WORDS OF WARNING!

WORDS OF WARNING!

**BEWARE OF FRAUDULENT IMITATIONS!**

The success of RADAM'S MICROBE KILLER has brought out many worthless imitations. Some of them are positively injurious, and we give this warning that the public may not be deceived. See that every Jug has our trade mark on it, same as above cut.

CAUSE OF THE DISEASE AS GIVEN BY THE SCIENTIFIC MEN OF THE AGE.

Monsieur Pasteur, who for years has made them a special study, first discovered that minute insects were the causes of spreading the most deadly contagions through their astonishing rapidity of reproduction. Pasteur discovered them in myriads in human blood, in sheep and rabbits and rats. He found the Microbe was the direct cause of the Variolosis, or Smallpox—Bronchitis, Yellow Fever and other contagious diseases.

The Microbe in the human system attacked by Variolosis, is thread like, cylindrical, somewhat swelled. It is the smallest of all powerfully magnified animal organisms. It breeds by the thousand per minute. Pasteur, after making a close study of the Microbe, discovered that the quickest way to exterminate them was by the free inhabitation of Oxygen gas, or by liquids charged with that gas; but admits that the time must come when some powerful liquid will be discovered that will effectually destroy the Microbe, and that liquid must contain such gaseous combinations as will directly destroy, in the human body, those germs or microbes of disease.

Dr. MacLangan, a prominent member of the Royal College of Physicians and surgeons, says:

The idea that many of the diseases to which man and the lower animals are subject result from the presence in the system of minute organisms or microbes is not a new one.

The introduction of the microscope, the discovery of the Yeast plant, and the further parasitic nature of many cutaneous diseases have proved conclusively that it is attributable to the Germ or Microbe Theory of Disease.

This theory has positively proved that many diseases are due to the presence and propagation in the system of minute living organizations. It is essential, therefore, to become thoroughly acquainted with the class, kind, very competence of the Germs that produce what is now termed the Phenomena of Disease.

Contagion, Infection, is created, by absolute experience and scientific experiments and proofs, by the existence of minute organisms or microbes. The contagion or microbe being irregularly scattered about in the atmosphere, it is evident that the inhalation of one or more of these particles is purely a matter of chance. Yet such inhalation, no matter how

healthy and strong the man or animal thus inhaling it, will, as a matter of course, be stricken down, sooner or later, by the myriads of microbes that will, according to the contagious poisonous matter inhaled, breed into his system. To exterminate those it has been found that liquids strongly impregnated with gases and alkali have been the most efficacious, and it is but a matter of time when a liquid strongly impregnated with those substances will be discovered that will effectually destroy the microbes or Germs of disease.

It is an organic form of such extreme minuteness as to be classified under the head of Micrococci. The Microbe is aperiodal, transparent and of a gelatinous consistence. It enters the human system by inhalation, or exists in the water or milk we drink or the food we eat. It is able to stand the greatest amount of heat. By the careful study and frequent experiments microbes have been induced by ivory needles into meats that have been thoroughly roasted and boiled, and yet, when taken from the ovens, pans, griddles or pots, the microbes have been found to be yet alive and propagating, thus showing that even cooking has no effect on them.

Prof. Tyndall says of Microbes: They are found in myriads and countless shapes, floating in the air, destroying man, as well as beasts and vegetation. The virtual triumph of the antiseptic system of surgery is based on recognition of lying contagia or microbes, as the agent of purification, and the discovery made, it behoves the closest study of the subject by the physician, surgeon, chemist, agriculturist, in fact by all men, to discover some powerful liquid substance, having charged with some so far discovered gaseous substance that will penetrate through every tissue of the human, animal or vegetable system, and effectually destroy the death dealing pest, the microbe.

The word Microbe was first introduced by Prof. Charles Sedillot and endorsed by the great philologist Littré, who caused its adoption by the Academie de Sciences of France, and thus had it admitted as a scientific term to be used by all scientists.

Science has taught us that the direct causes of contagious diseases are directly attributable to a minute, invisible, yet death-dealing insect, feeding, living on the germs of corruption inhaled, absorbed in the system, whether human, animal or vegetable. It is designated in science as the

Microbe, the most deadly of all animalcules, propagating by millions and spreading disease wherever it makes its appearance. The extermination of that curse to the human race has taxed the ablest scientists, who have devoted hours of study in each and every branch of their different researches to check the frightful inroads made by the Microbe upon whatever it attacks.

Wm. Radam, a florist and a botanist of Austin, Texas, who, from his early boyhood, had been brought up to take care of and watch tenderly over the plants, seeding slips, that were extensively grown in his father's world-famed nurseries, having frequently seen his favorite plants suddenly droop and die, was the first to make the Microbe his special study, and its extermination the object of his life.

Fortunately for William Radam, he was able to command the means that enabled him to purchase the instruments needed to perfect his experiment, as he patiently advanced in his studies of the microbe. He was not the man to rely merely on book learning, though he studied the theories advanced by scientists.

William Radam, after years of patient study and analysis, found the true origin of the Germs of Disease, and by a secret inspired by Nature's close study was able to produce what will be read below as the exterminator of the dreadful scourge Microbe—as recommended by the greatest authorities and world-famed authorities on that subject, who all admit that to exterminate the pest and scourge requires just such a liquid, surcharged with gases, as William Radam's Microbe Killer.

TESTIMONIALS.

Now read the testimonials and convince yourself if they are genuine or not. Please investigate. I will forfeit \$1,000 if you find any of our testimonials not genuine. We will give address, so that you can write to them. Please do not forget to enclose a stamp, and you certainly will receive an answer. We have a great many other testimonials in our office and have the consent to show them to the afflicted—but have no authority to publish them. From the following testimonials you can see at a glance that this medicine cures every disease.

CONSUMPTION.

PASADENA, May 13, 1889.—Microbe Killer Co: I can recommend Radam's Microbe Killer for the cure of consumption. I have been sick four years. I have employ-

ed the best physicians in San Francisco, San Jose, Los Angeles, and am now taking my fifth jug of William Radam's Microbe Killer. I have gained fourteen pounds in three months, and I note a steady improvement. The medicine has accomplished more for me in the short time I have tried it than all the doctors and the outlay of \$7,000, and I hope all my friends who are afflicted in the same way I was, will use it.

J. F. RENOULT.

Formerly of San Francisco, now a resident of Pasadena.

LYNCHBURG, TEXAS.—Messrs Wallace O'Leary & Co., Agents Radam's Microbe Killer, Houston, Texas: My sufferings from dyspepsia and bayou fever made my life a misery, and at times I was so despondent as to care little to live, when I heard of your great medicine, and purchased a gallon. It gives me pleasure to inform you that before a gallon had been used \$1,000 could not have bought the remainder of the gallon had I not known where to get more.

Yours truly,

CAPT. GEO. L. SMITH.

GALVESTON, TEXAS, March 10, 1888.—A. Behrends, Agent for William Radam's Microbe Killer—Dear Sir: I have been suffering for years with a complication of diseases which originated from a diseased liver. I had dysentery, bloody flux and internal tumors. I consulted some of the most eminent physicians in the city and used their medicines for a long time without getting any relief. I was finally given up to die, when a friend advised me to try the Microbe Killer. As the last resort, I gave it a trial, and the relief it gave me was wonderful. When I commenced to take Microbe Killer I weighed only eighty-six pounds; my present weight is 146 pounds, and I am restored to my usual good health.

JOHN W. DERRICK.

Sworn to and subscribed to before me this 10th day of March, A. D., 1888.

JOEL A. CAPLEN.

Notary Public, Galveston County, Texas.

DEAF AND DUMB INSTITUTE, AUSTIN, TEXAS, July 11, 1888.—Mr. William Radam—Dear Sir: I certify that I have been a great sufferer with pains in my chest, catarrh in the head, and headache for years. I have spent hundreds of dollars in travelling in Colorado, Utah, California, Oregon, Montana, Wyoming and Minnesota, and found no relief. I have used four gallons of your medicine and I am almost entirely well. My headache and catarrh are gone. I am still using the medicine. I will

send another gallon to my brother.

W. H. LACY, Superintendent.

HOUSTON, TEXAS, October 9, 1888.—Messrs. Wallace, O'Leary & Co., Agents William Radam's Microbe Killer—Gentlemen: I have been using the Microbe Killer for malarial fever and general debility, and write you to certify that I am again strong and healthy, and am satisfied the Microbe Killer is a sure remedy for those diseases.

R. E. LEE, Prop. Capitol Stables.

LEPROSY.

The only case of Leprosy ever known to have been cured by any medicine. James Kavanagh, Jr., is now entirely recovered and is back again in New Orleans. We are treating five other cases of Leprosy, all successfully.

FIFTH DISTRICT, NEW ORLEANS, July 24, 1889.—To whom it may concern: I positively assert that my son was afflicted with that most hideous and loathsome of diseases, Leprosy, and of a character most malignant. Any person who may be skeptical regarding this case is most cordially invited to call and see him now, or at an early date, at my residence, No 157 Eliza street, Algiers, Fifth District of New Orleans, because if not seen soon and he continues to use Wm. Radam's Microbe Killer, they will not have an opportunity of giving an honest verdict concerning his case.

Respectfully,

JAMES KAVANAGH, JR.

Radam's Microbe Killer Co—Gentlemen: My son, 14 years of age was cured with less than one gallon of Radam's Microbe Killer, after being given up by physicians as incurable with enlargement of the heart. My wife was also cured of a severe bronchial trouble, after a failure on the part of the physicians to relieve her.

I confess it far superior to all known remedies.

R. B. KIRKPATRICK.

RHEUMATISM.

Sacramento, Cal., April 27, 1889, November 14, 1888.—The William Radam Microbe Killer Co.—Gentleman: Having tried every suggested remedy for Chronic Rheumatism for more than ten years, I was dubious as to the efficacy of your Microbe Killer, but am frank to admit that a cure (and I earnestly trust a permanent one) was the result after having taken not quite the entire jug you sent me according to directions. Accept my thanks. I am, dear sir, respectfully yours.

FRANCIS P. DOOLY, Knoxville, Pa.
