HANDLE WITH CARE

We're working mighty hard these days on a big job we've got to deliver—our \$300,000,000 expansion program. It's an all embracing program that will provide better telephone service and telephones for all who want them.

The job ahead of us is one that must be handled with care. The vast sum of money involved places a heavy responsibility on both management and employees. It will be spent wisely and cautiously and with the same care that has always characterized your Telephone Company's operations.

There is also the responsibility of maintaining adequate earnings so that the funds needed to build more telephone facilities can be secured. The money will have to come, as it has in the past, from thrifty people putting their hard earned cash in the Telephone Company. But unless they have confidence in the safety of their investment and feel assured of a reasonable return on that investment, new funds for future telephone expansion will not be forthcoming.

So it is easy to see that telephone earnings have a direct bearing on the future of telephone service.
