

Meet Your Duplin County Merchants

Introducing Brewer Feed Service

Faison, N. C.

Brewer Feed Service, custom grinding and mixing using Nutrena Feed Products and concentrates; dealers in Blount's Fertilizers, the "Shortest Route to Better Crops;" and Agrico, the "Nation's Leading Fertilizer;" seed, insecticides and Hess and Clark animal health products, is located on Highway 117 in Faison.

They have the equipment and knowhow to apply liquid nitrogen; all kinds of farm post, both treated and cedar; Pax Hog Feeding Equipment, which features all steel bottoms, "built to last 30 years."

Brewer Feed Service features "on the farm" grinding and mixing. This service has proven to be the difference between profit and loss in many livestock operations. Their Daffin Feed Mobile Unit, operated by Donnie Cannady, can travel directly to your farm and with your grain grind and mix a complete ration for all poultry and livestock right on your farm using Nutrena feed concentrates. This service gives you the right feed for your poultry or livestock at low cost because most of the ration is your own grain and with good results, because all rations are backed by years of Nutrena research. This permits the using of the proper amount of concentrates according to the age and weight of your stock or fowls, not only saving you handling time and expense but is usually approximately half the cost of the same service offered by stationary mills.

Nutrena Feeds are a product of Nutrena Mills, Inc., a subsidiary of Cargill Grains, Inc., the largest feed and grain dealers in the United States. Nutrena has recently completed a modern push-bottom mill in Wilson, N. C., with a capacity in excess of 100 tons of feed a day. This convenient location saves in transportation costs and guarantees for this area a fresh product at very economical prices.

Nutrena has feed available for any animal or bird. They supply feed especially mixed to help you feed your grain more profitably. Hogs respond dramatically to rations mixed according to Nutrena research. As hogs grow, their nutritional needs change, and rations must be changed accordingly to make every kernel of your grain pay. Their line includes a hog feed mixed especially for the sow, then the right feed for the pigs from birth to market. Their products include feed for broilers and feed for commercial layers, poultry and turkeys. Nutrena dairy feeds include a milk replacer, calf grower and starter ration. They have beef-cattle rations and feeds for all animals and fowls, including rabbits and horses, all backed by Nutrena research, quality and tests.

If you prefer not to use your own grain, Brewer Feed Service will deliver in bag or bulk complete feed for any animal or bird within a thirty-mile radius of Faison. Their large warehouse is located on Highway 117 in Faison, just across from Faison Animal Clinic, operated by Dr. Donald Taylor. The warehouse is conveniently elevated for ease and simplicity in loading and unloading directly on your truck. This warehouse is managed by Graham W. Sutton, formerly of Suttontown.

They warehouse and have available at all times pure Menhaden fish meal, cottonseed meal and soybean meal to help meet all your feed requirements.

Brewer Feed Service was organized in 1960 by members of the late E. C. Brewer Family. The firm began as a dealer for Nutrena Feed Products, but has since expanded into fertilizers, seed, insecticides, feed equipment and animal health products.

The firm has continuously grown since its organization, and just last month, Louis A. Brewer, manager of the firm, was awarded an all-expense-paid trip for him and his wife to New Orleans for one week for having the largest percentage increase for the past fiscal year of any Nutrena Dealer in North Carolina. Sales were up approximately 75% over the past fiscal year.

Blount's Fertilizers are produced in Greenville, N. C. especially for Eastern North Carolina soils and weather conditions. This "Shortest Route to Better Crops" is producing very satisfactory results.

Agrico Fertilizers are produced by the American Agricultural Chemical Co. and they have fertilizer plants throughout the world. Because of their tremendous volume and large research departments, they produce an excellent fertilizer at most economical cost. Their agronomist will take samples from your land and make recommendations for your requirements.

Brewer Feed Service will finance all sales with payments and terms to suit your conditions, usually as dictated by the customer.

It is much more effective to stop disease and parasites before they start than it is to cure the trouble they cause. Brewer handles disinfectants, insecticides, rat and fly killers, etc. to help prevent disease and check the breeding of insects. They have minerals, vitamins and medication to mix with your feed or put into water or feed free-choice.

They have the proper ingredients and materials to meet your every animal and poultry need. Drop in and talk to Mr. Brewer and see how quickly your feed or medication or fertilizer problems can be solved.
