### Reeping Home Records

Did you make some New Year's resolutions this year?
Now that a month has passed, how well are you keeping them?
Mrs. Kay Riggle, home management specialist for the Agricultural Extension Service at N.C. State. says some resolutions are just like cheap toyssome of them are not made well and are easily broken. Did you make any resolutions for planning your family spending and keeping family records this year?

Mrs. Riggle says that the first

Mrs. Riggle says that the first of the year is the time to think about the family business affairs. Do you have a place for your business papers? Can you find all of them quickly.

Do you spend valuable time hunting for scattered receipts or important papers that you stuck somewhere. Lost receipts bills or important papers of-

ten add up to lost time and wor-ry. You usually need them when you don't have time to hunt for them.

It is necessary to keep sales Fewer Boll slips and receipts so they can be found when needed. Mrs. Riggle says it helps to have a special place to keep the warranties for your appliances. ranties for your appliances, And you should know where the nearest service center is for

each appliance,.
Now that income tax time is Now that income tax time is here you will need information. Mrs. Riggle says that if you have the farm and home business papers easily accessible, you will save yourself a lot of trouble.

Mrs. Riggle recommends that you get your business papers in order. Work out some simple filing system that will meet your personal needs.

She says the first step is to

your personal needs.

She says the first step is to throw away circulars and other papers after you read them. That is, the papers that will serve no further purpose. Then find a convenient place for current records and unfinished by the could be deep. business. This could be desk drawers or built-in drawers or filing cabinets next to your writing desk or table.

But no matter how little space you have, Mrs. Riggle says you should plan for an area where you can keep your family busi-ness papers. When you sit down to work on your records, you should have everything within easy reach--pen, ink, waste-basket, envelopes, labels, calendar, rubber bands, and paper

Tar Heel cotton growers can start the new year with one bit of comforting news.

Fewer boll weevils went into hibernation this winter than last year, according to a survey conducted by the U.S. Department of Agriculture.

Average counts in the Piedmont region of the Carolinas were 968 weevils per acre, down drastically from the 1962 count of 8,631. In north-central North Carolina, the '63 average North Carolina, the '63 average was 1,263 compared with 5,-

Coastal Plain farmers, USDA says are not quite as lucky---Weevil numbers there averaged 10,000 as compared with 12,-

207 a year earlier.

Boll weevil damage in 1963 was relatively high, Entomologists say that low weevil numbers and timely control efforts helped keep crop losses down.

Entomologists from USDA's Agricultural Research Service check on the number hibernating each year by taking samples of woods trash adjacent to cotton fields.

The number surviving the la-The number surviving the winter, combined with weather conditions during the early part of the cotton fruiting period, will determine potential boll weevil damage to the 1964 crop.

Falcon proves it's America's toughest compact in the rugged Monte Carlo Rallye!

Falcon entered two classes in Europe's 2,700-mile winter ordeal—won them both and finished 2nd overall out of 299 cars. That's durability!

In the Rallye's five special Alpine sections, Falcon was first overall in four, tied for first in one. That's roadability!

In the Rallye's final test around the Monte Carlo racing course, Falcons were first and second. That's maneuverability!

MONTE CARLO—The 38rd Monte Carlo Rallye started with 299 cars. Some 2,700 miles and 334 days later,

SHEFFIELD MOTOR CO

Warsaw, N. C.

only 163 were still in the rally when the field struggled into Monaco—but they included all eight of the specially equipped Falcons that originally started!

This eight out-of-eight record was perhaps more remarkable than the fact that, despite a handicap formula that favored the smallest cars, a Falcon captured second place overall. One car can have luck ... but eight have to have total performance. Because the Rallye samples every variety of weather and road conditions the continent can provide, and because it winds up on the most remote byways in the French Maritime Alps, it is a supreme test of all the car's abilities. Falcon steering had to be flawless on glare ice above a 1,000-foot drop. Those fabulous V-8's had to run like dynamos.

The final results in the Monte Carlo Rallye gave Falcon 2nd place overall, lst in Class 8 of the Touring category, 1st and 2nd in Class 5 of the much tougher Grand Touring category, 1st and 2nd in the final three-lap test on the Monte Carlo circuit. The best finish

by a Valiant was 88th overall. Falcon gained invaluable experience in how to build a car better, make it tougher, sharpen up its total performance. That's the real reason Ford is interested in open competition—and why Ford-built cars have got so much more to show drivers. Drive one and see; it won't have six lights, or a horn you can hear for four miles in stormy weather, or the other special rally equipment—but it'll sure surprise you!

TRY TOTAL PERFORMANCE FOR A CHANGE!
