COUNTY TAX MAPPING PROGRAM -Christine Williams, Dunlin Register of Deeds, and Dan Halloway of the N.C. Land Records Management Program, listen to

questions on the proposed county tax

County Commissioners Hear

Duplin Tax Mapping Proposal

By Emily Killette

presented to the Duplin County Commissioners at their last meeting by Don Holloway of the N.C. Land Records Management Program.

Assisting Holloway were Frank Moore, tax supervisor, and Christine Williams, register of deeds. Holloway resented the Commissioners with the two types of maps involved in making long-range plans for mapping the county, and setting up land records by permanent parcel identifiers. he first mapping step would

e to base map the county. These would be aerial photographs of county parcels which would show all natural or manmade features in the parcel and would be very accurate. The second tep would involve cadsatral maps which are transparent overlays for the base maps which would outline boundaries and display the

the parcel identifier number - the owner's code number and location.

According to Moore, this system would benefit the county tax office in determining if all taxable parcels are correctly accounted for. But the system would also assist lawyers, appraisers, surveyors, and anyone wishing to locate a specific parcel

of land in the county. Christine Williams pointed out that this system would centralize all information about each parcel of land under a parcel identifier number. All loans, mortgages, plus the location, terrain and building information on the parcel could be obtained through the parcel identifier number.

The mapping program yould be set up according to the standard statewide system, the grid coordinate system, which used geodetic interest. Amounts in excess markers along roadsides to of loss needed to restore Jocate parcels. Mrs. Williams production or make major said a county tax-mapping adjustments in farm opera-program will install markers tions are available at 9% for on secondary roads in the real estate purchase and county because these 91/3% interest for annual

not reach back into recorded files. The system would be centralized in a computer and would allow counties to obtain information concerning a parcel of land over the telephone, Mrs. Williams said. As of this date, she added, each county has a different system of recording a parcel, and information concerning that parcel has to be obtained in several offices such as register of deeds, clerk of court, and the tax supervisor. The new system parcel identifier numbers would allow any person searching for information to feed the identifier number into the county computer and obtain the information from all the above offices, Mrs. Willaims ex-

Holloway is in charge of An explanation of a county The system would start development of long-range assisting counties with and list parcel identifier development of long-range and list parcel identifier mapping plans, and said numbers forward and would here are funds available on a dollar-for-dollar matching grant through the N.C. Land Records Management program. However, he stated there would not be any money available until July 1980. Holloway said \$75,000 had been allocated to the program for 1979, and had been divided among ten counties in the mapping program. However, he encouraged the Commissioners to file an application as soon as possible for the 1980 grant

The computerized tax mapping system is not expected to be less expensive than the present system, Moore said, but parcel information will be more accurate and will take less time to obtain.

Duplin Farmers Eligible For Loans

Third District Congressman Charlie Whitley and nounced Monday that FmHA has designated Duplin County farmers eligible for emergency loan assistance because of abnormal weather conditions in April and May

of this year. FmHA loans, according to Whitley, are made to qualifying farmers who lack other sources of credit for loans to cover qualifying damages and/or losses to crops, property, machinery and equipment, etc., caused by the abnormal weather con-

Loans for farmers with losses are made at 5% adjustments in farm operaoperating and chattel pur-

Farmers in Duplin County, Whitley said, may apply at the local Farm Home Administration office.

Spring Up Fall Back

Spring up - fall back is one way of remembering how to change the clock on the last Sunday in April and the last Sunday of October. Which means, daylight saving time will end this Sunday at 2 a.m. Clocks should be moved back an hoar to 1 a.m. and we'll all get back the hour we lost last spring.

James Sprunt Institute Renamed James Sprunt Technical College

By action of the James Sprunt Institute board of trustees on Sept. 27 and the Duplin County board of com-missioners on Oct. 15, James Sprunt Institute was renamed "James Sprunt Technical College." The change does not alter James Sprunt's mission of providing basic and advanced vocational/technical training and general education with college transfer option. The effective date of the name change was Oct. 15, 1979.
This action was made possible by the 1979 General Assembly.

Chairman of the Board of Trustees James F. Strickland has stated the following reasons for the change:

The term "technical college" more aptly describes the purposes and objectives of James Sprunt as far as its on-going mission is concerned. The name change will serve to bring the name more in line with the terminology that is most frequently used for institutions of our type throughout the state and county.

Nearly all sister institu-

ment was due to the number of oral and written requests the department received at the public hearing held Aug. 21 at North Duplin High School, Garrett said.

The proposed change will south of Warsaw at RPR 1113, paralleling RPR 1106, crossing under RPR 1107, crossing US 117 a half-mile north of the original intersection, passing through and dead-ending side road 1907 or the Cavenaugh Road, and connecting back into the original plans at RPR 1908. An overpass will carry RPR 1107 over Highway 40, and a full access interchange will be at the US 117 intersection.

This change will reduce the cost of the realigned portion from \$12,170,300 to \$10,637,900 and it will also reduce the number of relocatees by about nine, Garrett said. The original plan included over 10 relocatees, and the revised plan will only have 2-3. The realigned por-tion B are \$60,042,000. tion is part of the 25-mile Funds for the project will

Section B of Highway 40, which travels through Sampson and Duplin Counties. According to Garrett, all portions of Highway 40 except the 3.8 re-aligned section, have been approved and acquisition of right-of-ways began in September. Garrett estimated right-of-way acquisition for the revised portion would begin about January of 1980. The transcript of the realignment hearing at James Kenan will be open for written comments until Oct.

Section B is a 25-mile length of Highway 40 from south of Newton Grove to north of Magnolia. Highway 40 is a 90-mile freeway from Benson to Wilmington which is being constructed to provide a directect connection for the coastal plains to Wilmington. The total project is estimated to cost \$267,500,000; costs of sec-

28, Garret said.

come from the federal government who will supply 75 percent and the state of North Carolina will pay. 25 percent. According to DOT officials, a true interstate is 90 percent Federally funded and only 10 percent state

The right-of-way width of Highway 40 will be 320 feet with two one-way lanes each 24 feet, and a 46-foot median between the lanes. The remaining 220 feet will be divided on either side of the freeway as shoulders. Highway officials indicated that a 46-foot median is needed for safety reasons, and the 110foot shoulders include expansion room for the future. According to highway department figures, there will be as many as 9,000 automobiles traveling Highway 40 daily in 1985, and by the year 2005, an estimated 15,100 daily travelers. The design speed for Highway 40 is 70 miles an

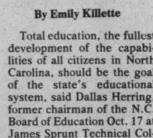

Dallas Herring Speaks At JSTC Forum

Total education, the fullest development of the capabilities of all citizens in North Carolina, should be the goal of the state's educational system, said Dallas Herring, former chairman of the N.C. Board of Education Oct. 17 at James Sprunt Technical Col-

Herring was a guest speaker in the forum, The Rural South in Transition, in which he discussed, "How Well Does Our Higher Education System Prepare People for a Changing Society:"

According to Herring, the N.C. educational system prepares some people for some roles very well, others are prepared in a satisfactory way, while others are prepared in an indifferent way, and others are not prepared at all.

In order to correct the educational needs in the new

Briley Named Jambo-Campo Chief It was announced by Ken McArthur, vice president

Boy Scouting, that Sid Briley had accepted appointment as chief of the Jambo-Campo to be held May 2-4, 1980. The Camporee will be staged at the Bonner Campgrounds east of Washington on the

The Jambo-Campo is a giant Camporee that will combine the efforts of the East Carolina and Tuscarora Councils. It is estimated that between 4-5,000 boy scouts will attend. The program, according to McArthur, has been on the drawing board for over a year, and has recently been approved by

the boards of the two councils.

Acting as Co-chairman of the event will be M. H. Pridgen of Rocky Mount. Other officers who will be assisting will include area chiefs Bill Stout of Goldsboro, Earl Hollaman of Goldsboro, Mike Gore of Clinton, Marvin Coats of Smithfield, Bill Faust of Warsaw, Doug Conner of Mount Olive. The chief judge will be Boyd Beall of Goldsboro, and co-chairmen for the special features will be General James Paschall of Walnut Creek and Captain Bill Beers of SJAFB.

society which is building, there is a need to provide an educational opportunity for everyone according to their need and potential, Herring stated. To make any other decision would be to choose ignorance and poverty over understanding and wealth,

he added. 'We have to take the educational opportunities to the people, where they are, in the variety they need, at the time that is convenient to them, and at a cost they can afford," Herring said.

The majority of North Carolinians have to work to support their families and education is a luxury they could not afford unless it is available to them where they are and when it would benefit them, Herring stated.

"It is cheaper to take education to the people than it is to bring the people to " Herring stated.

Herring added that he did not mean that residential colleges and universities were no longer needed but that they could not do the job alone. The community colleges provided technical and vocational job training and two years of general education courses for transfer to residential institutions. Without the community colleges, the working people who are hungry for an education could not afford to better themselves, Herring said and he asked, who is to deny citizens this oppour tunity when they pay tax money to support higher

education? "The only real opportunity such a man has is in the

North Carolina continues to batter away at the concept of universal education beyond the high school," Herring

Restrictions on the community college educational system are being tightened every day, Herring said. Non-traditional extension courses are becoming difficult to offcer, such as those to the physical and mentally

handicapped, the immured person. They can no longer be taught without special approval from Raleigh. Programs in the community college and technical institute are being cut from the budget while aid to private higher education is being increased. Herring also said that he did not think college transfer programs in these local institutions would be funded in the next bi-annual budget for the community college system in

"It (education) is a duty the state owes to its taxpaying citizens, especially those who cannot conform to the requirements of traditional higher education, but who have a right to prepare themselves for productive roles in the changing rural society," Herring com-

mented. Through the community college system and the expanded University of North Carolina, the state has moved ahead economically, Herring said. Without the support of these institutions. the state would only have regression and re-segregation, he added. Herring called for all political and educational warfare against these institutions to cease and he encouraged the taxpayers to stand up and fight for their right to have a total

community college or technical institute. He will find no racial or social or educational barriers there, but one wonders how much longer this may be true as
