**Homemakers Club Meets**

"What's Time---Money Satisfaction or?" was the title of the demonstration given by Mrs. Perry Grady Home Management Leader when the Summerlin's Extension Homemakers Club met Thursday for the Monthly meeting. Mrs. J.W. Pate, and Mrs. D.L. Cherry were co-hostesses at the meeting held at the home of Mrs. Pate.

"Onward, Ever Onward", Club theme song was sung by the group. Mrs. Eddie Goodman Family Life Leader led the devotions with Scripture taken from Psalms. During the demonstration Mrs. Grady stressed the importance of using time wisely. Time is made available; it is up to you to get the most out of it. Time is always passing; it never returns. Time can be wasted just as money, energy, and materials are wasted. Time can be measured and therefore, apportioned to the things worthwhile for you and your family. "We always have enough time, if we will use it right."

The International Leader, Mrs. Carl Ivey gave information on Vietnamese Geography, and The Revolutionary Development of the Republic of Vietnam. Mrs. E.J. Summerlin, Arts and Crafts Leader, reported, and urged each member to participate in the Christmas Fair to be held November 8, at the Agriculture building in Kenansville.

Mrs. Gideon F. Cherry and Miss Majorie Cherry were visitors at the meeting.

Coconut cookies, Neopolitan ice cream, halloween candies, and toasted nuts was served during the fellowship hour. The halloween motif was carried out in decorations of the home.

**Natural Beauty**

Remember, the natural beauty of the landscape need not be sacrificed in the rapid growth of our country and its communities. Your soil and water conservation district, assisted by the Soil Conservation Service, can help with the planning that is needed to include conservation and beauty in private or community development. Contact them before construction begins.

**Sediment Pollution**

Sediment is the major source of pollution in the nation's water supply. You may call it mud, but when it gets into streams, it endangers all beneficial uses of water.

Some of this pollution is from farmlands, but much comes from urban erosion--roadbanks, parking lots, and lawns, for example.

If you need help with problems of sedimentation or erosion, contact your local Soil and Water Conservation District or Soil Conservation office.
