Duplin Expect Good Voter Turnout Tuesday

Despite the lack of countywide candidates or issues, Duplin County voters will turn out in "good numbers" Nov. 2, Carolyn Murphy, secretary of the county election board, said this past

"I expect to see a good turnout on account of the congressional race," she

sional seat is being sought by the Democratic incumbent, Charles Whitley of Mount Olive, and Republican Eugene "Red" McDaniel of Buies Creek.

One county office is being contested. The District 3 county board of education

D. Pate, the Democratic candidate, and Jackie London Creech, the Republican. have Beulaville addresses. Neither is an

The district covers southeastern Duplin County. In the county, the board of education and board of commissioners are elected by cr. state house of repre-

Duplin voters in the June primary elected their first woman commissioner. Dovie L. Penney of Wallace. She will represent District 4. which includes the southwestern portion of the county. No Republicans have filed for county commissionsentatives, district attorney, clerk of court or sheriff in the county. Thus primary election victories were tantamount to election for Mrs. Penney.

Allen D. Nethercutt for the third commissioners district and Calvin C. Turner for the fourth commissioners district. Also "elected" in the primary were William W. Richards for board of education from District 4, Sheriff T. Elwood Revelle, Clerk of Court John A. Johnson, Wendell Murphy for 10th state house district and Harold W. Hardison for the fifth state senate district.

Duplin County has 17,288 registered voters. Of these, 15,464 registered as Democrats, 1.744 as Republicans and 80 as unaffiliated. The registration includes 12,644 persons listed as white, 4,641 as black and three as Indian.

The list includes 4,580 blacks and 10,882 whites registered as Democrats, 58 blacks and 1,685 whites as Republicans, three blacks 77 whites as unaffiliated, two 'Indians as Democrats and

Kenansville Elementary School Leaky Roof Will Finally Be Fixed

A question of how best to correct leaks by fastening plywood sheets to the roof deck of the Kenansville Elementary School is to be decided in a meeting between Superintendent L.S. Guy and the architect, Herb McKim of Ballard, McKim and Sawyer Architects of Wilmington. The county board of edu-

cation last week found a state engineer had recommended one type of fastening and the architect another. It directed Guy to meet with the architact to settle the question so the work can proceed.

The 2-year-old school building has leaked since it was opened. Repeated repairs have failed to check the leaks. The work will cost the county nothing.

Both McKim and the state board of education engineer, Lewis Clark, have recoming material down to the deck. Both have recommended installation of halfinch plywood over the deck followed by installation of roofing felt and shingles.

The state engineer recommended fastening the plywood to the deck with toggle bolts, which would require drilling through the plywood and the deck. McKim had ecommended use of tube lock nails (a nail enclosed in a tube which is driven partway into the material. The nail point extends beyond the tube and bends beneath the material to "lock" it in place) to attach the plywood.

Board member E.L. Boyette said the company that manufactured the deck material suggested the tube lock nails. He added the shingle suppliers also had recommended the nails.

Gary Sanderson, assistant superintendent, reported 680 students took the state competency test for the first time this fall. He said the report

by Nov. 25. Boyette also urged a policy

be established to require yearly physical examinations for school bus drivers. At present a student must take a physical examination only when applying for a driving

The board has invited 81 former school administrators for parents will be received to a dinner meeting Monday Nov. 15 and a comparison in Kenansville Elementary

report of the area and state school. Thirty-nine had responded. Board members pay for the event.

The board will begin rotating its first meeting each month, effective with its Nov. 2 session, which will be held at 7:30 p.m. in Kenansville Elementary School. It second meeting of each month (held on the third Tuesday) will open at 7:30 p.m. in the school system headquarters in Kenansville.

Duplin To Fund Mosquito Control

The Duplin County Board of Commissioners last week approved spending \$44,000 for the mosquito control program to replace money the state eliminated.

Commissioner D.J. Fussell voted against the move, saying, "We can't keep picking up (programs) the state drops. Duplin County tax-payers just can't afford this. What we're doing is hurting our taxpayers. We have said previously that we're not going to pick these things up (state and federal program

Voting for the spending were Commissioners Allen Nethercutt, W.J. Costin, Franklin Williams and Chairman Calvin Turner.

Nathan Whaley, landfill supervisor, and Carey

supervisor, told the board they had expected \$94,000 from the state for mosquito control. The state reduced its contribution to \$50,230.

Three crews are working on the program. Each crew consists of three people - an equipment operator and two chain saw operators.
County Manager Ralph

Cottle said the board had two options - one, to eliminate one crew, which would save \$42,450 but would mean eliminating three jobs, and two, to absorb the loss.

The county had allocated \$84,277 for the program before adding the \$44,000.

The board obtained the \$44,000 by reappropriating \$18,600 previously allocated for purchase of a front-end

Turner, mosuqito control loader and \$25,400 from the Duplin County Economic salary account of David Underhill, who resigned as non-profit organization, to county landfill and mosquito receive a community de-

> Fussell also noted the state might make further cuts in mosuquito control allocations for the next fiscal year, starting July 1, 1983. He said Duplin County used equipment it already owned as "in kind" matching value when the mosquito control program began about 10 years ago. At that time it did not have to appropriate any money for the work.

> Williams commented, "I think it's a program that benefits everyone.

John Gurganus, county economic development director, reported creation of a

Development Authority, a program supervisor this velopment block grant. If the grant comes through, it will be used to build a freezer plant near the Swift & Co. turkey processing plant at

> The board passed a resolution of intent to approve in principle the issuance of \$4 million in tax-exempt revenue-sharing bonds for the proposed freezer plant. The bond issue must be approved by the state Department of Commerce.

The board rejected a request for \$430.50 from Dennis Knowles, Duplin County forest ranger, to buy two large tractor wrenches and a tire changer. Knowles said budget failed to provide for

the equipment. The board named the Rev.

sion to succeed the Rev. the Region P Council of Julian McMillan of Wallace,

Work To Begin On Watershed Project

Work on the first phase of the long-awaited Limestone Creek watershed project can begin by mid-November if the paper work can be completed without delay, Kenneth Futreal, Duplin County soil conservationist, said last

Wednesday following open-ing of bids for the project.

A bid of \$74,000 was received Wednesday of last week from Phelps and White Construction Co. of Windsor. Futreal described the bid as

"in line with our estimates." Two bids were received in the first round of bidding last month, but state law requires three bids on the first round. Only one bid was received Wednesday, but no mini-mum number of bids has been established for the second round.

First phase work calls for 21,000 feet of channel restoration and installation of three sediment basins. Sediment basins are deep basins dug in the channel to catch sediment running off fields or stirred by the channel work. When sediment in the basins reaches a specified depth it is removed to prevent channel clogging. Unchecked sedimentation of channels during years of logging and farming opera-tions on land near the creek has blocked drainage chan-

nels and caused flooding. E.T. Allen of Greenville, a partner in the bidding firm, said that while the contract allows 107 calendar days for the work, he hopes to get it done in less time. The bid specifies \$3.25 per linear foot for a total of \$68,250 for the channel work, \$3,500 for assembling equipment on the site and \$750 each for the

He said the channel work will be done from the chandel

with a hydraulic lift, not with a dragline on the bank. The firm has experience in this type of work, he added. It is completing a similar project in Swift Creek in Pitt County, a \$1.5 million project, Allen

Futreal said he hopes bid invitations for the main portion of the project, Phase 2, can be sent out by the first of the year. Design work has been completed and invitations can be sent as soon as specifications can be printed. he added.

The second phase includes 17 miles of channel exca-vation and 21 miles of channel restoration. Its cost is estimated at \$600,000 to

Limestone Creek starts in the swamps near the Duplin-Onslow county line and flows generally westward to the Northeast Cape Fear River at Hallsville in southern Duplin County. N.C. 241 crosses the creek about three-fourths of a mile north of Beulaville and N.C. 11 about a mile north-

east of Beulaville. The initial phase of the work will start about a mile west of Beulaville, near where N.C. 24 crosses the

The total project includes 41,000 acres of which 14,800 are in crops and 22,800 in forest. Landowners are cooperating by taking steps to reduce or eliminate erosion

Hunt To Present Community Of **Excellence Awards**

Governor James B. Hunt will present the 1983 Governor's Community of Excellence award to officials of Kenansville and Magnolia at the 1982 Governor's Conference on Economic Development at the Raleigh Civic Center Wednesday.

"This award means Kenansville and Magnolia have laid a strong foundation for bringing sound economic development and good new jobs to the area," Hunt said

in announcing the award. One hundred and thirtytwo N.C. communities will receive the award this year. The designation means they have met stringent standards reflecting site selection criteria often considered by manufacturers seeking new plant sites.

Among other things, the standards require: a local development team trained to discuss available sites, facilities and other location factors; a financial organization enabling the community to buy, sell and option property for or to industrial clients, as well as finance the construction of industrial buildings; adequate school, health care and recreational opportunities; clear and well-organized information on the community, its utilities, transportation facilities, taxes and other important factors; and an economic development organization to support and coordinate economic de-
