# Two reasons for buying an electric heat pump...

## 1. Heating 2. Cooling

Take a top-quality heating system, combine with a first-class cooling system and what do you have? An electric heat pump.

The flameless electric heat pump is a single compact unit that both heats and cools your home. It does so with no fuss, no bother, no seasonal adjustment or fueling. One setting of the thermostat and the system switches from heating to cooling and back again... automatically.

If your old furnace is giving you problems, modernize with the electric heat pump. Call us or your heat pump dealer for more information.
