

\$10,000 Needed For Warsaw Park

By Emily Killeit

\$11,000 to the new park. The town commissioners have now contributed \$28,000 to the park project. With the addition of the new pledge from the town board, \$10,000 would be needed to complete the project.

A meeting of the Recreation Commission, Chamber of Commerce, and participants in the recreation program selected a five-member fund drive committee. The committee, chaired by Johnnie Hollingsworth to raise the \$10,000, will be taking contributions from both individuals and busi-

nesses. Working with the committee, Hollingsworth said, are citizens who participate in the recreation program in Warsaw.

"The town has called The Bureau of Outdoor Recreation and they said we have the money," Hollingsworth said. "Now the ball is in our court, and we have to run with it."

A progress meeting of the fund-raising committee will be held at the town hall June 30 at 8 p.m. For more information on contributions, contact Johnnie Hollingsworth or Neale Turlington.

A goal of \$10,000 has been set by the fund-raising committee for the Warsaw Recreation Department to complete the matching funds for a grant to construct a new outdoor facility at the department.

A matching grant from the Bureau of Outdoor Recreation was awarded the Warsaw Recreation Department and December 1980 is the deadline to use the funds. However, the \$50,000 grant has to be matched dollar-for-dollar by the recreation department. The grant is planned to fund the construction of a new softball field, concession stand, parking lots, children's play area and jogging trails.

At the June 9th meeting of the Warsaw Board of Commissioners, Recreation Director Neale Turlington reported the project had come to almost a complete standstill. Only \$30,000 of the matching funds had been raised, and the recreation department was in danger of losing the grant.

After consideration of the 1980-81 town budget, Warsaw commissioners have pledged an additional

Play It Safe On The Highways

The Motorcycle Safety Foundation offers these highway safety hints:

1. Be especially cautious at intersections. That's where motorcycle accidents occur most often. Motorists, not cyclists, are at fault in these accidents almost 70 percent of the time.

2. Yield the right-of-way to motorcyclists. Turning left in front of a motorcyclist poses the most substantial risk.

3. Respect the vehicle space of a motorcycle and its position in traffic. Avoid crowding or passing a motorcycle in the same lane. When you do pass, allow as much space for a motorcycle as you would for another car.

NORTH CAROLINA WINEMAKER RALEIGH KNOWLES is shown disgorging the yeast sediment out of a bottle of champagne at Duplin Wine Cellars.

America's First Champagne State Is At It Again

North Carolina grape farmers are once again producing champagne. Duplin Wine Cellars, a farmer-owned co-op located in Rose Hill, is in the process of disgorging the yeast sediment from its 1979 vintage champagne.

The first champagne pro-

duced commercially in America was produced around 1835 at Medoc Vineyard by Sidney Weller. Medoc was located in the community of Brinkleyville in Halifax County. Weller's excellent scuppernon champagne was distributed throughout the eastern U.S. and sold for six dollars per gallon.

The fruity aroma and flavor characteristics of N.C. native muscadine grapes comes through quite well in champagne. The winemakers at Duplin Wine Cellars are jubilant over the crisp, natural smooth bouquet and taste that they have captured in their champagne.

FOUR COUNTY EMC YOUTH TOURISTS TRAVEL TO WASHINGTON, D.C. - Some 28 N.C. high school students were in Washington, D.C. last week for the annual Rural Electric Youth Tour. The tour, sponsored by N.C. EMCs, features visits with members of the Tar Heel Congressional delegation and stops at major historic

monuments and government buildings. The four young people on the tour representing Four County EMC are, left to right, Donnie Oscar Taylor, Amelia Kaye Lamb, Randall Garrett Kenan and Cheryl Kiana Johnson.

Easy To Eat Eggplant And Pasta Casserole

Time to think about easy all-in-one casseroles. Here's one where we've combined garden vegetables, cheese and a canned pasta product. You don't have to be Italian to prepare it, or enjoy eating it. If the family never liked eggplant dishes, here's betting they'll like this one. Try it, you'll like it.

EGGPLANT AND PASTA CASSEROLE

- 1 teaspoon salt
- 1 medium-sized eggplant, sliced 1/2" thick
- 1/2 cup cooking oil
- 1/2 cup chopped onions
- 2 cans (15 oz. each) Chef Boy-ar-dee® Mini-bites™ (mini cheese ravioli & meatballs in tomato sauce)
- 1 cup grated Mozzarella cheese

Salt eggplant slices; place waxed paper over them; weight with large platter for 15 minutes. Dry slices with absorbent paper. Fry eggplant slices in cooking oil; drain on absorbent paper. Sauté onions lightly. Arrange a layer of fried eggplant on top of Mini-bites; then, sautéed onions. Sprinkle with half of grated Mozzarella cheese. Continue layering: Mini-bites, eggplant slices, then cheese. Bake uncovered for 20 to 25 minutes in 350°F oven or until cheese is golden. Serves 4-6.

The less energy we have, the fewer jobs we'll have.

Between now and 1990, there will be 19 million more people who need jobs in America. In this area, it'll be about 390,000. And the only way that this area can provide that many more jobs is to build more plants and businesses. But that can't be done without a supply of energy. At the same time, it takes CP&L 12 years to build a nuclear plant; 6 years to build a coal-burning plant. So we have to build now to be ready for those workers in the future. But we may not have to build as much or as fast, if everyone does everything they can to conserve. So do what you can at home and at work to cut down on wasted energy. Because the more you get out of your energy dollar, the more we can get out of ours. And the less our bills will have to go up later on.

1979's work force will grow by 21% to 113.5 million in 1990.
