FFC HENRY L. WARREN FAIRCHILD AFB, WASH. — Army Pfc. Henry L. Warren, son of Mrs. Beulah M. Warren, 113 Slocumb st., Mount Olive, N. C., was assigned to the 43d Artillery at Fairchild Air Force Base, Wash., July 28.

Warren, a teletype operator in Headquarters Battery of the 43d Artillery's 1st Missile Battalion, entered the Army in November 1962 and completed basic combat training at Fort Jackson, S. C.

The 24-year-old soldier, son of Edward Warren, 1911 Doulphin st., Philadelphia, Pa., is a 1960 graduate of Carver High School in Mount Olive, N. C.

railroad and airline industries in connection with collective bargaining agreements on rates of pay, hours of work, rules, or working conditions.

The positions pay \$8,410 a year. Six years of experience in making labor agreements or in negotiating with management or employee representatives in application of them are required. A bachelor's or higher degree in certain related fields may be substituted for three years of this experience.

The experience, other requirements, and conditions of employment are outlined in detail in Announcement No. 337-B.

Dr. Dallas Herring Praises Marine Technology Program and "Advance II"

The Marine Technology Program, under the Cape Fear Technical Institute here, will go "full speed ahead" this fall since federal officials Friday assigned an 185-foot navy surplus ship to North Carolina for the program.

Expected to draw students all along the Eastern seaboard, the special Wilmington program is designed to train men in the various marine industries.

The ship used in the program will serve as a "floating laboratory" and will be docked along the waterfront in downtown Wilmington at the Institute's new site.

Called "Advance II" after a Civil War blockade runner which made numerous trips to Wilmington, the vessel will make periodic runs up the coast to such points as Morehead City and Elizabeth City.

Both technical studies in the classroom and practical experience at sea will be provided in the program which offers two-year degrees in various marine occupations.

Classroom instruction will include navigation, marine engineering, mathematics, electronics, physics, chemistry, marine biology, oceanography, car-

ography, fishing operations, and seafood processing.

All phases of navigation-including piloting, dead reckoning, rules of the road, compass and compass error, electronic navigation, and celestial navigation will be studied.

In marine engineering, the student will study gasoline engines, diesel engines, generators, auxiliary engineering, and electricity.

Marine biology will involve the study of the marine plant and animal life, while students taking courses in oceanography will study bottom bathymetry, currents, and temperatures, salinity, chlorinity, and plankton.

Operations at sea in the "Advance II", will include practical seamanship, navigation, fishing operations, and collection and processing of data in connection with marine biology

and oceanography. Chairman of the State Board of Education, Dr. Dallas Herring of Rose Hill, said, "I hope the Advance II will inspire the people of North Carolina as effectively and serve them as well as her namesake did a century ago."

He added, "Let us also hope that she will bring advancement in education to hundreds of young men whom the state hitherto has neglected in terms of their special talents and needs and the state's own need to unloose the wealth of the sea."

The Marine Technology Program will start September 19. Applications are now being accepted by Clarence E. Dodgens, Director of Student Personnel, at the Institute's present address at 9 S. 13th St., Wilmington.

MILK PLAYS VITAL ROLE IN DIETS

Meringue shells, coconut and chocolate cups and orange shells have been used by homemakers in Washington County to show special ways of serving ice cream. Mrs. Frances Darden, home economics agent, says they have been emphasizing milk desserts this summer.

The most popular and economical dish has been the frozen lime ice - using a quart of whole milk with a package of lime jello. "The variety of ways of serving lime ice and the ease of preparation has made it our favorite dessert," reports Mrs. Luther Leary of Sunny Lane Club.

PLANNING GUIDES

"A person with a busy mind would never have a convenient kitchen because easier work in the kitchen is the result of careful planning," says Mrs. Martha Mc K. Harris, home economics agent. The Montgomery County homemakers have found that kitchen fatigue results from retracing steps, and continually bending, stooping and stretching.

Each person attending club meetings scored their present kitchen considering the work centers, storage in the kitchen and correct standard work heights. Mrs. Harris says they plan to get the "planning guides" to contractors in the county.

CLOTHING PROJECT

Some 25 girls in Franklin County are taking clothing as a project and have been receiving help from 4-H and Home Demonstration clothing leaders.

Mrs. Bernice Harris, assistant home economics agent, says 19 of the girls attended a 2-day workshop and all of them made a dress. "Many of them had never sewn before so they learned to fit the pattern, cut the garment out and use the sewing machine."

GOALS ACHIEVED

Mr. and Mrs. Charles Simpson, Marshville, Rt. 2, have been working on an addition to their home.

Mrs. Rebecca Mooney, home economics agent, says that by

careful planning before construction started, Mr. and Mrs. Simpson will have a well planned kitchen-family room combination. A built-in, L-shaped cabinet unit will include a sewing unit, study unit, business and recreation center.

NEW COMMUNITY CLUB

Rocky Pass Community Development Club members have one of the largest community buildings in the area. Miss Rachel Keisler, home economics agent, says the building has recently been completed by the 60 families living in that area of McDowell County.

Miss Keisler says they are working hard to finish paying for their building so they can begin work on a recreation area which will include tennis courts, baseball field and eventually a swimming pool.

FLOOR CARE

"How is the best way to clean my floors and should I use wax? Questions concerning the care of floors are constantly being asked as a result of many new floor coverings which are appearing on the market."
