

# The Kenansville Intercom

With Woody Brinson, Town Administrator

Kenansville, one of only 23 in North Carolina, and a Governor's Award Community. Our Beautification Committee has also worked hard to see that Kenansville wins a state award every year. What recognition awaits the Town of Kenansville next? Could we become an All-American City? Move on this at a later date. Until next week, remember that Kenansville is Proud of Its Past, and has Pride in Its Future.

## NOTE OF THANKS

The Elizabeth Whitman family wishes to express their deep appreciation to the many people who made the "Lib Whitman Benefit Day" such a huge success. We especially appreciate those who organized the day, the members of Unity United Methodist Church, friends in the community, those who spent their time and energy, those who responded to the ticket sales and all those who came and participated. There are no words to adequately express how much we appreciate the out-pouring of love and concern shown by every one of you.

"Trust generosity gives recognition."

## New VYDATE two-shot tobacco plan stops both nematodes and flea beetles.

Now you can apply VYDATE preplant incorporated in your tobacco fields for nematodes, and later add VYDATE to your transplant water for flea beetles and nematodes.

This new VYDATE plan gives you proven, effective protection against your two worst pest problems. With both nematodes and flea beetles under control, you can look forward to vigorous early growth leading to uniform flowering, and larger, more uniform leaves at harvest. Here's the two-shot plan:

**Shot one:** Broadcast VYDATE preplant and incorporate to a depth of 4 to 6 inches; then form your beds from treated soil. No waiting period is required. The preplant treatment can be made right up to the time of transplanting. VYDATE kills rootknot and lesion nematodes on contact. Then VYDATE moves into tobacco roots for systemic kill of feeding nematodes.

**Shot two:** Add VYDATE to your transplant water when transplanting young plants. VYDATE quickly moves into the plants to stop flea beetles as they feed. And this second VYDATE treatment gives you "booster shot" protection against nematodes. VYDATE in the transplant water needs no rainfall to start it working, and the systemic protection won't wash off. Just one economical, liquid product does the whole job.

Check out this new VYDATE two-shot tobacco plan with your dealer now.

As VYDATE is a highly toxic chemical and protective equipment is recommended, read and follow labeling instructions and warnings carefully.
