**CHEVROLET TRUCK QUALITY**

**You can see the difference wherever you look**

If you believe various makes of trucks are pretty much alike, you aren't doing justice to your pocket-book. There are differences.

A Chevrolet truck welcomes comparison. Look at the little things on it—latches, hinges, stitching in the upholstery. Notice how strong the tailgate is, the rubber encased chains that keep it from sagging. The body floor is made of select wood to eliminate the rust problem and give you better footing. The lower side panels are double-walled; you might dent the inside but it won't show through.

Chevrolet designs suspension systems to fit your need. The light-duty type is strong on comfort. Another kind for heavier trucks stiffens up as you increase your load and vice versa. Make sense?

If you are going to need a new truck this year, you should look at the quality Chevrolet has to offer. May we bring over a new '63 so you can examine it?

**2 NEW 8-CYLINDER ENGINES**

- New High Torque 230-cu.-in. Six is lighter but more powerful than its predecessor. It is standard in Series C10 through C60 models.
- New High Torque 292-cu.-in. Six—most powerful truck 6 Chevrolet has ever built! Standard in Series C60, optional at extra cost in lighter models.
