officers have a corre-sponding power over the lower ranks. Such Sons And Dads At Chapel Hill Chips That Fall

Bignall Jones in the Warren Record

I was standing in front of Old East at Chapel Hill on Saturday An attitude in imitation of German Nazis afternoon when a boy came down the steps, walked over and kissed ought to have no place in the American his mother on the cheek and spoke to his father. The mother was scheme of things. A citizen does not cease to pretty and I thought how young she looked to have a boy in college. Almost the first words uttered by the boy after he had greeted his

It seemed to me that I detected a slight note of irony in the father's reply. "Well then you can perhaps spare us ten minutes," and then if a little ashamed of this, a mumbling something about "your mother." It was perfectly obvious to me that the man was hurt by his son's and other military centers seem to indicate World militarism ought to find no rooms in apparent indifference, and I had to resist an impulse to walk over and put my hand on his shoulder and tell him not to let it get him down.

While a case could be made about lack of gratitude for the sacrifices made for the boy and the hunger for hos love on the part of the parents, I have no idea that the boy lacked any devotion for his parents and the chances are good that he loves them deeply. ut Bthe thing is that he is just a child turning man and filling hos own concerns.

But as I reflected upon this, I thought of another year when a close India is a fairly recent addition to the circle friend of mine told me about going to Chapel Hill to see his son, of tried instead to be a mediator between the of great nations. Its situation in Asia and its taking hime out to lunch, telling him about places of interest at the great contestants. When the history of the long history of peace with other countries Hill when he was a student there, and finally taking him to the ball time is written dispassionately it will perhaps qualify it as a counterweight to the western game. There was hurt, almost horror in his voice, as he told me, "But

> And this cry is echoed over and over again by parents as their children returning from school or distant cities spend about ten or fifteen restless minutes at home before finally uncomfortably blurting out that they thing they will go down the street for a little while and the little while turns into hours.

Without trying to pose as an expert on the matter, I would point apprehension as the war dogs try to force the ing in majesty and power while around it lie out to the parents, and better understanding of not only their own sons US and Russia into a fight, and how it is the bones of the nations that love to call them- but teen-age boys in general would save them much heartache. A little better memory would help, too. For we went away from home, too, when we were boys, and we came back and we were restless, too, as we mumbled about seeing the boys for a few minutes. And certainly fodils that come before the we loved and appreciated our parents.

Many years ago I decided that frequently given advice by students of child behavior for fathers to be pals with their sons was a bunch of hoey. A father belongs to one age and a son belongs to another and there is no bridging the gap. A normal boy wants to be with his own

merchants.

A good many business men are ities and it has helped the snal to blame for the failure of their communities to grow and prosper. They see industry, new successful stores and other marks of progress entering other towns and cities and almost invariably wonder why that doesn't happen to their town.

A good many business men can look only to themselves for the answer. Let a new store with like merchandise come to some towns and the established merchants immediately begin to fight to run the newcomer out of business by the shortest and most direct route. They fail to realize that the more successful stores a community has, the better services it can offer, the more compelling reasons there are why the consumer shops in that partcular

Saw a Dragon

A couple of decade ago there was a great hue and cry over the appearance of chain stores. The small merchant, established in the security of his own monopoly in his own community, tried to paint the chain as a vicious dragon, ready to swallow free enterprise, prepared to completely destroy the little man in business. Probably less than five per cent of the smaller merchants in today's economy will come anywhere close to espousing such an idea now.

This is not to set up two camps of "big business" and "little business," for the little merchant is still a strong part of the backbone of American economy. The independent operator, I sincerely hope, will always be the really important man in our nation. But the fact remains that the chain store has not been the terrible innovation it was supposed to be. On the contrary the chain has highest praise. Monday, Nov. 1, laying low N. C. Gets Big Share Of come derived from various som

by FBI Uniform Crime Reports which show each year that North Carolina leads the list of states in aggravated assaults by a large margin.

At least part of the explanation for this leadership in violence may lie in methods of reporting such crimes by various police departments. Thus Chief of Police Jeter Williamson of Greensboro notes that Greensboro reported 79 aggravated assaults for the period January-June, 1954, as against 220 for the same period of 1952. The reason for this apparent reduction of violence is that heretofore when a man threatened another with a knife that was reported as an "aggravated assault" to the FBI. Now Greensboro no longer reports such crimes as coming in that category.

The definition in the FBI Uniform Crime Reports of "aggravated assault" is as follows:

Includes assault with intent to kill; assault by shooting, cutting, stabbing, maiming, poisoning, scalding or by use of acids. Does not include simple assault, assault and battery, fighting, etc. If other police departments in

North Carolina included threats with knives, et cetera, under "aggravated assaults," and police departments in other states did not, then it is easy to see how North Carolina attained its apparent pre-eminence in such crimes. If other Tar Heel citics follow Greensboro's lead in reporting, this state's relative position in violence can be corrected and made to conform more to the facts.

As it is the Seminnual Bulletin of the Uniform Crime Reports covering the period January-June, 1954, shows the following urban crime rates in aggravated assaults per 100,000 inhabitants:

North Carolina	Ba Baras 71 at	161.7	
Virginia		118	
Georgia		106.3	
South Carolina		50.2

In the developlished interests, may for a time block an unavoidable development of human society, knowledge and the fruits of knowledge ment are revolutionary elements.

They have proved to be forces which time and again have driven man from his Eden of accepted forms and privileges. They have led to the creation of new forms of social order that succeed one another in response to the forces set in motion by new conquests for knowledge.

Optimistic Faith Lost

Goethe's Faust, that symbol of modern man, would be lost to Mephistopheles if he were to yield to the temptation to resist the eternal flux of life and pray that the fleet, "fair" moment would be his forever.

We have lost the optimistic faith held by some of our predecessors that new knowledge would necessarily-almost automatically-lead to new progress in civilization. We have learned that whether changes resulting from knowledge will be for the better or worse finally depends on ourselves.

The very fact that we feel this burden of responsibility, and see more clearly the dangers with which we must cope, increases the temptation to resist change-and to fear knowledge.

We have seen among us the resurrection of practices and attitudes belonging to, indeed justifying, the name of the Dark Ages.

In losing the easy optimism of 185,671. a preceding generation, we must not act as though we had also lost the deep conviction of our predecessors of the value of knowledge.
