Fat Calf Chows

857 Calves Can't Be Wrong

Tests have been completed by Purina to find just what the feeder can expect from Fat Calf Chow. These on-the-farm demonstrations, ran throughout the country, showed us that the average feeder can expect about 2.15 lbs. daily gain.

Some feeders make a pound of beef on less feed . . . some used more feed. But the good, fair and poor feeders all averaged together, made a pound of beef on only 5.7 lbs. of Fat Calf Chow. With good management, local feeders should be able to do equally as well, even better.

MAKE IT... LONG MEADOW Milk

"Stop that (Long Meadow Route) man" for Home Delivery

Ferris wheels twirl against the sky . . . children munch long streamers of pink and white cotton candy . . . and there are apples on a stick and prize competitions, to say nothing of the animals with their blue ribbon awards.

The Fair is part of summer . . . when crowds throng the old grounds on the far side of the railroad tracks and girls hold hands with their fellows and older people smile, and younger ones literally have a field day.

God smiles on fellowship such as this. And in His Church, he offers the greatest fellowship of all. Here men may join together in prayer and worship, giving thanks for blessings, finding consolation in sorrow, renewing their strength, reaffirming their happiness through faith.

THE CHURCH FOR ALL . . . ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive.
