Send A Mouse To College

On Saturday morning, August 18, 1975, you'll have a chance to Send a Mouse to College and get some information that might save a life for just 51 cents. At Rockfish Plaza Shopping Center in Wallace, East Duplin High School students, American Cancer Society Volunteer, will be selling "Send a Mouse to College Buttons" and handing out leaflets explaining the seven danger signals of Cancer.

For 51 cents you can buy a button and provide one mouse for use in research. This is part of the American Cancer Society Crusade which raises funds for research, education, and service to cancer patients.

William, Duplin County, will be the American Cancer Society, P. O. Box 287 A, Beulaville, N.C.

FOOD SUPPLY

Less than one million commercial farms produce over 75 percent of our food supply. This means that over 300 consumers are dependent on the economic health of each farm, says Mrs. Ruby Uzale, extension consumer marketing economist, North Carolina State University.

Summer Colds: Good News

Experts tell us that viral infections drop eightfold during warm weather months. For those of you who can't seem to throw off that stuffed-up feeling during winter months long enough to know what it's like in-between colds, such news is good to know. At least a few months of relief can be expected each year.

Apparently, the "cold bug" survives much better in wet, shivering weather when our respiratory tracts are least able to throw them off. Our systems seem to function more efficiently in warm weather, and despite

popular belief the few summer colds that do strike do not hang on longer than winter colds.

Maybe now, we can relax our concern over catching summer-time colds and concentrate on our new adversities — sunburn and insect bites!
